Radio Service Bulletin ,1915

The Birth of Top 40 Radio Richard W. Fatherley,David T. MacFarland,2013-12-24 *Top 40* was the preeminent American radio format of the 1950s and 1960s. Although several radio station group owners offered their own versions of the format, the AM stations owned by Todd Storz and his father were acknowledged as the principal developers of *Top 40* radio, and the prime movers in making it a nationwide ratings and revenue success. The Storz Stations in St. Louis, Omaha, New Orleans, Minneapolis-St. Paul, Kansas City, Oklahoma City and Miami are profiled in this book, as are various Storz air personalities and executives. A detailed chapter examines the unique Storz Station sound, revealing the complexity of what detractors portrayed as a simplistic format. Another covers Storz advertising in radio trade magazines, which cemented the company's image as the format's most successful station group and *Top 40* as the dominant programming of the day. There are extensive quotations from the memoirs of several of the founders of the format.

The Radio Right Paul Matzko,2020 By the early 1960s, and for the first time in history, most Americans across the nation could tune their radio to a station that aired conservative programming from dawn to dusk. People listened to these shows in remarkable numbers; for example, the broadcaster with the largest listening audience, Carl McIntire, had a weekly audience of twenty million, or one in nine American households. For sake of comparison, that is a higher percentage of the country than would listen to conservative talk radio host Rush Limbaugh forty years later. As this *Radio Right* phenomenon grew, President John F. Kennedy responded with the most successful government censorship campaign of the last half century. Taking the advice of union leader Walter Reuther, the Kennedy administration used the Internal Revenue Service and the Federal Communications Commission to pressure stations into dropping conservative programs. This book reveals the growing power of the *Radio Right* through the eyes of its opponents using confidential reports, internal

correspondence, and Oval Office tape recordings. With the help of other liberal organizations, including the Democratic National Committee and the National Council of Churches, the censorship campaign muted the Radio Right. But by the late 1970s, technological innovations and regulatory changes fueled a resurgence in conservative broadcasting. A new generation of conservative broadcasters, from Pat Robertson to Ronald Reagan, harnessed the power of conservative mass media and transformed the political landscape of America--

Radio - The Forgotten Medium Edward C. Pease,Everette E. Dennis,2018-04-24 Although television is now dominant, radio surprisingly remains a medium of unparalleled power and importance. Worldwide, it continues to be the communications vehicle with the greatest outreach and impact. Every indicator - economic, demographic, social, and democratic - suggests that far from fading away, radio is returning to our consciousness, and back into the cultural mainstream.Marilyn J. Matelski reviews radio's glory days, arguing that the glory is not all in the past. B. Eric Rhoads continues Matelski's thoughts by explaining how and why radio has kept its vitality. The political history of radio is reviewed by Michael X. Delli Carpini, while David Bartlett shows how one of radio's prime functions has been to serve the public in time of disaster. Other contributors discuss radio as a cultural expression; the global airwaves; and the economic, regulatory, social, and technological structures of radio.Collectively, the contributors provide an intriguing study into the rich history of radio, and its impact on many areas of society. It provides a wealth of information for historians, sociologists, and communications and media scholars. Above all, it helps explain how media intersect, change focus, but still manage to survive and grow in a commercial environment.

Radio's Second Century John Allen Hendricks,2020-03-13 Winner of the 2022 Broadcast Education Association Book Award One of the first books to examine the status of broadcasting on its one hundredth anniversary, Radio's Second Century investigates both vanguard and perennial topics relevant to radio's past, present, and future. As the radio industry enters its second century of existence, it continues to be a dominant mass medium with almost total listenership saturation despite rapid technological advancements that provide alternatives for consumers. Lasting influences such as on-air personalities, audience behavior, fan relationships, and localism are analyzed as well as contemporary issues including social and digital media. Other essays examine the regulatory concerns that continue to exist for public radio, commercial radio, and community radio, and discuss the hindrances and challenges posed by government regulation with an emphasis on both American and international perspectives. Radio's impact on cultural hegemony through creative programming content in the areas of religion, ethnic inclusivity, and gender parity is also explored. Taken together, this volume compromises a meaningful insight into the broadcast industry's continuing power to inform and entertain listeners around the world via its oldest mass medium--radio.

Radio in the Television Age Pete Fornatale,Joshua E. Mills,1980-11-20 A history of modern radio shows why radio survived the advent of television, covers radio advertising, programming, technology, and news, and discusses radio pioneers, noncommercial radio, and government deregulation--Google Books.

Communities of the Air Susan Merrill Squier,2003-05-29 A pioneering analysis of radio as both a cultural and material production, Communities of the Air explores radio's powerful role in shaping Anglo-American culture and society since the early twentieth century. Scholars and radio writers, producers, and critics look at the many ways radio generates multiple communities over the air—from elite to popular, dominant to resistant, canonical to transgressive. The contributors approach radio not only in its own right, but also as a set of practices—both technological and social—illuminating broader issues such as race relations, gender politics, and the construction of regional and national identities. Drawing on the perspectives of literary and cultural studies, science studies and feminist theory, radio history, and the new field of radio studies, these essays consider the development of radio as technology: how it was modeled on the telephone, early conflicts between for-profit and public uses of radio, and amateur radio (HAMS), local programming, and low-power radio. Some pieces discuss how radio gives voice to different cultural groups, focusing on the BBC and poetry programming in the West Indies, black radio, the history of alternative radio since the 1970s, and science and contemporary arts programming. Others look at radio's influence on gender (and gender's influence on radio) through examinations of Queen Elizabeth's broadcasts, Gracie Allen's comedy, and programming geared toward women. Together the contributors demonstrate how attention to the variety of ways radio is used and understood reveals the dynamic emergence and transformation of communities within the larger society. Radio Goes to War Gerd Horten,2002-02-06 Radio Goes to War is the first comprehensive and in-depth look at the role of domestic radio in the United States during the Second World War. As this study convincingly demonstrates, radio broadcasting played a crucial role both in government propaganda and within the context of the broader cultural and political transformations of wartime America. Gerd Horten's absorbing narrative

argues that no medium merged entertainment, propaganda, and advertising more effectively than radio. As a result, America's wartime radio propaganda emphasized an increasingly corporate and privatized vision of America's future, with important repercussions for the war years and the postwar era. Examining radio news programs, government propaganda shows, advertising, soap operas, and comedy programs, Horten situates radio wartime propaganda in the key shift from a Depression-era resentment of big business to the consumer and corporate culture of the postwar period.

The Radio Producer's Handbook Rick Kaempfer, John Swanson, 2004-10-01 Two award-winning major market producers present the definitive how-to guide for producing a radio show, explaining every duty a radio producer is expected to perform. With refreshing honesty and the humorous flair of professional radio comedy writers, the authors reveal how to get one's professional foot in the radio door, book celebrity guests, craft great interviews, come up with ideas, create great phone segments, write and pitch material, and cope with the pressure that accompanies producing a show in progress.

Reality Radio John Biewen, Alexa Dilworth, 2010-03-15 Over the last few decades, the radio documentary has developed into a strikingly vibrant form of creative expression. Millions of listeners hear arresting, intimate storytelling from an ever-widening array of producers on programs including This American Life, StoryCorps, and Radio Lab; online through such sites as Transom, the Public Radio Exchange, Hearing Voices, and Soundprint; and through a growing collection of podcasts. Reality Radio celebrates today's best audio documentary work by bringing together some of the most influential and innovative practitioners from the United States, Canada, the United Kingdom, and Australia. In these nineteen essays, documentary artists tell--and demonstrate, through stories and transcripts--how they make radio the way they do, and why. Whether the contributors to the volume call themselves journalists, storytellers, even audio artists--and although their essays are just as diverse in content and approach--all use sound to tell true stories, artfully. The Old-time Radio Book Ted Sennett, 1976

Columbus Radio Mike Adams, 2016 Two professors and a preacher invented Columbus radio. It began with science experiments in classrooms and a minister's desire to expand beyond his churchgoing audience. By 1922, government licenses had been issued for WEAO at Ohio State University and WJD at Denison University. At this same time, a Baptist minister went on the air for an hour each Sunday morning using a 10-watt transmitter licensed as WMAN. In this story of Columbus radio, the work of the professors and the preacher will evolve into radio with advertiser-supported programs of information and entertainment. Three important radio stations will serve a growing Columbus radio audience in different ways: WEAO becomes WOSU, a national pioneer in using radio for teaching; WMAN becomes WCOL and in the 1960s is number one in audience size; and CBS affiliate WBNS becomes the class act of Columbus radio, retaining the major share of local listeners for many decades. Including many other stations of lesser influence, the illustrated stories of Columbus radio are told in this book.

Public Radio and Television in America Ralph Engelman, 1996-04-22 The origins and evolution of the major institutions in the United States for noncommercial radio and television are explored in this unique volume. Ralph Engelman examines the politics behind the development of National Public Radio, Radio Pacifica and the Public Broadcasting Service. He traces the changing social forces that converged to launch and shape these institutions from the Second World War to the present day. The book challenges several commonly held beliefs - including that the mass media is simply a manipulative tool - and concludes that public broadcasting has an enormous potential as an emancipatory vehicle.
