Presidential Performance Max J. Skidmore,2014-06-24 Presidential rankings emerged in 1948 when Life Magazine published an article by the prominent historian, Arthur M. Schlesinger, Sr., who had selected 55 experts on the presidency and asked them to rank the presidents. He asked his respondents to rank presidents into categories of Great, Near Great, Average, Below Average and Failure. The result was a substantial article that attracted wide public attention. His work and similar studies have not escaped criticism, however. Many general works on the presidency have discussed presidential greatness and identified presidents who stood out for good or ill. There are likely unavoidable inadequacies in all ranking schemes, regardless of the complicated measures that many authors employ in their attempts to be scientific. This book provides useful criticism of these presidential rankings. It is arranged chronologically, and discusses each presidential performance and each ranking study in detail. Perhaps it would be sufficient to say that most who held the office were right for their time.

British Politics and European Elections 2004 D. Butler,M. Westlake,2005-04-18 A 'non-election' in terms of popular perception, the 2004 European elections in the United Kingdom nevertheless provided a fascinating snapshot of the new, far more fluid electoral trends that have been emerging since the end of the Thatcher era, with Green, Eurosceptical, regional and single issue parties all jostling for electoral space with the bigger three. Like its predecessors, this book documents the background, framework and party preparations; recounts how the campaign unfolded; analyses the results and explores the consequences of the elections in both the British and the European context.

Ministry of Defence Annual Report and Accounts 2004-05 Great Britain: Parliament: House of Commons: Defence Committee,2006-04-20 This report analyses MoD's annual report and accounts 2004-05 (published in October 2005 - later than planned - as HC 464, session 2005-06, ISBN 0102935424) which combines MoD's annual performance report and the consolidated departmental resource accounts. Overall MoD's performance against its seven Public Service Agreement (PSA) targets has been mixed: three were met, two were partly met, one was on course to be met, and one was not yet assessed. On recruitment and retention (partly met) all three armed services are suffering from critical shortages in various specialist trades, including aircrew and medical personnel. Although MoD reported £400m of savings in the operating costs of the Defence Logistics Organisation, the Committee criticizes the fact that not all of them could be validated. On procurement, MoD did not meet the targets relating to project time slippage. Cost decreases of £699 million were reported on the top 20 major defence equipment projects, but much of this was a result of cuts in the numbers of equipment ordered or in the capability of equipment. Losses reported in MoD's Financial Accounts totalled some £400 million, a lower figure than the previous year but still a substantial sum. Reported losses on the Landing Ship Dock (Auxiliary) programme, which involves the procurement of four transport ships, were some £100 million and further losses might arise. Another loss totalling £147 million related to a building project at the Atomic Weapons Establishment at Aldermaston. The building was unable to meet the requirement and no other use could be found for it. It is another example of substantial waste which has to avoided in the future.
