**Visions and Concepts for Education 4.0** Michael E. Auer, Dan Centea, 2021-02-05 This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

Since its beginning in 2006, this conference is devoted to new approaches in interactive mobile technologies with a focus on learning. Nowadays, the IMCL conferences are a forum of the exchange of new research results and relevant trends as well as the exchange of experiences and examples of good practice. **Kurvendiskussion** Vasco Alexander Schmidt, 2023-01-16 Dieses ungewöhnliche Mathematik-Lexikon vermittelt kein Grundwissen, sondern stellt große, aber auch randständige Mathematik knapp und unterhaltsam vor. Grundlage bilden mathematische Themen und Personen, über die in den vergangenen 30 Jahren in Zeitungen berichtet wurde. Wie ein Wimmelbuch hält der Band geglückte und überraschende Popularisierungsversuche fest und lädt dazu ein, den Spuren der Mathematik im Internet, in Büchern und Zeitschriften zu folgen. Das Wörterbuch richtet sich an Mathematik-Interessierte, die Spaß an kurzen Schlaglichtern auf die Welt der Mathematik haben und nachvollziehen möchten, wie und in welcher Form die Mathematik in die Zeitungen kommt.
