BURP - the other wine book Bas Korpel, Jur Baart, 2020-11-25 A wine book that turns the world of wine upside down. This time the starting point is not the differences between wine regions, grape

varieties, top producers or exceptional terroir. In *Burp - the other wine book* the focus is on the design and the stories behind the labels. Bas Korpel, writer and wine specialist: "The world of wine is infinite. Behind every label, there is a story. And we strongly believe that a wine tastes better when you know the story behind it. While making the book we discovered stories about battling armies, a logistical nightmare and an inventive importer. Thanks to the book we got our hands on the work of the art director of *The Godfather*, a label turned into a sobriety test and we exposed an artist's disputable choices he made during World War II. The good thing is that our readers can now discover all these trivia themselves." Jur Baart, concept maker and illustrator: "By looking at wine from the starting point of the label, you suddenly get completely different stories when opening a nice bottle. You no longer have to be a 'wine nerd' to have an entertaining story at the table. *Burp* is suitable for both the wine freak and the novice enthusiast. It not only describes the wine, but also the world of design, storytelling and branding. The book contains 260 pages and describes 40 different wines. The makers Bas Korpel and Jur Baart call it a punk wine book, because not only the stories are outspoken, but also the illustrations and photography. They published *Burp - the other wine book* themselves under the name of Fitzroy Publishing.

Burp, Spit & Fart Julia Garstecki, 2019-03-26 *Burp, Spit & Fart: The Science Behind the Gross Things Babies Do* answers some of the most pressing questions young readers have about their baby siblings—a companion book to *Pick, Spit & Scratch: The Science of Disgusting Habits* and *Sniff, Lick & Scratch: The Science of Disgusting Animal Habits*. Why does a baby's poop change color as it gets older? How do diapers keep all that pee in? Why do babies have to be burped after eating, and how does burping work, anyway? Do all babies suck their thumbs? And why can they put their toes in their mouths? As with the gross things that other humans and animals do, there's a bit of science behind the strange things that babies do. Each spread describes a specific habit or behavior, offering multilayered reading opportunities in the form of weird, disgusting facts that ratchet up the gross factor. Weird baby habits are transformed into relatable concepts for kids. In many cases, the author even debunks commonly held myths described and, in the process, shows that babies, though sometimes weird to older kids, are really just in the process of developing into normal kids. When you need immediate answers to questions about specific icky behaviors, use *Burp, Spit & Fart's* handy glossary and index. Kids will get a thrill out of exclaiming Eww! as they read this book. Parents will love that their children are reading and engaged in scientific inquiry.
