Selling to the Government Mark Amtower,2010-11-23 Learn the crucial ins and outs of the world's largest market The U.S government market represents the largest single market—anywhere. Government contract tracking firm Onvia estimates that government business—federal, state, local, and education—represents better than 40 percent of the nation's GDP. While anyone can play in this market, only those with the right preparation can win. Selling to the Government offers real-world advice for successful entry into the biggest market anywhere. Get proven approaches, strategies, tactics, and tools to make your business stand out, build relationships, understand procedures, and win high-stakes contracts. • Every year thousands of companies enter the massive U.S. Government (BtoG) marketplace, and by the end of the first year, most are gone and less than 10 percent make it to year two • Author has advised hundreds of companies, including Apple, Dell, CDW, Northrop Grumman, General Dynamics, IT, GTSI, and many small firms, on all aspects of marketing and selling to the government From the go/no-go decision, through company infrastructure requirements, marketing, sales, business development, and more, this book offers the best advice from the most recognized authority in the market.

Our American Government ,2003 The Committee on House Administration is pleased to present this revised book on our United States Government. This publication continues to be a popular introductory guide for American citizens and those of other countries who seek a greater understanding of our heritage of democracy. The question-and-answer format covers a broad range of topics dealing with the legislative, executive, and judicial branches of our Government as well as the electoral process and the role of political parties.--Foreword.

A Republic No More Jay Cost,2016-07-12 After the Constitutional Convention, Benjamin Franklin was asked, “Well, Doctor, what have we got—a Republic or a Monarchy?” Franklin's response: “A Republic—if you can keep it.” This book argues: we couldn't keep it. A true republic privileges the common interest above the special interests. To do this, our Constitution established an elaborate system of checks and balances that disperses power among the branches of government, which it places in conflict with one another. The Framers believed that this would keep grasping, covetous factions from acquiring enough power to dominate government. Instead, only the people would rule. Proper institutional design is essential to this system. Each branch must manage responsibly the powers it is granted, as well as rebuke the other branches when they go astray. This is where subsequent generations have run into trouble: we have overloaded our government with more power than it can handle. The Constitution's checks and balances have broken down because the institutions created in 1787 cannot exercise responsibly the powers of our sprawling, immense twenty-first-century government. The result is the triumph of special interests over the common interest. James Madison called this factionalism. We know it as political corruption. Corruption today is so widespread that our government is not really a republic, but rather a special interest democracy. Everybody may participate, yes, but the contours of public policy depend not so much on the common good, as on the push-and-pull of the various interest groups encamped in Washington, DC.

**Standards for Internal Control in the Federal Government** United States Government Accountability Office,2019-03-24 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

Your Government ,1963

**Simpler** Cass R. Sunstein,2013-04-09 Simpler government arrived four years ago. It helped put money in your pocket. It saved hours of your time. It improved your children's diet, lengthened your life span, and benefited businesses large and small. It did so by issuing fewer regulations, by insisting on smarter regulations, and by eliminating or improving old regulations. Cass R. Sunstein, as administrator of the most powerful White House office you've never heard of, oversaw it and explains how it works, why government will never be the same again (thank goodness), and what must happen in the future. Cutting-edge research in behavioral economics has influenced business and politics. Long at the forefront of that research, Sunstein, for three years President Obama's “regulatory czar” heading the White House Office of Information and Regulatory Affairs, oversaw a far-reaching restructuring of America's regulatory state. In this highly anticipated book, Sunstein pulls back the curtain to show what was done, why Americans are better off as a result, and what the future has in store. The evidence is all around you, and more is coming soon. Simplified mortgages and student loan applications. Scorecards for colleges and universities. Improved labeling of food and energy-efficient appliances and cars. Calories printed on chain restaurant menus. Healthier food in public schools. Backed by historic executive orders ensuring transparency and accountability, simpler government can be found in new initiatives that save money and time, improve health, and lengthen lives. Simpler: The Future of Government will transform what you think government can and should accomplish.

Government Auditing Standards - 2018 Revision United States Government Accountability Office,2019-03-24 Audits provide essential accountability and transparency over government programs. Given the current challenges facing governments and their programs, the oversight provided through auditing is more critical than ever. Government auditing provides the objective analysis and information needed to make the decisions necessary to help create a better future. The professional standards presented in this 2018 revision of Government Auditing Standards (known as the Yellow Book) provide a framework for performing high-quality audit work with competence, integrity, objectivity, and independence to provide accountability and to help improve government operations and services. These standards, commonly referred to as generally accepted government auditing standards (GAGAS), provide the foundation for government auditors to lead by example in the areas of independence, transparency, accountability, and quality through the audit process. This revision contains major changes from, and supersedes, the 2011 revision.
