The American College and University Frederick

Rudolph, 1990 First published in 1962, Frederick Rudolph's groundbreaking study, *The American College and University*, remains one of the most useful and significant works on the history of higher education in America. Bridging the chasm between educational and social history, this book was one of the first to examine developments in higher education in the context of the social, economic, and political forces that were shaping the nation at large. Surveying higher education from the colonial era through the mid-twentieth century, Rudolph explores a multitude of issues from the financing of institutions and the development of curriculum to the education of women and blacks, the rise of college athletics, and the complexities of student life. In his foreword to this new edition, John Thelin assesses the impact that Rudolph's work has had on higher education studies. The new edition also includes a bibliographic essay by Thelin covering significant works in the field that have appeared since the

publication of the first edition. At a time when our educational system as a whole is under intense scrutiny, Rudolph's seminal work offers an important historical perspective on the development of higher education in the United States.

College Knowledge David T. Conley, 2008-01-28 Although more and more students have the test scores and transcripts to get into college, far too many are struggling once they get there. These students are surprised to find that college coursework demands so much more of them than high school. For the first time, they are asked to think deeply, write extensively, document assertions, solve non-routine problems, apply concepts, and accept unvarnished critiques of their work. *College Knowledge* confronts this problem by looking at the disconnect between what high schools do and what colleges expect and proposes a solution by identifying what students need to know and be able to do in order to succeed. The book is based on an extensive three-year project sponsored by the Association of American Universities in partnership with The Pew Charitable Trusts. This landmark research identified what it takes to succeed in entry-level university courses. Based on the project's findings - and interviews with students, faculty, and staff - this groundbreaking book delineates the cognitive skills and subject area knowledge that college-bound students need to master in order to succeed in today's colleges and universities. These Standards for Success cover the major subject areas of English, mathematics, natural sciences, social sciences, second languages, and the arts.

College Andrew Delbanco, 2023-04-18 The strengths and failures of the American college, and why liberal education still matters As the commercialization of American higher education accelerates, more and more students are coming to college with the narrow aim of obtaining a preprofessional credential. The traditional four-year college experience—an exploratory time for students to discover their passions and test ideas and values with the help of teachers and peers—is in danger of becoming a thing

of the past. In *College*, prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education, and warns that it is becoming a privilege reserved for the relatively rich. In describing what a true college education should be, he demonstrates why making it available to as many young people as possible remains central to America's democratic promise. In a brisk and vivid historical narrative, Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church, how it struggled to survive in the nineteenth century in the shadow of the new research universities, and how, in the twentieth century, it slowly opened its doors to women, minorities, and students from low-income families. He describes the unique strengths of America's colleges in our era of globalization and, while recognizing the growing centrality of science, technology, and vocational subjects in the curriculum, he mounts a vigorous defense of a broadly humanistic education for all. Acknowledging the serious financial, intellectual, and ethical challenges that all colleges face today, Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations.

Cheating in College Donald L. McCabe, Kenneth D.

Butterfield, Linda K. Treviño, 2012-09-11 Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. *Cheating in College* explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student

handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

How to College Andrea Malkin Brenner, Lara Hope Schwartz, 2019-04-23 The first practical guide of its kind that helps students transition smoothly from high school to college The transition from high school—and home—to college can be stressful. Students and parents often arrive on campus unprepared for what college is really like. Academic standards and expectations are different from high school; families aren't present to serve as "scaffolding" for students; and first-years have to do what they call "adulting." Nothing in the college admissions process prepares students for these new realities. As a result, first-year college students report higher stress, more mental health issues, and lower completion rates than in the past. In fact, up to one third of first-year college students will not return for their second year—and colleges are reporting an increase in underprepared first-year students. *How to College* is here to help. Professors Andrea Malkin Brenner and Lara Schwartz guide first-year students and their families through the transition process, during the summer after high school graduation and throughout the school year, preparing students to succeed and thrive as they transition and adapt to college. The book draws on the authors' experience teaching, writing curricula, and designing programs for thousands of first-year college students over decades.

The Everything College Checklist Book Cynthia C Muchnick, 2013-03-18 Maximize your college experience! The path to higher education is filled with college visits, paperwork, letters of recommendation, essays, and application fees--and that's just to get in! After that comes the financial aid paperwork, student

loan notes, scholarship applications, and vouchers--and that's just to pay for it! Then come the roommate compatibility survey, the lists of what to pack, what supplies are need for classes, and the lists go on and on. The Everything College Checklist Book is here to help. These valuable checklists help you keep track of applications, references, transcripts, and financial aid. There are lists of questions to ask potential roommates, what to pack for dorm life, and ideas for the supplies needed for stress-free studying. It's the ultimate guide for making a smooth transition into college life.

Navigating College Melody Latimer, 2013-07 Leaving high school and going to college is complicated for everyone. But if you're a student on the autism spectrum who is about to enter higher education for the first time, it might be a little bit more complicated for you. Maybe you're worried about getting accommodations, getting places on time, or dealing with sensory issues in a new environment. Maybe you could use some advice on how to stay healthy at school, handle dating and relationships, or talk to your friends and classmates about your disability. Maybe you want to talk to someone who's already dealt with these issues. That's where we come in. *Navigating College* is an introduction to the college experience from those of us who've been there. The writers and contributors are Autistic adults, and we're giving you the advice that we wish someone could have given us when we headed off to college. We wish we could sit down and have a chat with each of you, to share our experiences and answer your questions. But since we can't teleport, and some of us have trouble meeting new people, this book is the next best thing. So as you go back to school, check out a copy of *Navigating College* for yourself or your loved one. We've done this all before--let us help you out.

Colleges That Change Lives Loren Pope, 2006-07-25 Prospective college students and their parents have been relying on Loren Pope's expertise since 1995, when he published the first

edition of this indispensable guide. This new edition profiles 41 colleges—all of which outdo the Ivies and research universities in producing performers, not only among A students but also among those who get Bs and Cs. Contents include: Evaluations of each school's program and personality Candid assessments by students, professors, and deans Information on the progress of graduates This new edition not only revisits schools listed in previous volumes to give readers a comprehensive assessment, it also addresses such issues as homeschooling, learning disabilities, and single-sex education.

Native Presence and Sovereignty in College Amanda R.

Tachine, 2022 What is at stake when our young people attempt to belong to a college environment that reflects a world that does not want them for who they are? In this compelling book, Navajo scholar Amanda Tachine takes a personal look at 10 Navajo teenagers, following their experiences during their last year in high school and into their first year in college. It is common to think of this life transition as a time for creating new connections to a campus community, but what if there are systemic mechanisms lurking in that community that hurt Native students' chances of earning a degree? Tachine describes these mechanisms as systemic monsters and shows how campus environments can be sites of harm for Indigenous students due to factors that she terms monsters' sense of belonging, namely assimilating, diminishing, harming the worldviews of those not rooted in White supremacy, heteropatriarchy, capitalism, racism, and Indigenous erasure. This book addresses the nature of those monsters and details the Indigenous weapons that students use to defeat them. Rooted in love, life, sacredness, and sovereignty, these weapons reawaken students' presence and power. Book Features: Introduces an Indigenous methodological approach called story rug that demonstrates how research can be expanded to encompass all our senses. Weaves together Navajo youths' stories of struggle and hope in educational settings, making visible

systemic monsters and Indigenous weaponry. Draws from Navajo knowledge systems as an analytic tool to connect history to present and future realities. Speaks to the contemporary situation of Native peoples, illuminating the challenges that Native students face in making the transition to college. Examines historical and contemporary realities of Navajo systemic monsters, such as the financial hardship monster, deficit (not enough) monster, failure monster, and (in)visibility monster. Offers insights for higher education institutions that are seeking ways to create belonging for diverse students.

Intersectionality and Higher Education W. Carson

Byrd, Rachelle J. Brunn-Bevel, Sarah M. Ovink, 2019-05-03 Though colleges and universities are arguably paying more attention to diversity and inclusion than ever before, to what extent do their efforts result in more socially just campuses? *Intersectionality and Higher Education* examines how race, ethnicity, class, gender, sexuality, sexual orientation, age, disability, nationality, and other identities connect to produce intersected campus experiences. Contributors look at both the individual and institutional perspectives on issues like campus climate, race, class, and gender disparities, LGBTQ student experiences, undergraduate versus graduate students, faculty and staff from varying socioeconomic backgrounds, students with disabilities, undocumented students, and the intersections of two or more of these topics. Taken together, this volume presents an evidence-backed vision of how the twenty-first century higher education landscape should evolve in order to meaningfully support all participants, reduce marginalization, and reach for equity and equality.

Redesigning America's Community Colleges Thomas R.

Bailey, Shanna Smith Jaggars, Davis Jenkins, 2015-04-09 Community colleges enroll half of the nation's undergraduates. Yet only 40 percent of entrants complete an undergraduate degree in six years. *Redesigning America's Community Colleges* explains how

two-year colleges can increase their students' success rate quickly and at less cost, through a program of guided pathways to completion.

Choosing College Michael B. Horn, Bob Moesta, 2019-09-11 Cut through the noise and make better college and career choices This book is about addressing the college-choosing problem. The rankings, metrics, analytics, college visits, and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make. They don't give students and families the information and context they need to make such a high-stakes decision about whether and where to get an education. Choosing College strips away the noise to help you understand why you're going to school. What's driving you? What are you trying to accomplish? Once you know why, the book will help you make better choices. The research in this book illustrates that choosing a school is complicated. By constructing more than 200 mini-documentaries of how students chose different postsecondary educational experiences, the authors explore the motivations for how and why people make the decisions that they do at a much deeper, causal level. By the end, you'll know why you're going and what you're really chasing. The book: Identifies the five different jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each job The authors help readers understand not what job students want out of college, but what job students are hiring college to do for them.

A Different College Experience Brian Mills, Ben Trueblood, 2019-01-15 For many, the college experience is defined by drinking, sex, impulsive decision-making, and a journey of self discovery. It's packaged as a consequence-free zone to have the best time of your life. But the reality is that what happens in college doesn't stay in college. There are real, lasting

consequences to your decisions. Student ministry leaders Ben Trueblood and Brian Mills have seen this firsthand. With decades of student-ministry leadership under their belts, they have seen too many lives fall apart because of the world's view of what the college experience should be. You don't have to have that kind of college experience. Fortunately, just as the gospel redeems all of life, the gospel redeems the college experience. It tells us there is another way. In this book, Ben and Brian provide a biblical and practical guide for how you can have a fun, joy-filled, and spiritually enriching college experience while avoiding the pitfalls that have captured so many before you.

From Bottom to Top Tier in a Decade Norman R. Smith, 2010-09-02 From Bottom to Top Tier in a Decade: The Wagner College Turnaround Years is a memoir recounting one of the most remarkable turnaround stories in American higher education, as recalled by the president who led a fourteen-year campaign bringing this financially troubled, under-enrolled, bottom-ranked college from disrepair and impending closure to wide regard as one of the top small, residential private colleges in the east. By the time Norman Smith departed in 2002, the college was ranked top tier, was full to capacity, and was cited as one of

America's most beautiful college campuses. Located on a hilltop overlooking Manhattan that had once been Vanderbilt and Cunard estates, Wagner College should never have gotten into trouble. This recounting is not only an engaging human story of the many trustees, benefactors, faculty, and staff who were key to the turnaround, but also represents a case study template of what must happen for any college to survive and ultimately flourish in these competitive times for private higher education.

Andreu, Sharon Morse, Misa Sugiura, Nafiza Azad, Maurene Goo, Sonja Charaipotra, Yamile Saied Méndez, Zoraida Córdova, Alaya Dawn Johnson, Sara Farizan, Isabel Quintero, Justine Larbalestier, Lilliam Rivera, 2020-10-13 This exceptional and powerful anthology explores the joys, heartbreaks and triumphs of immigration, with stories by critically acclaimed and bestselling YA authors who are shaped by the journeys they and their families have taken from home—and to find home. *WELCOME* From some of the most exciting bestselling and up-and-coming YA authors writing today...journey from Ecuador to New York City and Argentina to Utah...from Australia to Harlem and India to New Jersey...from Fiji, America, Mexico and more... *Come On In*. With characters who face random traffic stops, TSA detention, customs anxiety, and the daunting and inspiring journey to new lands...who camp with their extended families, dance at weddings, keep diaries, teach ESL...who give up their rooms for displaced family, decide their own answer to the question "where are you from?" and so much more... *Come On In* illuminates fifteen of the myriad facets of the immigrant experience, from authors who have been shaped by the journeys they and their families have taken from home—and to find home.

College and the Working Class Allison L. Hurst, 2012-03-26 What are the meanings, experiences, and impact of college for working-class people? The author of this book addresses the two questions, what is college like for working-class students, and what

is college for the working class? In *The Other Three Percent*, the author draws on a wealth of previous research to tell the stories of five very different working-class college students as they apply to, enter, successfully navigate, and complete college. Through these stories readers will learn about the obstacles working-class students face and overcome, the costs and effectiveness of higher education as a mechanism of social mobility, and the problems caused on our college campuses by our reticence to meaningfully confront the class divide. Readers will be invited to compare their own experiences of higher education with those of the students here described, and to evaluate their own institutions' openness towards working-class students through a series of checklists provided in the book's conclusion. Allison L. Hurst is Assistant Professor in the Department of Sociology at Furman University in Greenville, South Carolina. She is a member of the Association of Working-Class Academics.
