Best Care Anywhere Phillip Longman,2012-03-05 “An outstanding book . . . documents how the VA’s system of integrative care outperforms the models used by private insurers.” —USW Blog (United Steelworkers) NEW EDITION, REVISED AND UPDATED Phillip Longman tells the amazing story of the turnaround of the Department of Veterans Affairs health-care system from a dysfunctional, scandal-prone bureaucracy into the benchmark for high-quality medicine in the United States. Best Care Anywhere shows that vast swaths of what we think we know about health, health care, and medical economics are just plain wrong. And the book demonstrates how this extraordinarily cost-effective model, which has proven to be highly popular with veterans, can be made available to everyone. New to this edition is an analysis of how the shortcomings of both so-called Obamacare and Republican plans to privatize Medicare reinforce the need for applying the lessons of the VA. Also included are completely updated statistics and research, as well as examples of how the private sector is already beginning to learn from the VA’s example. “Among the most important social policy books published in the last decade.” —Ezra Klein, The Washington Post “Read Best Care Anywhere not just to learn about one of our public health agencies that is a global star in terms of cost effective, evidence-based results, but also to learn how your own health care process can be improved by adopting the Veterans Health Administration’s methodology for transparency and patient-centered care.” —New York Journal of Books

Hospice Care for Children Ann Armstrong-Dailey, Sarah Z. Goltzer, 1993-09-02 Children with life-threatening and terminal illnesses--and their families--require a unique kind of care to meet a wide variety of needs. This book provides an authoritative source for the many people involved in caring for dying children. It draws together contributions from leading authorities in a comprehensive, fully up-to-date resource, with an emphasis on practical topics that can be put to immediate use. The book covers the entire range of issues related to the hospice environment: organizational structure, clinical issues, the complementary roles of medical professionals and volunteers, the particular circumstances of neonatal and AIDS-related deaths, pain and symptom control, and bereavement support. It explains the developmental stages of children's understanding of death and offers useful advice about school programs and the helpful role of children's literature. Special consideration is given to the need to provide support to hospice staff as well as to grieving parents and surviving siblings. The book is intended for all those who participate in the hospice-care process: physicians, nurses, social workers, teachers, clergy, family therapists, parents, and community service volunteers.

Adult Day Care Lenore A Tate, Cynthia M Brennan, 2013-12-02 Intended for long-term care providers, consumers, and gerontology students, this valuable new guidebook and manual encourages the promotion and enhancement of adult day care as an essential link in long-term care. Since the early 1970s, the number of adult day care centers in the United States has grown from 20 to more than 620. This rapid increase in adult day care programs indicates that it is an important health care and social resource that has begun to fill a necessary gap in the long-term care system. To further meet the increasing needs, this new book provides information regarding the history, definition, and concept of adult day care; models of care; scope of activities; state and national policy; and samples of forms and reports needed for daily operations.

Ethics in Community-Based Elder Care Holstein, Phyllis B. Mitzen, 2000-09-05 Caring for elders outside of institutions is the fastest growing sector of US health care. Building on their research study

at the Park Ridge Center, editors Holstein and Mitzen, together with a team of experts, examine the complexities involved in developing an ethics for community-based long-term care. They also challenge policymakers to make home care a more viable option for older people in need. Chapters address many of the ethical and practical problems that arise in the care of older people with physical and mental disabilities--including how to allocate scarce funds, how to keep good caregivers, how to balance concerns of autonomy, risk and safety, and worker stress. The volume is an excellent resource for practitioners, policymakers, and students.

Making Gray Gold Timothy Diamond, 1992-10-15 This first hand report on the work of nurses and other caregivers in a nursing home is set powerfully in the context of wider political, economic, and cultural forces that shape and constrain the quality of care for America's elderly. Diamond demonstrates in a compelling way the price that business-as-usual policies extract from the elderly as well as those whose work it is to care for them. In a society in which some two million people live in 16,000 nursing homes, with their numbers escalating daily, this thought-provoking work demands immediate and widespread attention. [An] unnerving portrait of what it's like to work and live in a nursing home. . . . By giving voice to so many unheard residents and workers Diamond has performed an important service for us all.—Diane Cole, New York Newsday With Making Gray Gold, Timothy Diamond describes the commodification of long-term care in the most vivid representation in a decade of round-the-clock institutional life. . . . A personal addition to the troublingly impersonal national debate over healthcare reform.—Madonna Harrington Meyer, Contemporary Sociology

Care for Our World Karen Robbins, 2011 Rhyming text reminds us that we all have a responsibility to nurture and respect life in all its many forms.

When I Care about Others Cornelia Maude Spelman, 2002-01-01 In today's society, perhaps more than ever, young children need to develop empathy. In this simple book, the author begins by helping children see that when they are sick, hurt, or unhappy, others care about them. Children can then begin to see that others need to be cared about as well. Common situations will further a child's appreciation for and understanding of what others feel and need.

Principles of Health Care Management Seth B. Goldsmith, 2009-11-13 Faced with strict government regulations and increasing service demands by consumers, healthcare providers find themselves accountable on both ends. Written to reflect the realities of the 21st century, Principles of Health Care Management considers the many outside forces influencing health care institutions, and in doing so provides a progressive and modern reference on how to effectively manage a health organization. Using relevant case studies to illustrate key points, this text explains the critical changes and challenges that administrators must deal with as they go about practicing their profession and what students must learn as they begin their study of this vital field.

Worlds of Care Aaron J. Jackson, 2021-04-06 The stories of fathers caring for non-verbal children and how these experiences alter their understandings of care, masculinity, and living a full life. Vulnerable narratives of fatherhood are few and far between; rarer still is an ethnography that delves into the practical and emotional realities of intensive caregiving. Grounded in the intimate everyday lives of men caring for children with major physical and intellectual disabilities, Worlds of Care undertakes an exploration of how men shape their identities in the context of caregiving. Anthropologist Aaron J. Jackson fuses ethnographic research and creative nonfiction to offer an evocative account of what is required for men to create habitable worlds and find some kind of "normal" when their circumstances are anything but. Combining stories from his fieldwork in North America with reflections on his own experience caring for his severely disabled son, Jackson argues that care has the potential to transform our understanding of who we are and how we relate to others.
