Adrenalin Ghiyāth Rāsim Mad'hūn, 2017 Poetry. Middle Eastern Studies. Translated from the Arabic by Catherine Cobham. Here is ADRENALIN, Syrian-born, Stockholm-based Palestinian poet Ghayath Almadhoun's first collection to be published in English. This sinuous translation comprises poems that span years and continents, that circulate between cities, ideas, lovers, places of refuge, war zones, time zones, histories. Here is a vital, relentless, intertextual voice that refuses arrest by sentimentality, that pursues the poetry coursing underneath the poetry.

Action! Robert Ringer, 2004 Robert Ringer's books have created a revolution in the self-development genre and shown millions the way to personal and professional achievement. Now, in his latest and most eye-opening work, he reveals the key factor that leads to success in all areas of life. As the years have passed, I have increasingly zeroed in on action as the most important success habit when it comes to determining how an individual's life plays out, Ringer writes. His conclusion evolved as a result of years of observing how four powerful action elements work in concert to give a person the capacity to overcome virtually any obstacle in his path. These elements include: Nothing happens until something moves, God helps those who help themselves, The Law of Averages, Action produces genius, magic, and power, Ideas, preparation, knowledge, and wisdom are all but useless without action, because action is the starting point of all progress. One of Ringer's most important rules is that action must precede motivation. Take action first, and motivation will follow. Filled with humorous and enriching anecdotes, Action! exhorts the reader to Forget about taking action next week; forget about taking action tomorrow; forget about taking action in an hour. When you close this book, get up out of your chair and take action now. Action is life, and life is meant to be lived -- which is why happiness is a natural consequence of an action-oriented life.

You & Me Forever Valerie Hsiung, 2020 Poetry. Asian American Studies. With her second volume, Valerie Hsiung proves herself to be a poet of lyric's volatile possibility, detonating poetry's uncertain truce between reader and speaker, the deadly and the inconsequential, the profound and the profane. YOU & ME FOREVER performs a multitude of teetering voices through a multitude of tangency points--between the violence enacted against girl bodies and the violence enacted against earth, between inherited language or mother tongue and made/found language or acquired tongue, between the speaking machine and the transhuman, between the woman as artist and the woman as monster, between the horizontality of plain speech and the verticality of lyric fragments. In response, the reader's role fluctuates from direct addressee to participant, from chorus member to puppet master--all while the dark angel of the circus hovers above like a shadow on the page. A storied, oscillating breath-scape, a wondrous tertium quid, Valerie Hsiung's YOU & ME FOREVER maps a world that moves as simultaneously paradoxical, relational, and permutational. Edged with the epic, speech-based and strange, the writings enact the promise of dreams as they address matters of hauntings and bodies, displacement, and the nature of capital, exile, and art. Here the narrative ripples, achieves both temporal and spatial possibilities, works both boundariness and dissolve. A destabilizing marvel.--Hoa Nguyen The first time I read Valerie Hsiung's YOU & ME FOREVER, I had a vision of a bonfire in which countless volumes of love-twisted and love-twisting works of literature, including sculptures and

films, were reduced to ash, and from the ashes were intuitively yet precisely drawn filaments on which were inscribed prophetic dialogues that voiced the poet's relationship with the forces that would come to make, and perpetually threaten to unmake, her world. The second time I read YOU & ME FOREVER, there was neither filament nor fire, but an animated frieze, or maybe rainfall or serrated light, of intimate retribution, that is retributive intimacy. I say read, but that is not the word that accurately describes what actually happened.--Brandon Shimoda

*Action, Freedom and Responsibility* Subasini Barik, 2022-10-19 This book, a work on human doing, analyses and applies three central aspects of human life – Action, Freedom and Responsibility – in the wide spectrum of the Philosophy of Mind. Reflections on these issues and their interconnections have a significant effect on the Philosophy of Value and application of ethical theories in practical life. This book even reconstructs the conceptual connection between action and freedom, on the one hand, and that between freedom and responsibility, on the other. It also puts the concepts of freedom and determinism to critical test and reinterprets them from different angles and perspectives. The conventional doctrine of karma, based on the teachings of the Bhagavadgītā, is relieved from its usual deterministic presentation and a logically reasonable explanation is offered. Human actions and human agency are central concepts in the philosophy of mind and action. Free will and responsibility constitute the bedrock of the moral life of the human agents and the book pinpoints that freedom is meant to undertake the goal-oriented actions. It is, therefore, focused on the enquiry into the various aspects of philosophy of mind, as well as the philosophy of value.

*Action Learning* Wojciech W. Gasparski, 2017-11-30 Praxiology is the study of working and doing from the point of view of effectiveness. It has three components: analysis of concepts involving purposive actions; critique of modes of action from the viewpoint of efficiency; and normative advisory aspects in recommendations for increasing human efficacy. This sixth volume of the Praxiology series focuses on action learning. Learning from distinguishable action is surprisingly different than learning from a subject expert in human or book form. For those who have worked with and in action learning, the latest form is always distinguishably different from a former experience. Action learning programs are not, in general, intended to tackle puzzles, namely, questions to which an answer may be said to exist even if that answer is difficult to find; action learning is intended to help to develop the ability to tackle problems or opportunities, of which different persons, all experienced, intelligent, and motivated, might well advocate different courses of action, all reasonable. The essentials of action learning, according to this volume, are: there can be no learning unless the participant receives feedback about his/her performance; participants learn only of their own volition and never at the will of others; the volition to learn is most readily engendered by the lure of success or by the fear of calamity. Building upon these essentials, the authors view action learning as a process of inquiry beginning with the experience of not knowing what to do next, and finding that an answer is not available from current expertise. All chapters in this volume are sound contributions to the continuing debate on the processes of learning from distinguishable action. Action Learning is intriguing reading for sociologists, philosophers, managers, and researchers of all disciplines.

*Essays on Freedom of Action (Routledge Revivals)* Ted Honderich,2015-06-03 *Essays on Freedom of Action*, first published in 1973, brings together original papers by contemporary British and American philosophers on questions which have long concerned philosophers and others: the question of whether persons are wholly a part of the natural world and their actions the necessary effects of causal processes, and the question of whether our actions are free, and such that we can be held responsible for them, even if they are the necessary effects of casual processes. This volume will be of interest not only to those who are primarily concerned with philosophy but also to students in those many other disciplines in which freedom and determinism arise as problems.

However there is an overabundance of measures available for evaluating various aspects of population health and previous efforts to simplify existing sets to meet the needs of all decision makers have been unsuccessful. The National Academies of Sciences, Engineering, and Medicine convened a workshop to explore the status and uses of measures and measurement in the work of improving population health. Participants explored existing and emerging population health metric sets and characteristics of metrics necessary for stakeholder action across multiple sectors. This report summarizes the presentations and discussions from the workshop.

American Men of Action Burton E. Stevenson, 2021-09-03 'American Men of Action' is Stevenson's exploration of the lives of some of the most notable men in American history. From Christopher Columbus to Melvil Dewey, he leaves no stone of American history unturned. His concise and intentional manner manages to make even the most mundane pieces of history captivating. An American author and librarian, Burton Egbert Stevenson (1872-1962) was born in Chillicothe, Ohio. After studying at Princeton, he fought in the First

World War, founded a library in Camp Sherman, and worked at Chillicothe city library for an impressive 58 years. He also founded the American Library in Paris, during his posting as the European director of the Library War Service. Alongside this, he was also an author, writing and compiling over 50 books across his lifetime, his children's books and anthologies being the most well-known among them.

The Creativity of Action Hans Joas, 1996 Hans Joas is one of the foremost social theorists in Germany today. Based on Joas's celebrated study of George Herbert Mead, this work reevaluates the contribution of American pragmatism and European philosophical anthropology to theories of action in the social sciences. Joas also establishes direct ties between Mead's work and approaches drawn from German traditions of philosophical anthropology. Joas argues for adding a third model of action to the two predominant models of rational and normative action—one that emphasizes the creative character of human action. This model encompasses the other two, allowing for a more comprehensive theory of action. Joas elaborates some implications of his model for theories of social movements and social change and for the status of action theory in sociology in the face of competition from theories advanced by Luhmann and Habermas. The problem of action is of crucial importance in both sociology and philosophy, and this book—already widely debated in Germany—will add fresh impetus to the lively discussions current in the English-speaking world.

*The Forms of Action at Common Law* Frederic William Maitland, 1936-01-03 This study looks at the forms of action and how they are a part of the structure upon which rests the whole common law of England.

*Praxiology and the Reasons for Action* Piotr Makowski, 2017-07-05 This volume explores two traditions in practical philosophy: action theory, which concerns the nature of motivation for human action, and praxiology, the study of human action. By bringing different perspectives together, the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action. The volume consists of three main parts. The first part, *Reasons for Action*, bridges the gap between reasons for action theories and praxiology. The second part of the volume, titled *Theories of Action*, explores philosophical approaches to action. Finally, in the third part, *Applications*, the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection assessment, solving action incompleteness, and knowledge management. The ultimate goal of this volume is to broaden the scientific view of action: to establish a perspective on action that is permeated by moral theories on the one hand, and accounts focused on efficiency and economy of action on the other hand. This work is the newest volume in Transaction's Praxiology series.

**A Theory of Action Identification** Robin R. Vallacher, Daniel M. Wegner, 2014-04-04 First published in 1985. A person may be caught in the midst of a patently ridiculous act, interrupted in a moment of apparent confusion, or even aroused from sleep, and yet respond to a query of What are you doing? with remarkable ease. The answer that is given is an identification of action. It is the central idea of this book that such action identifications perform pivotal functions in a broad range of

psychological and social processes.
