Mobile Computing and Wireless Communications Amjad Umar, 2004 This book, suitable for IS/IT courses and self study, presents a comprehensive coverage of the technical as well as business/management aspects of mobile computing and wireless communications. Instead of one narrow topic, this classroom tested book covers the major building blocks (mobile applications, mobile computing platforms, wireless networks, architectures, security, and management) of mobile computing and wireless communications. Numerous real-life case studies and examples highlight the key points. The book starts with a discussion of m-business and m-government initiatives and examines mobile computing applications such as mobile messaging, m-commerce, M-CRM, M-portals, M-SCM, mobile agents, and sensor applications. The role of wireless Internet and Mobile IP is explained and the mobile computing platforms are analyzed with a discussion of wireless middleware, wireless gateways, mobile application servers, WAP, i-mode, J2ME, BREW, Mobile Internet Toolkit, and Mobile Web Services. The wireless networks are discussed at length with a review of wireless communication principles, wireless LANs with emphasis on 802.11 LANs, Bluetooth, wireless sensor networks, UWB (Ultra Wideband), cellular networks ranging from 1G to 5G, wireless local loops, FSO (Free Space Optics), satellites communications, and deep space networks. The book concludes with a review of the architectural, security, and management/support issues and their role in building, deploying and managing wireless systems in modern settings.

Increasing Customer Loyalty via Mobile Customer Relationship Management Silke

Freitag, 2002-08-01 Inhaltsangabe: Abstract: The main objective of this research was to find out and demonstrate how companies can manage to maintain and increase their customer's loyalty with the help of Customer Relationship Management in today's wireless world. Due to the growing convergence of the Internet and the mobile phone, competition between companies is considerably increasing. In order to further keep their stake in the market, companies are forced to improve the relations to their customers by using new business technologies enabling them to differentiate themselves from the competition in offering personalized services especially tailored to their customers' needs. This thesis will concentrate on the opportunities that Customer Relationship Management offers in the wireless world. Mobile applications and instruments that enable companies to create more loyalty among their customers will be pointed out while special focus is laid on SMS-Marketing. A few examples of companies who have been successfully applying wireless marketing will be given. Furthermore, part of this thesis was to carry out an online survey during which a number of people were interviewed about their experience with mobile services and their willingness to accept wireless marketing. The survey results provided a basis upon which the acceptance of possible marketing strategies, designed to increase customer loyalty, could be judged.

The Use of Smart Mobile Equipment for the Innovation in Organizational Coordination Namjae Cho, 2012-08-04 Recent increases in uncertainty and speed of market change are driving the adoption of new intelligent mobile office systems. Organizational information systems paradigm suggests that a right match between organizational characteristics and the use of technology is critical in producing desired results. Following such perspective this study focused on the relationship between task characteristics and the use of mobile office systems with an intention to find out factors that affect

the adoption of modern mobile office systems. The research results show that in performing tasks with high mobility users tend to use extensive mobile office functions. When the task has a high level of interdependency with external business partners, users relied on specialized mobile functions such as FFA, SFA and ERP. Highly volatile environment with many unexpected task changes caused an extensive use of task specific functions that help to solve problems at hand. Further, analyses of the differences of mobile office use by department showed that sales department used more communication functions than others, while administrative departments rely more on such task specific functions as mobile CRM and KM than others. Additional case study shows how the application of new technology the effectiveness of organizational coordination. Based on the research the concept of convergent coordination is suggested as well as the direction for future research.

Handbook of Research on Human Social Interaction in the Age of Mobile Devices Xu, Xiaoge, 2016-06-16 Digital innovations, such as mobile technologies, have had a significant impact on the way people relate to one another, as well as the way they obtain and distribute information. As mobile devices continue to evolve, it has become easier to socialize; however, these mobile advancements have also made certain aspects of interaction more complex. The Handbook of Research on Human Social Interaction in the Age of Mobile Devices features an interdisciplinary perspective on mobile innovations and the use of this technology in daily life. Investigating the successes, issues, and challenges of the utilization of mobile technology, this handbook of research is a comprehensive reference source for professionals, educators, policymakers, and students interested in the impact these devices have on digital interaction, media, and communication.

Social - Local - Mobile Gerrit Heinemann, Christian Gaiser, 2014-11-20 In the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the 'SoLoMo synergies' that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of kaufDA – a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.
