**Competition Law in the ASEAN Countries** Ploykaew Porananond,2018-06-22 Amongst other regional organisations, the Association of Southeast Asian Nations (ASEAN) stands out for the diversity of its ten Member States, stemming from their respective economic and political heritage, governance systems, legal institutions, stages of economic development, and exposure to or reliance on foreign trade and investments. As of 2017, however, the regional bloc has formalised its focus on economic integration and development of a regional competition law. Challenging this vision are the States' very different national competition law systems, ongoing problems with governmental intervention in the economy, and lack of effective and efficient corruption-free regulatory and juridical infrastructure. This book, the first detailed analysis of competition law in the ASEAN countries, looks at the prospects of implementation for the regional law and compares the existing systems in each Member State. Opening with a thorough description of the composition and organisation of the ASEAN, the analysis proceeds to an in-depth evaluation of such aspects as the following: - persistence of the ASEAN's traditional mode of dispute resolution, often referred to as the ASEAN Way; - economic challenges posed by intra-regional growth and globalisation; - the strong relationship between the business and government sectors; and - governmental interventions as cultural practices. There is detailed reference throughout to case law, legislation, institutional announcements, relevant treaties, and literature on both the ASEAN and competition law. As an

important critical analysis of this major new regional competition law regime, this book will be welcomed by competition law practitioners, multinational corporation counsel, and jurists, officials, and academics in a variety of legal fields. Although the subject is specifically the ASEAN, the analysis contributes to a better understanding of competition law regimes in developing economies and to the more general literature on global competition law.

**Leniency in Asian Competition Law** Steven Van Uytsel, Mark Fenwick, Yoshiteru Uemura, 2022-09-22 The first empirical analysis of leniency programmes implemented in Asian countries to enforce the anti-cartel provisions of their competition law.

**Direct Jurisdiction** Anselmo Reyes, Wilson Lui, 2021-08-26 The second thematic volume in the series *Studies in Private International Law - Asia* looks into direct jurisdiction, that is, the situations in which the courts of 15 key Asian states (Mainland China, Hong Kong, Taiwan, Japan, South Korea, Malaysia, Singapore, Thailand, Vietnam, Cambodia, Myanmar, the Philippines, Indonesia, Sri Lanka, and India) are prepared to hear a case involving cross-border elements. For instance, where parties are habitually resident abroad and a dispute has only some, little or no connection with an Asian state, will the courts of that state accept jurisdiction and hear the case and (if so) on what conditions? More specifically, the book's chapters explore the circumstances in which different Asian states assume or decline jurisdiction not just in commercial matters, but also in other types of action (such as family, consumer and employment disputes). The Introduction defines terminology and identifies similarities in the approaches to direct jurisdiction taken by the 15 Asian states in civil and commercial litigation. Taking its cue from this, the Conclusion assesses whether there should be a multilateral convention or soft law instrument articulating principles of direct jurisdiction for Asia. The Conclusion also discusses possible trajectories that Asian states may be taking in respect of

direct jurisdiction in light of the COVID-19 pandemic and the political tensions currently besetting the world. The book suggests that enacting suitable rules of direct jurisdiction requires an Asian state to strike a delicate balance between affording certainty and protecting its nationals. At heart, direct jurisdiction involves sometimes difficult policy considerations and is not just about drawing up lists of jurisdictional grounds and exceptions to them.

Parliaments in Time Michael Koß, 2019-01-29 Comparative Politics is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterized by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: [www.ecprnet.eu](http://www.ecprnet.eu) The series is edited by Emilie van Haute, Professor of Political Science, Université libre de Bruxelles; Ferdinand Müller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow, John and Rebecca Moores Professor of Political Science, University of Houston. How can we explain the evolution of legislatures in Western Europe? This book analyses ninety procedural reforms which restructured control over the plenary agenda and committee power in Britain, France, Sweden, and Germany between 1866 and 2015. Legislatures evolve towards one of two procedural ideal types: talking (where governments control the agenda) or working legislatures (with powerful committees). All else being equal, legislators' demand for mega-seats on legislative committees triggers the evolution of working legislatures. If, however, legislators fail to centralize agenda control in

response to anti-system obstruction, legislative procedures break down. Rather than a decline of legislatures, talking legislatures accordingly indicate the resilience of legislative democracy. In conclusion, the book shows the causal nexus between procedural reforms and (legislative) democracy.

**Multiphase Catalytic Reactors** Zeynep Ilse Önsan,Ahmet Kerim Avci,2016-06-09 Provides a holistic approach to multiphase catalytic reactors from their modeling and design to their applications in industrial manufacturing of chemicals Covers theoretical aspects and examples of fixed-bed, fluidized-bed, trickle-bed, slurry, monolith and microchannel reactors Includes chapters covering experimental techniques and practical guidelines for lab-scale testing of multiphase reactors Includes mathematical content focused on design equations and empirical relationships characterizing different multiphase reactor types together with an assortment of computational tools Involves detailed coverage of multiphase reactor applications such as Fischer-Tropsch synthesis, fuel processing for fuel cells, hydrotreating of oil fractions and biofuels processing

**Cross-Border Copyright Licensing** Carlo Scollo Lavizzari,René Viljoen,2018 Copyright Licensing can no longer be considered purely from the perspective of the licensor's home territory. This practical and wide-ranging reference work provides comprehensive coverage of the law and practice of cross-border licensing in a number of major territories, including China, the EU, India, Mexico, Russia, Singapore, South Africa, and the USA. The book, written by expert authors with insight from practice and from their home jurisdictions, focuses on both copyright licensing and competition law and, specifically, the inter-relation between these legal fields. The book is uniquely structured to provide both thematic coverage and detailed analysis of each territory's applicable laws and regulations, highlighting and addressing the legal issues that are most critical in and

relevant to licensing practice. Cross-Border Copyright Licensing is an essential starting point for anyone considering or advising on the implementation or enforcement of a copyright licensing program, in either developed and emerging markets.
