**Reminiscences of a Stock Operator** Edwin Lefèvre, 1923 There is nothing new in Wall Street. There can't be because speculation is as old as the hills. Whatever happens in the stock market today has happened before and will happen again. The desire for constant action irrespective of underlying conditions is responsible for many losses in Wall Street even among professionals. I never lose my temper over the stock market. I never argue the tape. Getting sore at the market doesn't get you anywhere. They say you can never go poor taking profits. No, you don't. But neither do you grow rich taking a four-point profit in a bull market. Where I should have made twenty thousand I made two thousand. That was what my conservatism did for me. Remember that stocks are never too high for you to begin buying or too low to begin selling. A man may see straight and clearly and yet become impatient or doubtful when the market takes its time about doing as he figured it must do. That is why so many men in Wall Street...nevertheless lose money. The market does not beat them. They beat themselves, because though they have brains they cannot sit tight. After spending many years in Wall Street and after making and losing millions of dollars I want to tell you this: It never was my thinking that made the big money for me. It always was the sitting. Got that? My sitting tight! Losing money is the least of my troubles. A loss never bothers me after I take it...But being wrong—not taking the loss—that is what does the damage to the pocketbook and to the soul. Prices, like everything else, move along the line of least resistance. They will do whatever comes easiest. The speculator's chief enemies are always boring from within. It is inseparable from human nature to hope and to fear. In speculation when the market goes against you hope that every day will be the last day—and you lose more than you should had you not listened to hope—the same ally that is so potent a success-bringer to empire builders and pioneers, big and little. And when the market goes your way you become fearful that the next day will take away your profit, and you get out—too soon. Fear keeps you from making as much money as you ought to. The successful trader has to fight these two deep-seated instincts...Instead of hoping he must fear; instead of fearing he must hope.

High Returns from Low Risk Pim van Vliet, Jan de Koning, 2016-11-21 Believing high-risk equals high-reward is holding your portfolio hostage High Returns from Low Risk proves that low-volatility, low-risk portfolios beat high-volatility portfolios hands down, and shows you how to take advantage of this paradox to dramatically improve your returns. Investors traditionally view low-risk stocks as safe but unprofitable, but this old canard is based on a flawed premise; it fails to see beyond the monthly horizon, and ignores compounding returns. This book updates the thinking and brings reality to modelling to show how low-risk stocks actually outperform high-risk stocks by an order of magnitude. Easy to read and easy to implement, the plan presented here will help you construct a portfolio that delivers higher returns per unit of risk, and explains how to achieve excellent investment results over the long term. Do you still believe that investors are rewarded for bearing risk, and that the higher the risk, the greater the reward? That old axiom is holding you back, and it is time to start seeing the whole picture. This book shows you, through deep historical simulation, how to reap the rewards of smarter investing. Learn how and why low-risk, low-volatility stocks beat the market Discover the formula that outperforms Greenblatt's Construct your own low-risk portfolio Select the right ETF or low-risk fund to manage your money Great returns and lower risk sound like a winning combination – what happens once everyone is doing it? The beauty of the low-risk strategy is that it continues to work even after the paradox is widely known; long-term investment success is possible for anyone who can shake off the entrenched wisdom and go low-risk. High Returns from Low Risk provides the proof, model and strategy to reign in your exposure while raking in the profit.

**Common Stocks and Common Sense** Edgar Wachenheim, III, 2016-04-25 Deep insight and candid discussion from one of Wall Street's best investors Common Stocks and Common Sense provides detailed insight into common stock investing, using a case-study approach based on real-world investments. Author Edgar Wachenheim is the 28-year CEO of Greenhaven Associates, boasting an average annual portfolio comparable to Warren Buffet's. The discussion covers the entire investment process, including the softer, human side, with candid insight into the joys and frustrations,

intensities and pressures, and risks and uncertainties. As a proponent of evidence and example, his analysis of real cases serve as a valuable education for anyone looking to improve their own investment practices. Understand investment through the lens of a Wall Street leader Dig into the details of real-world common stock investing Learn how to invest creatively and minimize risk Go beyond theory to study strategy on a case-by-case basis Investment principles and strategies are easy to find—entire libraries have been written about theories and methods and what 'should' happen. Investors seeking real insight, real expertise, and a proven track record will find Common Stocks and Common Sense a uniquely useful resource.
