Psychosocial and Legal Perspectives of Marital Breakdown Margit Gaffal,2010-10-23 Divorce has long been viewed as a single phenomenon affecting two individuals without considering the framework conditions in which it occurs. Due to the increase of divorce rates in the past decades researchers have changed their perspective and have concentrated on the view of divorce as a personal experience that is greatly affected by the social and economic environment. The aim of this thesis is to investigate divorce that has become a mass phenomenon in our present society. The assumption is that in order to understand the grounds for divorce and its consequences, we have to view divorce as a phenomenon that occurs at the intersection of personal, socio-economic and legal factors. Family disputes involve persons who have interdependent and continued relationships and arise in a context of distressing emotions. Separation and divorce affect all the members of the family, especially children. The study presents a comprehensive analysis of divorce as a psychological process that is situated within a social and a legal context. It presents a comprehensive view of divorce as a psychosocial, economic and legal phenomenon and contains a review of the research literature about divorce and its consequences for parents and children. Moreover, it describes divorce by proposing conceptual frames and explanatory models.

Internet Jurisdiction Law and Practice Julia Hörnle,2021-01-07 Jurisdiction is a fundamental concept in law, as it provides the link between a government, its territory, and its people. Data travels through the internet without concern for any borders. This book argues how and why the concept of jurisdiction needs to be adapted across public and private areas - from criminal to commercial law.

Magic, Reason, and Experience Geoffrey Ernest Richard Lloyd,1999-01-01 This study of the origins and progress of Greek science focuses especially on the interaction between scientific and traditional patterns of thought from the sixth to the fourth century BC. It begins with an examination of how particular Greek authors deployed the category of magic, sometimes attacking its beliefs and practices; these attacks are then related to their background in Greek medicine and philosophical thought. In his second chapter Lloyd outlines developments in the theory and practice of argument in Greek science and assesses their significance. He next discusses the progress of empirical research as a scientific tool from the Presocratics to Aristotle. Finally, he considers why the Greeks invented science, their contribution to its history, and the social, economic, ideological and political factors that had a bearing on its growth.

Posting of Workers in EU Law Matteo Bottero,2020-12-11 Bulletin of Comparative Labour Relations Volume 108 The progressive expansion of the phenomenon of posting of workers – the practice whereby a worker is sent for a limited period of time to another Member State in order to provide a service – is a formidable bone of contention in the conflict between a fully integrated internal market economy and Member States’ aims to protect domestic social standards. This book challenges the recently adopted Directive (EU) 957/2018, which came into effect in July 2020, by examining the relevant EU regulatory framework and investigating the actual quantitative dimension of the posting phenomenon and its real impact on the EU labour market. In the process, the author exposes a serious misalignment of the legal framework provided for by the new Directive with the EU values and principles of equality, solidarity and fair competition. Drawing on a wide variety of sources – including Court of Justice case law, Advocate Generals’ opinions, Eurostat data, Commission documents and reports, and academic literature – the author provides in-depth analyses of such elements of the problem as the following: proper definition of the concepts of ‘posting’ and ‘posted worker’ in EU law; host country’s discretion in relation to the part of domestic regulation it can impose on posted employees; misconceived clash between social rights and economic freedoms; coordination of national social security systems; proliferation of unlawful and fraudulent practices; ‘regime shopping’ and exploitation of existing regulatory loopholes; misleading association of posting with issues of ‘social dumping’ and ‘unfair competition’; orientation of political influence during the drafting process of relevant EU legislation; expected controversial economic impact of Directive (EU) 957/2018; concrete realisation of the EU values and principles of equality, solidarity and fair competition; and definition and pursuit of a ‘European social model’. Normative arguments developed in the course of the analysis put forward viable recommendations for future improvements in the field. The Union’s commitment to the development of a ‘European social model’ cannot avoid taking into account the matters of equality, solidarity and fair competition. In this sense, given the increasing prominence of the free movement of services in shaping a European labour market characterised by an ever-growing degree of mobility, this book’s analysis of the phenomenon of posting of workers may serve as a litmus test of political and legislative action at EU level. In its dual analytic and normative aspect, the book takes a giant step towards future discussions and developments in the area of intra-EU labour mobility. It will be welcomed by legal practitioners in labour and social security law and industrial relations, legal scholars, EU institutions and agencies, businesses and trade unions.
