*Fit for America* Harvey Green,1986 It does seem to me that there would not be so much pain and suffering . . . if there were no doctors . . . . The skepticism reflected in this statement by a New York farmer in 1853, quoted in this fascinating study of medicine, American culture, and values, was definitely a sign of the times. Three medical philosophies and their offshootsheroic, botanic, and homeopathicwere prevalent in the 19th century, often practiced by doctors with little more than six weeks of training. No wonder the skepticism of the

masses and the high mortality rates. With meticulous scholarship, keen insight, and clear writing, Green shows how religion, the frontier spirit, ignorance about sanitation, and the national drive for perfection spawned these contrasting philosophies of health. A lively social history with many lessons for our own time, recommended for public and academic libraries.-- Library journal, Jack Forman, Mesa College Library, San Diego.

This text is based in large part on both the work that has begun through the NSF international initiative to develop industry

The ACSM's team of experts in academic, medical, and health and fitness fields have put together an authoritative guide for facility operators and owners. - Standards and guidelines aligned with the current version of the pending NSF international health and fitness facility standards
- New guidelines addressing individuals with special needs

facilities that are dealing with youth to ensure the proper care of this segment of the clientele. With improved organization, new visual features, and additional appendixes, the fourth edition offers a comprehensive and easy-to-use reference of health and fitness facility standards and guidelines. Included in appendix A is Blueprint for Excellence, which allows readers to search efficiently for specific information regarding the standards and guidelines within the book. Health and fitness facilities provide opportunities for individuals to become and remain physically active. As the use of exercise for health care prevention and prescription continues to gain momentum, health and fitness facilities and clubs will emerge as an integral part of the health care system.
