Doch dann dringt von Süden ein gefährlicher Feind in die friesische Heimat ein. [Organise or Die?](#) Raphaël Botiveau,2017-12-01 The story of one of the leading trade unions in South Africa, the National Union of Mineworkers, and its role in the struggle against white minority rule. Organise or Die? Democracy and Leadership in South Africa's National Union of Mineworkers (NUM) is the first in-depth study of one of the leading trade unions in the country. Founded in 1982, the trade union played a key role in the struggle against white minority rule, before turning into a central protagonist of the ruling Tripartite Alliance after apartheid. Deftly navigating through workerist, social movement and political terrains that shape the South African labour landscape, this book sheds light on the path that led to the unprecedented 2012 Marikana massacre, the dissolution of the Congress of South African Trade Unions (Cosatu) federation and to fractures within the African National Congress (ANC) itself. Working with the notions of organisational agency and strategic bureaucratisation, Raphaël Botiveau shows how the founding leadership of NUM built their union's structures with a view to mirror those of the multinational mining companies NUM faced. Good leadership proved key to the union's success in recruiting and uniting mineworkers and NUM became an impressive school for union and political cadres, producing a number of South Africa's top post-apartheid leaders. An incisive analysis of leadership styles and strategies shows how the fragile balance between an increasingly distant leadership and an increasingly militant membership gradually broke down. Botiveau provides a compelling narrative of NUM's powerful history and the legacy of its leadership. It will appeal to a broad readership - including journalists, students and social sciences scholars - interested in South Africa's contemporary politics and labour history.

A Grammar of the Greek Language George Curtius,2006-05-03 The Greeks are justly called an artistic people, and the Greek language is the most ancient work of art which they have reared upon a very primitive basis. The student, who approaches the Greek after he has already gone through a considerable preparation by the study of Latin, ought to be impressed with the idea that the structure of this language is one of the most marvelous productions of the intellectual powers acting unconsciously. . . . The attempt, therefore, to connect in a still higher degree the practice of the school with the spirit of science, can here point to numerous precedents; and it is, no doubt, mainly owing to this circumstance that it has met with so favorable a reception. My object has been to produce a consistent system, a careful selection, and a clear and precise exposition, rather than an entirely new system. --from the Preface
