Geometric Tile Patterns Jay Friedenberg,

Latin Tiles Gladding, McBean and Company,1919 Consists chiefly of photographs of California buildings with tile roofs.

The Mosaic Tile Company Larisa Harper,2022-03-25 Founded in 1894, the Mosaic Tile Company was the dream of two ceramic pioneers who intended to manufacture innovative ceramic mosaic murals while also dominating the utilitarian market. One of the largest such companies in the United States at the time, MTC's most significant contribution to the burgeoning Ohio pottery industry was the development of innovative and varied proprietary tile production and installation methods. Compared to its emphasis on mosaic murals, MTC's utilitarian and giftware goods were produced in limited quantities and were not well received at the time, making them rarer today. This book chronicles the history of ceramic creativity in Zanesville, Ohio, from its earliest days as a bustling town before the Great Depression through its recovery in the 1960s. It examines the Mosaic Tile Company's whole history, the bygone details of this long-lost business, its products and its employees, and incorporates images and postcards illustrating its products in each chapter.

Setting Tile Michael Byrne,1995 Shows how to set tile in one's home, covering ceramic and natural stone tile; layout; application techniques; floor, wall, countertop, and special installations; and other related topics.

Making & Installing Handmade Tiles Angelica Pozo,2008 Contains creative techniques for a number of ceramic tile projects with detailed information and instruction on basic tools and materials, glaze application, and techniques for making slab tiles.

5000 Years of Tiles Hans Van Lemmen,2013-10-22 A comprehensive, full-color exploration of tile art and production worldwide, from earliest times to the present day. The book is both an authoritative work of reference and a visual delight, ranging from ancient Greece, where the first fired roof tiles date from as early as the third millennium BC, to twentieth-century Mexico. Along the way we encounter stunning examples of the tiler's art: the enormous English medieval floor pavements from Byland Abbey and Clarendon Palace; figural tiles from China, intended to adorn roofs and ward off evil; the famous Iznik tiles from the Islamic world, with their richly decorative patterns; the highly stylised ceramic tiles of the Arts and Crafts movement; and the tiles created by some of the finest ceramic artists and potters of the twenty-first century. Placing the tiles firmly in their historical and cultural context, the book highlights both continuity and diversity, the dissemination of techniques and designs, and how tile art in one time and place has inspired and rejuvenated those in others. Tiles are also studied in terms of function as well as form, and the full range of architectural and practical purposes for which they have been used - from floors to roofs, stoves to bathrooms, cathedrals to metro stations - will be explored, along with the various techniques employed to create such versatile pieces. *5000 Years of Tiles* is the essential, most comprehensive single volume for anyone interested in the ceramic, decorative, and architectural arts.
