Networks of Outrage and Hope Manuel Castells, 2015-06-04 Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

Chosen by Fate, Rejected by the Alpha Deni Chance, 2020-11-06 Eighteen-year-old Trinity is unlike any other werewolf in her pack. For one, there were unusual circumstances surrounding her birth, for another, she is the only pack member to never shift into a wolf form. So now she doesn't quite belong anywhere. Not quite human and not quite wolf. She thought she would be able to live her life how she wanted when she had turned eighteen. Go to college, make some friends, have some fun. But what is she to do when the dangerously sexy Alpha literally falls right into her lap? I am not human, and I am not a wolf. I don't belong anywhere... ..we both know that no one is going to mate with me, and even if they did, they would just reject me anyway. What is the sexy, brooding Alpha going to do? The elders are making him hold these ridiculous parties to search for a mate. He doesn't want a mate, but he knows he needs a mate to finish the Alpha Circle. Without a mate, a Luna for the pack, his people would suffer. And what is he going to do when he stumbles across the girl that fate has chosen for him and he finds out she has no wolf? This cannot be! I roared. There is no way that I can mate with a girl that does not even have a wolf. She will be too weak. She will be inferior. She will not be strong enough to be a Luna. I simply could not accept her as my mate. Not fully. It wasn't safe for her. She would get herself killed. And she would bring my pack down with her. When these two meet, sparks will surely fly. But will it be from passion, or their constant fighting? Neither of them wanted a mate. Neither of them wants the mate that fate chose for them. And neither of them can make that mate bond go away. What are they going to do now that they're literally stuck with each other?

Screen Space Reconfigured Susanne O. Saether, Synne T. Bull, 2020-06-05 Screen Space Reconfigured is the first edited volume that critically and theoretically examines the many novel renderings of space brought to us by 21st century screens. Exploring key cases such as post-perspectival space, 3D, vertical framing, haptics, and layering, this volume takes stock of emerging forms of screen space and spatialities as they move from the margins to the centre of contemporary media practice. Recent years have seen a marked scholarly interest in spatial dimensions and conceptions of moving image culture, with some theorists claiming that a 'spatial turn' has taken place in media studies and screen practices alike. Yet this is the first book-length study dedicated to on-screen spatiality as such. Spanning mainstream cinema, experimental film, video art, mobile screens, and stadium entertainment, the volume includes contributions from such acclaimed authors as Giuliana Bruno and Tom Gunning as well as a younger generation of scholars.

Copyright Policy, Creativity, and Innovation in the Digital Economy The Department of

Commerce,2014-07-20 Copyright law grants exclusive rights to authors in order to encourage the production of creative works, to the benefit of society as a whole. These exclusive rights are balanced by a range of limitations and exceptions that permit some uses of copyrighted works without the need for authorization. Copyright has been a vital contributor to U.S. cultural and economic development for more than two hundred years, fostering the production and dissemination of the valuable expression that has put America at the forefront of the global creative marketplace. "Nothing is more important to American prosperity than jumpstarting our engine of innovation." Both American creativity and the Internet economy are at the heart of that engine, and the relationship between the two has motivated the Department of Commerce's inquiry into this issue. The industries that rely on copyright law are today an integral part of our economy, accounting for 5.1 million U.S. jobs in 2010—a figure that has grown dramatically over the past two decades. In that same year, these industries contributed 4.4 percent of U.S. GDP, or approximately \$641 billion. And the demand for content produced by our creators contributes to the development of the broader Internet economy, spurring the creation and adoption of innovative distribution technologies.

Mapping Intermediality in Performance Sarah Bay-Cheng,Chiel Kattenbelt,Andy Lavender,2010 This insightful book explores the relationship between theater and digital culture. The authors show that the marriage of traditional performance with new technologies leads to an upheaval of the implicit "live" quality of theatre by introducing media interfaces and Internet protocols, all the while blurring the barriers between theater-makers and their audience.
