The Filter Bubble Eli Pariser,2011-05-12 An eye-opening account of how the hidden rise of personalization on the Internet is controlling-and limiting-the information we consume. In December 2009, Google began customizing its search results for each user. Instead of giving you the most broadly popular result, Google now tries to predict what you are most likely to click on. According to MoveOn.org board president Eli Pariser, Google's change in policy is symptomatic of the most significant shift to take place on the Web in recent years-the rise of personalization. In this groundbreaking investigation of the new hidden Web, Pariser uncovers how this growing trend threatens to control how we consume and share information as a society-and reveals what we can do about it. Though the phenomenon has gone largely undetected until now, personalized filters are sweeping the Web, creating individual universes of information for each of us. Facebook-the primary news source for an increasing number of Americans-prioritizes the links it believes will appeal to you so that if you are a liberal, you can expect to see only progressive links. Even an old-media bastion like The Washington Post devotes the top of its home page to a news feed with the links your Facebook friends are sharing. Behind the scenes a burgeoning industry of data companies is tracking your personal information to sell to advertisers, from your political leanings to the color you painted your living room to the hiking boots you just browsed on Zappos. In a personalized world, we will increasingly be typed and fed only news that is pleasant, familiar, and confirms our beliefs-and because these filters are invisible, we won't know what is being hidden from us. Our past interests will determine what we are exposed to in the future, leaving less room for the unexpected encounters that spark creativity, innovation, and the democratic exchange of ideas. While we all worry that the Internet is eroding privacy or shrinking our attention spans, Pariser uncovers a more pernicious and far- reaching trend on the Internet and shows how we can- and must-change course. With vivid detail and remarkable scope, The Filter Bubble reveals how personalization undermines the Internet's original purpose as an open platform for the spread of ideas and could leave us all in an isolated, echoing world.

Who Is Melvin Bubble? Nick Bruel,2006-08-08 An introduction to six-year-old Melvin Bubble as presented by his family, friends, and others.

Bubble in the Sun Christopher Knowlton,2021-01-12 Christopher Knowlton, author of Cattle Kingdom and former Fortune writer, takes an in-depth look at the spectacular Florida land boom of the 1920s and shows how it led directly to the Great Depression. The 1920s in Florida was a time of incredible excess, immense wealth, and precipitous collapse. The decade there produced the largest human migration in American history, far exceeding the settlement of the West, as millions flocked to the grand hotels and the new cities that rose rapidly from the teeming wetlands. The boom spawned a new subdivision civilization—and the most egregious large-scale assault on the environment in the name of “progress.” Nowhere was the glitz and froth of the Roaring Twenties more excessive than in Florida. Here was Vegas before there was a Vegas: gambling was condoned and so was drinking, since prohibition was not enforced. Tycoons, crooks, and celebrities arrived en masse to promote or exploit this new and dazzling American frontier in the sunshine. Yet, the import and deep impact of these historical events have never been explored thoroughly until now. In Bubble in the Sun Christopher Knowlton examines the grand artistic and entrepreneurial visions behind Coral Gables, Boca Raton, Miami Beach, and other storied sites, as well as the darker side of the frenzy. For while giant fortunes were being made and lost and the nightlife raged more raucously than anywhere else, the pure beauty of the Everglades suffered wanton ruination and the workers, mostly black, who built and maintained the boom, endured grievous abuses. Knowlton breathes dynamic life into the forces that made and wrecked Florida during the decade: the real estate moguls Carl Fisher, George Merrick, and Addison Mizner, and the once-in-a-century hurricane whose aftermath triggered the stock market crash. This essential account is a revelatory—and riveting—history of an era that still affects our country today.

The Higher Education Bubble Glenn H. Reynolds,2012 America is facing a higher education bubble. Like the housing bubble, it is the product of cheap credit coupled with popular expectations of ever-increasing returns on investment, and as with housing prices, the cheap credit has caused college tuitions to vastly outpace inflation and family incomes. Now this bubble is bursting. In this Broadside, Glenn H. Reynolds explains the causes and effects of this bubble and the steps colleges and universities must take to ensure their survival. Many graduates are unable to secure employment sufficient to pay off their loans, which are usually not dischargeable in bankruptcy. As students become less willing to incur debt for education, colleges and universities will have to adapt to a new world of cost pressures and declining public support.

Bobbin Bubble Kerrie Jane McCarthy,2021-10-29 Welcome to Bobbin Bubble... my Bubble. A Bubble filled with pink, magic and a town full of wonderful characters. This has been my defense mechanism, a shield from the Big Bad World and all the negativity it comes with. Throughout my continued battle with my Mental Health, the Bobbin Bubble has been my second home- a place that I created in my mind to keep me safe from the badness .With that... here comes the first rule of this book... No Negativity allowed. Everything you read within this books is a treasured piece of my imagination that exists purely to make me (and now hopefully, you) smile. Once you criticize, frown or mock, the bubble pops. The aim of this book is to put you back in touch with the imagination you had as a child and to help you relax back into the magic of what if where nothing is impossible. I believe if everyone had a bubble like this, the world would be a much happier place. So perhaps, hopefully, after reading this book you will create your own bubble and fill it with all of the things that make you giggle, or, if you prefer, you can just continue to share mine with me. I don't mind, you are more than welcome here. If you would like to see some more more of my insanity, please follow me @bobbincottage on instagram

Bubble Jordan Morris,Sarah Morgan,2021-07-13 Based on the smash-hit audio serial, Bubble is a hilarious high-energy graphic novel with a satirical take on the “gig economy.” Built and maintained by corporate benevolence, the city of Fairhaven is a literal bubble of safety and order (and amazing coffee) in the midst of the Brush, a harsh alien wilderness ruled by monstrous Imps and rogue bands of humans. Humans like Morgan, who’s Brush-born and Bubble-raised and fully capable of fending off an Imp attack during her morning jog. She’s got a great routine going—she has a chill day job, she recreationally kills the occasional Imp, then she takes that Imp home for her roommate and BFF, Annie, to transform into drugs as a side hustle. But cracks appear in her tidy life when one of those Imps nearly murders a delivery guy in her apartment, accidentally transforming him into a Brush-powered mutant in the process. And when Morgan’s company launches Huntr, a gig economy app for Imp extermination, she finds herself press-ganged into kicking her stabby side job up to

the next level as she battles a parade of monsters and monstrosly Brush-turned citizens, from a living hipster beard to a book club hive mind.

In the Bubble John Thackara,2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. *In the Bubble* describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of *In the Bubble* is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.
