College Libraries and Student Culture Lynda M. Duke, Andrew D. Asher, 2011-09-23 This important book deepens our understanding of how academic libraries can better serve students' needs, and also serves as a model for other researchers interested in a user-centered approach to evaluating library services.

Progressive Library Organizations Alfred Kagan, 2015-03-26 This work presents the history and impact of the seven most important progressive library organizations worldwide--in Austria, Germany, South Africa, Sweden, United Kingdom, and two in the United States. Each organization is considered within its national context, and in fact, the English word organization does not quite fit the nature of all of the groups. The South African organization, LIWO, was transitional in that it helped bring South African librarianship from apartheid to majority rule and then disbanded. The other organizations or their successors are still working in one form or another. Some of the organizations have had or continue to have vibrant local chapters, though many of the original activists have recently retired or died. The author has interviewed many of them at a time when they were assessing their life work, and handing off to new generations.

Developing Library and Information Center Collections G. Edward Evans, Margaret R. Zarnosky, Margaret Zarnosky Saponaro, 2000 This new work addresses the challenges of electronic publishing and puts issues of collection development into perspective, providing a broad understanding of the collection development process. The book covers all phases of collection development--from needs assessment, policies, and the selection process (theory and practice) to publishers, serials, protection, legal issues, and censorship and intellectual freedom. This work addresses the challenges of electronic publishing and puts issues of collection development into perspective, providing students and practitioners of library and information science with a broad understanding of the collection development process. The book covers all phases of collection development--from needs assessment, policies, and the selection process (theory and practice) to publishers, serials, protection, legal issues, and censorship and intellectual freedom. Each chapter has been expanded and updated with new material and reading lists. In addition, a chapter that is new to this edition deals with e-serials; and two appendixes contain samples of policies related to electronic concerns. It is an excellent survey of the state of the art of collection development and a comprehensive text.
