Textual and Contextual Voices of Translation Cecilia Alvstad, Annjo K. Greenall, Hanne Jansen, Kristiina Taivalkoski-Shilov, 2017-10-15 The notion of voice has been used in a number of ways within Translation Studies. Against the backdrop of these different uses, this book looks at the voices of translators, authors, publishers, editors and readers both in the translations themselves and in the texts that surround these translations. The various authors go on a hunt for translational agents' voice imprints in a variety of textual and contextual material, such as literary and non-literary translations, book reviews, newspaper articles, academic texts and e-mails. While all stick to the principle of studying text and context together, the different contributions also demonstrate how specific textual and contextual circumstances require adapted methodological solutions, ending up in a collection that takes steps in a joint direction but that is at the same time complex and pluralistic. The book is intended for scholars and students of Translation Studies, Comparative Literature, and other disciplines within Language and Literature.

Voice-over Translation Eliana Franco, Anna Matamala, Pilar Orero, 2010 This book presents the first study of voice-over from a wide approach, including not only academic issues but also a description of the practice of voice-over around the globe. The authors define the concept of voice-over in Film Studies and Translation Studies and clarify the relationship between voice-over and other audiovisual transfer modes. They also describe the translation process in voice-over both for production and postproduction, for fiction and non-fiction. The book also features course models on voice-over which can be used as a source of inspiration by trainers willing to include this transfer mode in their courses. A global survey on voice-over in which both practitioners and academics express their opinions and a commented bibliography on voice-over complete this study. Each chapter includes exercises which both lecturers and students can find useful.

Speech-to-Speech Translation Yutaka Kidawara, Eiichiro Sumita, Hisashi Kawai, 2019-11-22 This book provides the readers with retrospective and prospective views with detailed explanations of component technologies, speech recognition, language translation and speech synthesis. Speech-to-speech translation system (S2S) enables to break language barriers, i.e., communicate each other between any pair of person on the globe, which is one of extreme dreams of humankind. People, society, and economy connected by S2S will demonstrate explosive growth without exception. In 1986, Japan initiated basic research of S2S, then the idea spread world-wide and were explored deeply by researchers during three decades. Now, we see S2S application on smartphone/tablet around the world. Computational resources such as processors, memories, wireless communication accelerate this computation-intensive systems and accumulation of digital data of speech and language encourage recent approaches based on machine learning. Through field experiments after long research in laboratories, S2S systems are being well-developed and now ready to utilized in daily life. Unique chapter of this book is end-2-end evaluation by comparing system's performance and human competence. The effectiveness of the system would be understood by the score of this evaluation. The book will end with one of the next focus of S2S will be technology of simultaneous interpretation for lecture, broadcast news and so on.

The Didactics of Audiovisual Translation Jorge Díaz-Cintas, 2008-08-14 While complementing other volumes in the BTL series in its exploration of the state of the art of translator training, this collection of essays is solely focused on audiovisual translation, one of the most complex and dynamic areas of the translation discipline. The book offers an easily accessible yet comprehensive introduction to the fascinating subject of translating films, video games and other audiovisual material. Offering a balance between theory and practice, the main aim of this volume is to provide a wealth of teaching and learning ideas in areas such as subtitling, dubbing, and voice-over without forgetting the newer fields of subtitling for the deaf and audio description for the blind. The *Didactics of Audiovisual Translation* offers exercises and more on a companion website, highlighting its fundamentally interactive approach, and the activities proposed can be adapted to different learning environments and used with different language combinations:

Multiple Voices in the Translation Classroom Maria González Davies, 2004-01-01 The main aim of this book is to provide teaching ideas that can be adapted to different learning environments and that can be used with different language combinations. The pedagogical approach and the activities, tasks and projects are based on Communicative, Humanistic and Socioconstructivist principles: the students are actively involved in their learning process by making decisions and interacting with each other in a classroom setting that is a discussion forum and hands-on workshop. Clear aims are specified for the activities, which move from the most rudimentary level of the word, to the more complicated issues of syntax and, finally, to those of cultural difference. Moreover, they attempt to synthesize various translation theories, not only those based on linguistics, but those derived from cultural studies as well. This volume will be of interest to translation teachers, to foreign language teachers who wish to include translation in their classes, to graduates and professional translators interested in becoming teachers, and also to administrators exploring the possibility of starting a new translation programme.

Dialect, Voice, and Identity in Chinese Translation Jing Yu, 2023-07-12 *Dialect, Voice, and Identity in Chinese Translation* is the first book-length attempt to undertake a descriptive investigation of how dialect in British and American novels and dramas is translated into Chinese. Dialect plays an essential role in creating a voice of difference for the regional, social, or ethnic Others in English fiction. Translating dialect involves not only the textual representation of a different voice with target linguistic resources but also the reconstruction of various cultural, social, and ethnic identities and relations on the target side. This book provides a descriptive study of 277 Chinese translations published from 1931 to 2020 for three fictions – *The Adventures of Huckleberry Finn*, *Tess of the d'Urbervilles*, and *Pygmalion* – with a special focus on how the Dorset dialect, African American Vernacular English, and cockney in them have been translated in the past century in China. It provides a comprehensive description of the techniques, strategies, tendencies, norms, and universals as well as diachronic changes and stylistic evolutions of the language used in dialect translation into Chinese. An interdisciplinary perspective is adopted to conduct three case studies of each fiction to explore the negotiation, reformulation, and reconstruction via dialect translation of the identities for Others and Us and their relations in the Chinese context. This book is intended to act as a useful reference for scholars, teachers, translators, and graduate students from disciplines such as translation, sociolinguistics, literary and cultural studies, and anyone who shows interest in

dialect translation, the translation of American and British literature, Chinese language and literature, identity studies, and cross-cultural studies.

The Prosody of Dubbed Speech Sofía Sánchez-Mompeán, 2019-12-17 This book offers a descriptive and practical analysis of prosody in dubbed speech, examining the most distinctive traits that typify dubbed dialogue at the prosodic level. The author's unique perspective - as both a translation studies researcher and a voice-over professional - helps to bring these two aspects of the dubbing process together into a coherent study for the first time. Supported by corpus analysis of English and Spanish episodes of US TV show *How I Met Your Mother*, she examines aspects of prosody in source and target languages, including features such as intonation, loudness, tempo, rhythm and tension. This book will be of interest to students and scholars of translation and interpreting, media studies, television and film production, as well as dubbing professionals.

Automatic Speech Translation Akira Kurematsu, 1996-05-28 Automatic Speech Translation introduces recent results of Japanese research and development in speech translation and speech recognition. This book presents the complicated technological aspects of machine translation and speech recognition, and outlines the future directions of this rapidly developing area of technology.

Audiovisual translation in the foreign language classroom: applications in the teaching of English and other foreign languages Jennifer Lertola, 2019-02-28 The aim of this book is to systematically review studies on the applications of captioning (subtitling) and revoicing (dubbing, audio description, and voice-over) in the foreign language classroom, in order to offer an overview of the state of the art and encourage further research. The literature review presents research on the topic, paying particular attention to relevant experimental studies (i.e. empirical research that involves data collection, and not just a mere description of the experience or the learners' outcomes), examined in terms of research focus, target languages, participants, learning settings, audiovisual materials, captioning/revoicing software, and type of analysis (i.e. qualitative and/or quantitative).

Celebrity Translation in British Theatre Robert Stock, 2020-07-23 This book explores the impact that high-profile and well-known translators have on audience reception of translated theatre. Using Relevance Theory as a framework, the book demonstrates how prior knowledge of a celebrity translator's contextual background can affect the spectator's cognitive state and influence their interpretation of the play. Three canonical plays adapted for the British stage are analysed: Mark Ravenhill's translation of *Life of Galileo* by Bertolt Brecht, Roger McGough's translation of *Tartuffe* by Molière and Simon Stephens' translation of *A Doll's House* by Henrik Ibsen. Drawing on interviews, audience feedback, reviews, blogs and social media posts, Stock examines the extent to which audiences infer the celebrity translator's own voice from their translations. In doing so, he adds new perspectives to the long-standing debate on the visibility of the translator in both the process of translating and the reception of the translation. *Celebrity Translation in British Theatre* offers an original approach to theatre translation that sheds light on the culture of celebrity and its capacity to attract new audiences to plays in translation.

Voice and Versification in Translating Poems James W. Underhill, 2016-12-09 Great poets like Shelley and Goethe have made the claim that translating poems is impossible. And yet, poems are translated; not only that, but the metrical systems of English, French, Italian, German, Russian and Czech have been shaped by the translation of poems. Our poetic traditions are inspired by translations of Homer, Dante, Goethe and Baudelaire. How can we explain this paradox? James W. Underhill responds by offering an informed account of meter, rhythm, rhyme, and versification. But more than that, the author stresses that what is important in the poem—and what must be preserved in the translated poem—is the voice that emerges in the versification. Underhill's book draws on the author's translation experience from French, Czech and German. His comparative analysis of the versifications of French and English have enabled him to revise the key terms involved in translating the poetic voice and transposing the poem's versification. The theories of versification from the Prague School of Linguistics, the French and Swiss schools of versification, and recent scholarship in metrics and rhythm in the UK and in the USA have been integrated into this synthetic but

rigorously coherent approach to translating poems. The extensive glossary at the end of the book will prove useful for both students and teachers alike. And the detailed case studies on translating poems by Baudelaire and Emily Dickinson allow the author to categorize and appraise the various poetic and aesthetic strategies and theories that are brought to bear in translating Baudelaire into English, and Dickinson into French.

The Voices of Suspense and Their Translation in Thrillers Susanne M. Cadera, Anita Pavic Pintaric, 2014-03-05 The volume aims to be a reference work for all researchers interested in the study of fictional dialogue and its translation in suspense novels and films as well as in related genres. The volume also aims to determine the interplay between the creation of suspense and fictional dialogue. The particular interest in dialogue comes from the host of roles it plays in fiction. It helps create suspense and arouses a whole range of feelings in the reader or the audience related to the development of the plot. Fictional dialogue is the discursive method of evoking orality, conferring authenticity and credibility on a plot and giving fictional characters a voice. As a narrative strategy, dialogue is an important resource that enables the writer to shape the character's subjectivity. In thrillers the characters' voice is part of the process of creating suspense, an element of uncertainty, anxiety and excitement, which is not exclusive to this genre. To clearly differentiate suspense from the tension created by other types of fiction, this volume aims to study the relationship between the characters' voices and the building of suspense and to describe the translation difficulties arising from this particular interdependence.

Translating Audio Description Scripts Anna Jankowska, 2015 Translating audio description (AD) scripts from foreign into source language seems to be a tempting alternative strategy of creating AD scripts in those countries where AD is still scarce. The obtained results prove that translation of AD scripts is not only possible, but also beneficial when it comes to time consumption, costs and quality of AD.

A Voyage Round the World, 2 vols. George Forster, 2000-01-01 George Forster's *A Voyage Round the World* presents a wealth of geographic, scientific, and ethnographic knowledge uncovered by Cook's second journey of exploration in the Pacific (1772-1775). Accompanying his father, the ship's naturalist Johann Reinhold Forster, on the voyage, George proved a knowledgeable and adept observer. The lively, elegant prose and critical detail of his account, based loosely on his father's journal, make it one of the finest works of eighteenth-century travel literature and an account of prime importance in the history of European contact with Pacific peoples. The Forsters' publications reveal the sophistication and enthusiasm they brought to their observation of Polynesian peoples as well as a sensitivity to the moral ambiguities of contact. The two volumes of George Forster's work include substantially richer descriptions of encounters with island inhabitants than either his father's classic work (*Observations Made during a Voyage round the World*, UH Press, 1996) or Cook's official narrative, and its confident, even visionary, style incorporates a good deal of polemic, particularly in its criticism of the treatment of islanders by Cook's crew. In addition to the range and depth of its anthropological considerations, it provides a thrilling account of life aboard one of Cook's vessels. In its author's German translation, this work becomes a classic of natural history writing, but its original English version has long been neglected by anglophone scholars. This new scholarly edition makes this important book readily available for the first time since its initial publication more than two centuries ago. But it also presents the work in fresh terms, making it more accessible and relevant to a contemporary audience. The valuable introduction and annotations draw on the wide range of anthropological and ethnohistorical scholarship published since the 1960s and contextualize the book in relation to both the cultures of Oceania documented by the Forsters and the history of European voyaging in the Pacific. Appendixes include a translation of the introduction to the German edition and the polemical pamphlets by George Forster and the ship's astronomer William Wales, in which some of the book's more controversial claims were debated. *A Voyage Round the World* brings the disciplines of history and anthropology to bear on Cook's voyages in an illuminating and readable fashion. This edition will help complete the corpus of basic documents on Cook's voyages--a crucial resource for researchers in cultural, Pacific, and

maritime history; archaeologists, anthropologists, and art historians; and most recently for scholars engaged in revisionist interpretations of eighteenth-century exploration and colonization.
