*The Wretched of the Screen* Hito Steyerl, 2013-04-05 In Hito Steyerl's writing we begin to see how, even if the hopes and desires for coherent collective political projects have been displaced onto images and screens, it is precisely here that we must look frankly at the technology that seals them in. *The Wretched of the Screen* collects a number of Steyerl's landmark essays from recent years in which she has steadily developed her very own politics of the image. Twisting the politics of representation around the representation of politics, these essays uncover a rich trove of information in the formal shifts and aberrant distortions of accelerated capitalism, of the art system as a vast mine of labor extraction and passionate commitment, of occupation and internship, of structural and literal violence, enchantment and fun, of hysterical, uncontrollable flight through the wreckage of postcolonial and modernist discourses and their unanticipated openings. e-flux journal Series edited by Julieta Aranda, Brian Kuan Wood, Anton Vidokle

**Roger Williams and the Creation of the American Soul** John M.

Barry, 2012-01-05 A revelatory look at how Roger Williams shaped the nature of religion, political power, and individual rights in America. For four hundred years, Americans have wrestled with and fought over two concepts that define the nature of the nation: the proper relation between church and state and between a free individual and the state. These debates began with the extraordinary thought and struggles of Roger Williams, who had an unparalleled understanding of the conflict between a government that justified itself by reason of state-i.e. national security-and its perceived will of God and the ancient rights and liberties of individuals. This is a story of power, set against Puritan America and the English Civil War. Williams's interactions with King James, Francis Bacon, Oliver Cromwell, and his mentor Edward Coke set his course, but his fundamental ideas came to fruition in America, as Williams, though a Puritan, collided with John Winthrop's vision of his City upon a Hill. Acclaimed historian John M. Barry explores the development of these fundamental ideas through the story of the man who was the first to link religious freedom to individual liberty, and who created in America the first government and society on earth informed by those beliefs. The story is essential to the continuing debate over how we define the role of religion and political power in modern American life.

*Streaming, Sharing, Stealing* Michael D. Smith, Rahul Telang, 2017-08-25 How big data is transforming the creative industries, and how those industries can use lessons from Netflix, Amazon, and Apple to fight back. "[The authors explain] gently yet firmly exactly how the internet threatens established ways and what can and cannot be done about it. Their book should be required for anyone who wishes to believe that nothing much has changed." –The Wall Street Journal "Packed with examples, from the nimble-footed who reacted quickly to adapt their businesses, to laggards who lost empires." –Financial Times Traditional network television programming has always followed the same script: executives approve a pilot, order a trial number of episodes, and broadcast them, expecting viewers to watch a given show on their television sets at the same time every week. But then came Netflix's House of Cards. Netflix gauged the show's potential from data it had gathered about subscribers' preferences, ordered two seasons without seeing a pilot, and uploaded the first thirteen episodes all at once for viewers to watch whenever they wanted on the devices of their choice. In this book, Michael Smith and Rahul Telang, experts on entertainment analytics, show how the success of House of Cards upended the film and TV industries—and how companies like Amazon and Apple are changing the rules in other entertainment industries, notably publishing and music. We're living through a period of unprecedented technological disruption in the entertainment industries. Just about everything is affected: pricing, production, distribution, piracy. Smith and Telang discuss niche products and the long tail, product differentiation, price discrimination, and incentives for users not to steal content. To survive and succeed, businesses have to adapt rapidly and creatively. Smith and Telang explain how. How can companies discover who their customers are, what they want, and how much they are willing to pay for it? Data. The entertainment industries, must learn to play a little "moneyball." The bottom line: follow the data.
