**Conversation and Storytelling in Fifteenth- and Sixteenth-century French Nouvelles** Kathleen Loysen,2004 This book focuses on the role of represented speech in four short story collections from fifteenth- and sixteenth-century France: the anonymous *Evangelies des quenouilles*; Martial d'Auvergne's *Arrêts d'Amour*; Marguerite de Navarre's *Heptaméron*; and Noël Du Fail's *Propos rustiques*. As a study of the narrative staging of the acts of storytelling and conversing, it raises issues of orality, aurality, and literacy, as well as of the processes of textual production, transmission, and reception. In addition, the conversational frame of these short story collections deliberately sets up questions about the accessibility and reliability of truth. While these collections claim to enter upon the path toward universal truth, the difficulty of such an enterprise is revealed through their very narrative structure, where the polyphony of opposing voices and divergent opinions is engaged by the very acts of conversation and storytelling themselves.

**Le Ràeglement des diffâerends sur les nouvelles ressources naturelles** Renâe Jean Dupuy,1983-11-14 Between 1988 & 1993 over fifty nations have either enacted new mining legislation, had such legislation pending adoption or were in the process of drafting new or revised legislation. In almost every case, this legislation carried with it changes in the fiscal regimes. The ability to attract mineral investment, be it in either a developed or a developing country, is partly dependent on the legislative & fiscal systems which regulate the industry. In the light of the changes taking place, this new reference work is timely & provides essential reading for those with an interest in mining taxation. The first part of the book analyses general topics which are applicable to understanding the taxation of mineral enterprises, while the second part provides a comprehensive & detailed account of actual taxation systems & methods.

**Les nouvelles régulations électriques 1 : monopole et concurrence** LAPEYRE Michel,2012-09-06 L'approvisionnement en électricité connaît en France de nombreuses et profondes transformations : le monopole de la fourniture est supprimé , le capital d'EDF est ouvert , les énergies renouvelables se développent , la lutte contre les émissions de gaz à effet de serre devient une priorité , la maîtrise de la demande d'énergie doit impérativement se développer , on peut donner aux réseaux publics des fonctions supplémentaires grâce aux techniques de l'information et de la communication. Les nouvelles régulations électriques ont pour objet les multiples organismes contribuant, à des degrés divers, à déterminer ou à influencer - autrement dit à réguler - le cadre dans lequel les entreprises électriques exercent aujourd'hui leurs activités. Cet ouvrage décrit chaque régulation et en analyse les effets. Le présent tome, à caractère économique et politique, porte sur les régulations destinées à la maîtrise des prix et à la progression de la qualité.

**Education Nouvelle Et Sciences de L'éducation** Bernard Schneuwly,2006 This book is about the tumultuous and even passionate relationship between New Education and Educational Sciences, which are regarded as an inseparable «couple», intrinsically linked and surprisingly fruitful. Yet they remain irreconcilable and are mutually contradictory in a number of their elements and characteristics. Do Educational Sciences offer a scientific base or ideological support for New Education? Do the numerous new educational initiatives and reforms provide a «laboratory» for Educational Sciences or alternatives to the new scientific paradigms? Is this at the risk of their merging? And what is the price of these tensions? Specialists in the history of Educational Sciences and New Education from various geographical, cultural and disciplinary horizons explore the complex links between this powerful reforming movement and the nascent disciplinary field that emerged during the first half of the 20th century. Cet ouvrage analyse les relations tumultueuses - passionnelles même - de l'Education nouvelle et des Sciences de l'éducation: un couple indissociable - intrinsèquement lié et d'une étonnante fécondité - autant qu'inconciliable, nombre de leurs présupposés et caractéristiques se contredisant mutuellement. Les Sciences de l'éducation offrent-elles la base scientifique ou l'appui idéologique de l'Education nouvelle ? Les nombreuses expériences et réformes éducatives constituent-elles des laboratoires des Sciences de l'éducation ou des alternatives aux nouveaux paradigmes scientifiques ? Au risque de leur fusion ? Au prix de quelles tensions ? Des spécialistes de l'histoire des Sciences de l'éducation et de l'Education nouvelle d'horizons géographiques, culturels et disciplinaires divers explorent les rapports complexes entre ce puissant mouvement réformiste et le champ disciplinaire naissant durant la première moitié du 20e siècle.
