Taking Wing Nancy Price Graff,2005 Gus never imagined himself a parent at thirteen. But in the war-fraught summer of 1942, while living on his grandparents' Vermont farm, he adopts a clutch of orphaned duck eggs. Gus can relate to the foundlings, as he is apart from, and yearns for, his own family. One day Gus finds a young stranger standing over the incubating eggs. Gus doesn't know what to make of her, with her tattered clothing and strange accent, but soon the girl is helping to care for the newly hatched ducklings, and she and Gus become fast friends. Not everyone shares Gus's high opinion of Louise, whose poverty-stricken French-Canadian family is shunned by the townspeople. His attempt to help his friend and her family has some embarrassing consequences and he must make retribution if he is to keep Louise's friendship. Nancy Price Graff's fluid narrative and exceptional eye for detail follow Gus during a time of food rationing, Victory gardens, watching for enemy planes--and keeping his ducks from harm.

On the Wing David Elliott,2021-01-26 David Elliott's witty verse takes flight with gorgeous illustrations in an enchanting look at fifteen avian species for birders of all ages. Take to the sky to explore a glorious array of all things avian, from the tiny, restless hummingbird to the inscrutable horned owl to the majestic bald eagle. David Elliott and Becca Stadtlander bestow a sense of wonder onto such common birdfeeder visitors as the sparrow, the crow, and the cardinal and capture the exotic beauty of far-flung fowl like the Andean condor, the Australian pelican, and the Caribbean flamingo. Concise, clever verse from an award-winning author pairs with striking artwork from a debut illustrator to make this a true pleasure for anyone who loves birds.

A World on the Wing: The Global Odyssey of Migratory Birds Scott Weidensaul,2021-03-30 New York Times Bestseller Finalist for the Los Angeles Times Book Prize A Library Journal Best Science and Technology Book of the Year An exhilarating exploration of the science and wonder of global bird migration. In the past two decades, our understanding of the navigational and physiological feats that enable birds to cross immense oceans, fly above the highest mountains, or remain in unbroken flight for months at a stretch has exploded. What we've learned of these key migrations—how billions of birds circumnavigate the globe, flying tens of thousands of miles between hemispheres on an annual basis—is nothing short of extraordinary. Bird migration entails almost unfathomable endurance, like a sparrow-sized sandpiper that will fly nonstop from Canada to Venezuela—the equivalent of running 126 consecutive marathons without food, water, or rest—avoiding dehydration by drinking moisture from its own muscles and organs, while orienting itself using the earth's magnetic field through a form of quantum entanglement that made Einstein queasy. Crossing the Pacific Ocean in nine days of nonstop flight, as some birds do, leaves little time for sleep, but migrants can put half their brains to sleep for a few seconds at a time, alternating sides—and their reaction time actually improves. These and other revelations convey both the wonder of bird migration and its global sweep, from the mudflats of the Yellow Sea in China to the remote mountains of northeastern India to the dusty hills of southern Cyprus. This breathtaking work of nature writing from Pulitzer Prize finalist Scott Weidensaul also introduces readers to those scientists, researchers, and bird lovers trying to preserve global migratory patterns in the face of climate change and other environmental challenges. Drawing on his own extensive fieldwork, in *A World on the Wing* Weidensaul unveils with dazzling prose the miracle of nature taking place over our heads.

The Wing and Wing (Illustrated) James Fenimore Cooper,2014-04-30 In 1806, at the age of seventeen, Cooper joined the crew of the merchant ship Sterling as a common sailor. At the time, the Sterling was commanded by the young John Johnston from Maine where Cooper served as a common seaman before the mast. His first voyage, taking some forty stormy days at sea, brought him to an English market in Cowes with a cargo of flour. There Cooper saw his first glimpses of England. After passing through the Strait of Dover and arriving at Cowes, the Sterling dropped anchor. Because Britain was in the midst of war with Napoleon's France at the time, their ship was immediately approached by a British man-of-war and was boarded by some of its crew. They seized one of the Sterling's best crew members and impressed him into the British Royal Navy.

Fly the Wing Jim Webb,Billy Walker,2015-02 This special printing of the Third Edition comes with a download code for the software (previously in CD format), which gives the reader further tools for study and research. This material can be downloaded from the ASA website (using the code printed in the book). Updated to include coverage of modern cockpit automation, *Fly the Wing* (Third Edition) provides pilots with valuable tools and proven techniques for all flight operations. Also new to this edition is a companion CD-ROM with a complete glossary of flight terms, printable quick reference handbooks, and numerous supporting graphics. Pilots planning a career in aviation will find that this book provides important insights that other books miss. Written in an easy, conversational style, this useful reference progresses from ground school equipment and procedures, to simulators, to real flight. Along the way, the authors cover the physical, psychological and technical preparation needed by pilots to acquire an ATP certificate while maintaining the highest standards of performance. Although not intended to replace training manuals, *Fly the Wing* is by itself a course in advanced aviation. With clear explanations and in-depth coverage, it has been described as a full step beyond the normal training handbook. Pilots desiring additional knowledge in the fields of modern flight deck automation, high-speed aerodynamics, high-altitude flying, speed control, take-offs, and landings in heavy, high performance aircraft will do well to read and retain this material.

Broken Wing David Budbill, 2019-03-26 This posthumous novel from acclaimed author David Budbill tells the story of The Man Who Lives Alone in the Mountains. As winter descends on his idyllic home, the man encounters a bird with a broken wing, sending him into a poetic and profound meditation on solitude, friendship, and the unstoppable march of time. In the deep woods of Vermont, The Man Who Lives Alone in the Mountains exists in solitude and simplicity. His days are spent caring for his garden and observing the birds and creatures that visit his home. His nights are spent in a contemplative world of music, poetry, letter writing, and, most importantly, bird watching. As November arrives and The Man prepares for winter, he notices an injured bird, shiny and black, holding his own among bullying blue jays. He is drawn to the bird's spirit of survival and freedom and names it Broken Wing. Since his only neighbors are a couple of hostile brothers and their bird-hunting cat, Broken Wing becomes a source of inspiration—and a friend. As fall changes to winter and back to spring, The Man's dreams of Broken Wing give way to meditations on the peaks and valleys of life, the passage of time, and the poetry of nature.

The Development and Evolution of Butterfly Wing Patterns H. Frederik Nijhout, 1991-08-17 Integrating the results of comparative morphology, experiments on pattern development, the genetics of color patterns, and theoretical modeling of pattern formation, Nijhout shows that the enormous diversity of natural patterns arises largely from quantitative variations in a small set of readily understandable generating rules.
