Find Colors Jason Fulford, 2018-06-11 A colors book with no colors ? instead, die-cuts to peek through and find them yourself This introduction to colors integrates the reader's surroundings into carefully considered die-cut silhouettes, providing children the space to visually experiment. Readers will gaze around the room through a rooster-shaped hole in search of something red, through a sun-shaped hole for something yellow, through squiggly worms for something pink. Designed for the youngest readers, this sturdy board book features 12 die-cuts made to flip and carry on a color-seeking mission. Inspired by the Whitney Museum's approach to looking at art, these books provide a new way to look at the world.

Colors Andrew Berardini, 2022-06-21 The most elegant of all art critic cowboys --Spike Art Magazine Color beams at us from the everyday, but within each of the ten million shades are hidden our best and worst stories. Colors is a lyrical field guide to the richly textured and depthless stories of color. This exuberant, sometimes haunting collection of histories, poetry, criticism, fictions, memoir, and myths examines with heartbreaking beauty the individual shades that

make up a rainbow. With tough and tender grace, Berardini takes us on a passionate and compelling journey into the deepest soul and brightest edges of this fundamental subject with extraordinary poetry vision.

On Vision and Colors; Color Sphere Arthur Schopenhauer, Philipp Otto Runge, 2012-03-20 During the first two decades of the nineteenth century, two of the most significant theoretical works on color since Leonardo da Vinci's *Trattato della Pittura* were written and published in Germany: Arthur Schopenhauer's *On Vision and Colors* and Philipp Otto Runge's *Color Sphere*. For Schopenhauer, vision is wholly subjective in nature and characterized by processes that cross over into the territory of philosophy. Runge's *Color Sphere* and essay *The Duality of Color* contained one of the first attempts to depict a comprehensive and harmonious color system in three dimensions. Runge intended his color sphere to be understood not as a product of art, but rather as a mathematical figure of various philosophical reflections. By bringing these two visionary color theories together within a broad theoretical context—philosophy, art, architecture, and design—this volume uncovers their enduring influence on our own perception of color and the visual world around us.

 Charts organized by color family let you swatch all your reds on one
 page, blues on another, etc. which is helpful when looking for the
 perfect hue regardless of brand. **IMPORTANT:** watercolor and
 marker pages have black-backed pages to minimize bleed-through.
 The paper in this book (depending on where it was printed) is fairly
 tough, but obviously thinner than watercolor paper. Colors can look
 splotchy until completely dry. We recommend using a sheet of card
 stock or plastic to help protect the pages underneath from colors
 bleeding through as well as potential rub-through of pencil pigments
 while swatching. You can make **PERSONAL COPIES** of the charts

you plan to use onto your favorite paper or card stock if the paper in this book feels too thin for your needs, or, if you just want to put those pages of the charts you are using into a ring binder for safe keeping. You can also deconstruct this book for ease of use, so feel free to take it apart, keep the pages you are using in one binder, and store the rest in case you need them later. Many office supply stores (and FedEx service centers) will remove the spine and even spiral-bind or punch holes in the book for you for a small fee. If you choose to do it yourself, I have a step-by-step tutorial using another book (Creative Companion Book Binding DIY) on my blog at rubycharmcolors.com. Or keep it as is--the choice is yours! It is meant to be a book that grows along with you and your artistic needs! Happy color swatching!
