Things Bill Brown, 2004 This book is an invitation to think about why children chew pencils; why we talk to our cars, our refrigerators, our computers; rosary beads and worry beads; Cuban cigars; why we no longer wear hats that we can tip to one another and why we don't seem to long to; what has been described as bourgeois longing. It is an invitation to think about the fetishism of daily life in different times and in different cultures. It is an invitation to rethink several topics of critical inquiry—camp, collage, primitivism, consumer culture, museum culture, the aesthetic object, still life, things as they are, Renaissance wonders, the thing itself—within the rubric of things, not in an effort to foreclose the question of what sort of things these seem to be, but rather to suggest new questions about how objects produce subjects, about the phenomenology of the material everyday, about the secret life of things. Based on an award-winning special issue of the journal *Critical Inquiry*, *Things* features eighteen thought-evoking essays by contributors including Bill Brown, Matthew L. Jones, Bruno Latour, W. J. T. Mitchell, Jessica Riskin, Jeffrey T. Schnapp, Peter Schwenger, Charity Scribner, and Alan Trachtenberg.

Moments later, terrified and fleeing home to safety across the Brooklyn Bridge, he stumbles across a girl perched in the shadows, covered in ash, and wearing a pair of costume wings. With his mother and sister in California and unable to reach his father, a NYC detective likely on his way to the disaster, Kyle makes the split-second decision to bring the girl home. What follows is their story, told in alternating points of view, as Kyle tries to unravel the mystery of the girl so he can return her to her family. But what if the girl has forgotten everything, even her own name? And what if the more Kyle gets to know her, the less he wants her to go home? *The Memory of Things* tells a stunning story of friendship and first love and of carrying on with our day-to-day living in the midst of world-changing tragedy and unforgettable pain—it tells a story of hope.

The Nature of Things Anthony M. Quinton, 2019-03-07 Originally published in 1973. In this systematic treatise, Anthony Quinton examines the concept of substance, a philosophical refinement of the everyday notion of a thing. Four distinct, but not unconnected, problems about substance are identified: what accounts for the individuality of a thing; what confers identity on a thing; what is the relation between a thing and its appearances; and what kind of thing is fundamental, in the sense that its existence is logically independent of that of any other kind of thing? In Part 1, the first

two problems are discussed, while in Part 2, the third and fourth are considered. Part 3 examines four kinds of thing that have been commonly held to be in some way non-material: abstract entities; the un-observable entities of scientific theory; minds and their states; and, finally, values. The author argues that theoretical entities and mental states are, in fact, material. He gives a linguistic account of universals and necessary truths and advances a naturalistic theory of value.

Good Things to Do Rüdiger Bittner,2023 The book is to show that the aim of thinking about what to do, of practical reason, is to find, not what we ought to do, but what is a good thing to do for us under the circumstances. So it argues, first, that neither under prudence nor under morality there are things we ought to do. There is no warrant for the idea of our being required, by natural law perhaps or by our rationality, to do either what helps us attain our ends or what is right for moral reasons. While common moral understanding is committed to there being things we ought to do and to our being guilty and deserving blame if we fail to do them, we can lay aside these notions without loss, indeed with benefit. Second, it explains what it is for something to be good for somebody to do under the circumstances and argues for understanding practical reason in these terms. What is good for somebody to do we find by experience: from what we go through we learn what helps and what hinders and figure out on this basis both what is prudentially useful and what is morally right to do - although in the end this difference itself gives way, and morality turns out to be a part of prudence--

Now Concerning Spiritual Things Fitzroy John Willis,2019-11-13 In a pluralistic world of competing truth claims, how can one discern what is

truly representative of God? How can we live and communicate what is authentically spiritual? How do we bridge the religious impasse between believers and a post-Christendom and pluralistic context where individuals may consider themselves to be spiritual, yet are offended by the person of Jesus? Can relativism be an effective means of evaluating truth from falsehood? What role should race, gender, and socioeconomic background play in society and the church? These are just a few of the questions this study addresses in presenting a more balanced, dialogical, and biblical criterion for authentic spirituality. The insights on how to discern, live, and communicate what is authentically spiritual are significant for interreligious and ecumenical dialogue across denominations. These insights contribute a way to more effectively communicate divine truths to all, for it is conversant with various sources of knowledge about God and is accountable to feedback from these sources of truth. For example, tacit knowledge such as that derived from faith, and spiritual gifts, as well as rational, or philosophical claims to truth, along with Western, Eastern, and Southern modes of thinking, are all incorporated.

The Internet of Things for Smart Urban Ecosystems Franco Cicirelli,Antonio Guerrieri,Carlo Mastroianni,Giandomenico Spezzano,Andrea Vinci,2018-08-10 The main objective of this book is to provide a multidisciplinary overview of methodological approaches, architectures, platforms, and algorithms for the realization of an Internet of Things (IoT)-based Smart Urban Ecosystem (SUE). Moreover, the book details a set of real-world applications and case studies related to specific smart infrastructures and smart cities, including structural health monitoring, smart urban drainage networks, smart grids, power efficiency, healthcare, city security, and emergency management. A Smart Urban Ecosystem (SUE) is a people-centric system of systems that involves smart city environments, applications, and infrastructures. SUEs require the close integration of cyber and physical components for monitoring, understanding and controlling the urban environment. In this context, the Internet of Things (IoT) offers a valuable enabling technology, as it bridges the gap between physical things and software components, and empowers cooperation between distributed, pervasive, and heterogeneous entities.

All Things to All People: Confessions of a Rebellious Preacher's Son Begees McFree,2019-08-16 All Things to All People is an introverted narrative penned by the son of a Gospel preacher and his alter ego, Begees McFree. This playfully written autobiography of a simple, quiet, and

peaceable man guides the reader through depression-induced insomniac confessions. Looking deep into the often-hidden places of the heart and mind, these confessions freed the writer from lies and misunderstandings that had been buried deep within. A Sense of Things Bill Brown,2010-12-28 In May 1906, the Atlantic Monthly commented that Americans live not merely in an age of things, but under the tyranny of them, and that in our relentless effort to sell, purchase, and accumulate things, we do not possess them as much as they possess us. For Bill Brown, the tale of that possession is something stranger than the history of a culture of consumption. It is the story of Americans using things to think about themselves. Brown's captivating new study explores the roots of modern America's fascination with things and the problem that objects posed for American literature at the turn of the century. This was an era when the invention, production, distribution, and consumption of things suddenly came to define a national culture. Brown shows how crucial novels of the time made things not a solution to problems, but problems in their own right. Writers such as Mark Twain, Frank Norris, Sarah Orne Jewett, and Henry James ask why and how we use objects to make meaning, to make or remake ourselves, to organize our anxieties and affections, to sublimate our fears, and to shape our wildest dreams. Offering a remarkably new way to think about materialism, A Sense of Things will be essential reading for anyone interested in American literature and culture.
