

Musicandvideo

Richard Colwell,Michael Hewitt,Mark Fonder

Sound and Vision Simon Frith, Andrew Goodwin, Lawrence Grossberg, 1993 The first significant collection of new and classic texts on video, bringing together some of the leading international cultural and music critics writing today. Addressing one of the most controversial forms of popular culture in the contemporary world, *Sound and Vision* confronts easy interpretations of music video - as promotional vehicles, filmic images, postmodern culture - to offer a new and bold understanding of its place in pop music, television and the media industries. _ *Sound and Vision* is the first significant collection of new and classic texts on video and brings together some of the leading international cultural and music critics writing today. The book acknowledges the history of the commercial status of pop music as a whole, as well as its complex relations with other media, to offer a new and refreshing interpretation which takes both terms - music and video - seriously. *Sound and Vision* will be an essential text for students of popular music and popular culture. _ The editors: Lawrence Grossberg is a Professor of Speech Communications and Criticism and Interpretive Theory at the University of Illinois. Simon Frith is a Professor of English at Strathclyde University and co-director of the John Logie Baird centre. Andrew Goodwin is a lecturer in the Department of Broadcast Communication Arts at San Francisco State University. _ The contributors: Jody Berland, Mark Fenster, Simon Firth, Andrew Goodwin, Lawrence Grossberg, Lisa Lewis, Kobena

Mercer, Leslie Savan, Will Straw, Robert Walser e Savan, Will Straw, Robert Walser _ Readership: Communication, media and cultural studies

Popular Music On Screen John Mundy, 1999-08-21
Popular Music on Screen examines the relationship between popular music and the screen, from the origins of the Hollywood musical to contemporary developments in music television and video. Through detailed examination of films, television programs and popular music, together with analysis of the economic, technological and cultural determinants of their production and consumption, the book argues that popular music has been increasingly influenced by its visual economy. Though engaging with the debates that surround postmodernism, the book suggests that what most characterizes the relationship between popular music and the screen is a strong sense of continuity, expressed through institutional structures, representational strategies and the ideology of entertainment.

Music and Video Streaming Carla Mooney, 2015-12-15 This succinct title breaks down the complex mechanisms behind audio and video streaming and explains them in terms a middle-school-aged audience can understand. This volume introduces the concept of streaming and then explains how it works and what its uses are. Along the way, important digital terminology and concepts are introduced, such as bandwidth, codecs, plugins, and protocol. A discussion of Internet safety and how to produce and share streaming content wraps up this enlightening text.

Electronic Visual Music Dave Payling, 2023-09-20

Electronic Visual Music is a comprehensive guide to the composition and performance of visual music, and an essential text for those wanting to explore the history, current practice, performance strategies, compositional methodologies and practical techniques for conceiving and creating electronic visual music. Beginning with historical perspectives to inspire the reader to work creatively and develop their own individual style, visual music theory is then discussed in an accessible form, providing a series of strategies for implementing ideas. Including interviews with current practitioners, Electronic Visual Music provides insight into contemporary working methods and gives a snapshot of the state of the art in this ever-evolving creative discipline. This book is a valuable resource for artists and practitioners, as well as students, educators and researchers working in disciplines such as music composition, music production, video arts, animation and related media arts, who are interested in informing their own work and learning new strategies and techniques for exploration and creative expression of electronic visual music.

The Teaching of Instrumental Music Richard Colwell, Michael Hewitt, Mark Fonder, 2017-10-12 The Teaching of Instrumental Music, Fifth Edition introduces music education majors to basic instrumental pedagogy for the instruments and ensembles commonly found in the elementary and secondary curricula. It focuses on the core competencies required for teacher certification in instrumental music, with the pervasive philosophy

to assist teachers as they develop an instrumental music program based on understanding and respecting all types of music. Parts I and II focus on essential issues for a successful instrumental program, presenting first the history and foundations, followed by effective strategies in administrative tasks and classroom teaching. Parts III, IV, and V are devoted to the skills and techniques of woodwind, brass and percussion, and string instruments. In all, *The Teaching of Instrumental Music* is the complete reference for the beginning instrumental teacher, commonly retained in a student's professional library for its unique and comprehensive coverage. NEW TO THIS EDITION: Revision and updating of curriculum developments, such as coordinating State Department of Education student learning objectives with the recent Every Student Succeeds Act (ESSA) New discussion of the NAFME National Standards as they relate to the teaching of instrumental music Revamping of rehearsing instrumental ensembles chapters, including new or expanded sections on programming, choosing quality music, and applying successful rehearsal techniques Updates on references, plus new discussion questions, and websites and internet links A chapter devoted to classroom guitar Updates on the use of technology for teaching and learning music More on healthy performance practice, marching band, and jazz band Online materials located in the eResources section on the Routledge website.

Music/Video Gina Arnold, Daniel Cookney, Kirsty Fairclough, Michael N. Goddard, 2017-08-10 This book

is a lively, comprehensive and timely reader on the music video, capitalising on cross-disciplinary research expertise, which represents a substantial academic engagement with the music video, a mediated form and practice that still remains relatively under-explored in a 21st century context. The music video has remained suspended between two distinct poles. On the one hand, the music video as the visual sheen of late capitalism, at the intersection of celebrity studies and postmodernism. On the other hand, the music video as art, looking to a prehistory of avant-garde film-making while perpetually pushing forward the digital frontier with a taste for anarchy, controversy, and the integration of special effects into a form designed to be disseminated across digital platforms. In this way, the music video virally re-engenders debates about high art and low culture. This collection presents a comprehensive account of the music video from a contemporary 21st century perspective. This entails revisiting key moments in the canonical history of the music video, exploring its articulations of sexuality and gender, examining its functioning as a form of artistic expression between music, film and video art, and following the music video's dissemination into the digital domain, considering how digital media and social media have come to re-invent the forms and functions of the music video, well beyond the limits of "music television".

YouTube in Music Education Thomas E. Rudolph, James Frankel, 2009 YouTube in Music Education teaches instructors how to tap into the

excitement of internet multimedia with students by creating, posting, and promoting videos on the world's most popular media service. Written by proven experts in the field of music education and technology, with a combined 60 years of classroom and instrumental experience, this book explains how to record and edit videos, add effects, and upload content. You'll learn everything from basic video production tools to advanced applications you can use in classroom and rehearsal settings. -
-Résumé de l'éditeur.

More Than Illustrated Music Kathrin

Dreckmann,Elfi Vomberg,2023-02-23 The genre of the video clip has been established for more than thirty years, mainly served by the sub genres of video art and music video. This book explores processes of hybridization between music video, film, and video art by presenting current theoretical discourses and engaging them through interviews with well-known artists and directors, bringing to the surface the crucial questions of art practice. The collection discusses topics including postcolonialism, posthumanism, gender, race and class and addresses questions regarding the hybrid media structure of video, the diffusion between content and form, art and commerce as well as pop culture and counterculture. Through the diversity of the areas and interviews included, the book builds on and moves beyond earlier aesthetics-driven perspectives on music video.

Music Is Rapid Transportation Lawrence

Joseph,Dan Lander,Bill Smith,2010 A truly alternative look at music lists, not one that merely includes the obvious but shows the

connections of popular music to the avant garde, the obscure, the experimental, the quirky, and the adventurous, this edition leads the curious reader towards new musical experiences hitherto unknown to them.

Artist Management for the Music Business Paul Allen, 2022-03-20 Anyone managing an artist's career needs to be well versed and have a savvy understanding of the moving parts of the music business. Learn how and why those moving parts move, as well as how to manage and navigate a music-based career. Artist Management for the Music Business gives a comprehensive view of how to generate income through music and how to strategically plan for future growth. The book is full of valuable practical insights. It includes interviews and case studies with examples of real-world management issues and outcomes. Updates to this new edition include a new chapter for independent, self-managing artists, expanded and updated sections on networking, social media, and streaming, and a basic introduction to data analytics for the music business. This book gives access to resources about artist management and the music business at its companion website, www.artistmanagementonline.com.

Innovation in Music II R Hepworth-Sawyer, J Hodgson, R Toulson, J L Paterson, 2017-01-16 The music industry is a rapidly evolving field, with new creative approaches and technological advances combining to catalyse and inspire innovations. Innovation in Music 2015 (InMusic'15) was an international conference organised by KES International and hosted by Anglia Ruskin

University over the 7th to 9th June 2015 in Cambridge, UK. Innovation in Music broadly represents all aspects of innovation in the field of music, particularly encompassing music performance, audio technology, music production and the commercial music industries. The conference acted as a forum for industry experts and professionals to mix with researchers and academics to report on the latest advances and exchange ideas. Award-winning industry experts including David Wrench, Tim Exile, Peter Jenner, Mandy Parnell, Gary Bromham, Bryan Martin and Simon Gogerly contributed to the conference keynote presentations. This volume includes articles developed from presentations delivered

K-pop - The International Rise of the Korean Music Industry JungBong Choi, Roald Maliangkay, 2014-09-15 K-pop, described by Time Magazine in 2012 as South Korea's greatest export, has rapidly achieved a large worldwide audience of devoted fans largely through distribution over the Internet. This book examines the phenomenon, and discusses the reasons for its success. It considers the national and transnational conditions that have played a role in K-pop's ascendancy, and explores how they relate to post-colonial modernisation, post-Cold War politics in East Asia, connections with the Korean diaspora, and the state-initiated campaign to accumulate soft power. As it is particularly concerned with fandom and cultural agency, it analyses fan practices, discourses, and underlying psychologies within their local habitus as well as in expanding topographies of online networks. Overall, the book

addresses the question of how far Asian culture can be global in a truly meaningful way, and how popular culture from a marginal nation has become a global phenomenon.

Popular Music in a Digital Music Economy Tim J. Anderson, 2013-12-17 In the late 1990s, the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather, it is devoted to what this new industry is becoming by examining these practices as experiments, dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience, the end user, and their productive and distributive capacities around which services and musicians must orient their practices and investments.

Korean Pop Music , 2021-11-15 Korean popular music has in the last decade become a significant model for youth culture throughout Asia. Yet, although the Korean music industry is both vibrant and massive, this is the first book-length work

devoted to the subject to appear in English.

The Power of Music Susan Hallam, Evangelos Himonides, 2022-07-11 Building on her earlier work, 'The Power of Music: A Research Synthesis of the Impact of Actively Making Music on the Intellectual, Social and Personal Development of Children and Young People', this volume by Susan Hallam and Evangelos Himonides is an important new resource in the field of music education, practice, and psychology. A well-signposted text with helpful subheadings, 'The Power of Music: An Exploration of the Evidence' gathers and synthesises research in neuroscience, psychology, and education to develop our understanding of the effects of listening to and actively making music. Its chapters address music's relationship with literacy and numeracy, transferable skills, its impact on social cohesion and personal wellbeing, as well as the roles that music plays in our everyday lives. Considering evidence from large population samples to individual case studies and across age groups, the authors also pose important methodological questions to the research community. 'The Power of Music' defends qualitative research against a requirement for randomised control trials that can obscure the diverse and often fraught contexts in which people of all ages and backgrounds are exposed to, and engage with, music. This magnificent and comprehensive volume allows the evidence about the power of music to speak for itself, thus providing an essential directory for those researching music education and its social, personal, and cognitive impact across human ages and experiences.

Sound and Music in Film and Visual Media Graeme Harper, Ruth Doughty, Jochen Eisentraut, 2014-10-27
Sound and Music in Film and Visual Media: A Critical Overview is a comprehensive work defining and encapsulating concepts, issues and applications in and around the use of sound in film and the cinema, media/broadcast and new media. Over thirty definitive full-length essays, which are linked by highlighted text and reference material, bring together original research by many of the world's top scholars in this emerging field. Complete with an extensive bibliography, Sound and Music in Film and Visual Media provides the most comprehensive and wide-ranging consideration of this subject yet produced.

The Future of the Music Business Steve Gordon, 2011-08-01 (Music Pro Guide Books & DVDs). New technologies are revolutionizing the music business. While these changes may be smashing traditional business models and creating havoc among the major record companies, they are also providing new opportunities for unsigned artists, independent labels, and music business entrepreneurs. *The Future of the Music Business* provides a legal and business road map for success in today's music business by setting forth a comprehensive summary of the rules pertaining to the traditional music business, including music licensing, as well as the laws governing online distribution of music and video. The book also provides practical tips for: Selling music online; Using blogs and social networks; Developing an online record company; Creating an Internet radio station; Opening an online music store; Raising

money for recording projects online; Creating a hit song in the Digital Age; Taking advantage of wireless technologies, and much more. This revised third edition is the most up-to-date and thorough examination of current trends, and offers special sections on: What to do if someone steals your song; Protecting the name of your band or label ; How to find and get a music lawyer to shop your music; How to land a deal with an indie, or a major label. The video includes a comprehensive lecture, How to Succeed in Today's Music Business, delivered by the author at the Tisch School of the Arts at NYU.

Creativities, Technologies, and Media in Music Learning and Teaching Gary E. McPherson, Graham F. Welch, 2018-05-03 Creativities, Media, and Technology in Music Learning and Teaching is one of five paperback books derived from the foundational two-volume Oxford Handbook of Music Education. Designed for music teachers, students, and scholars of music education, as well as educational administrators and policy makers, this fifth book in the set comprises three complementary sections: musical creativity as practice; music teaching and learning through technology; and the interplay of media, music, and education. The first section reviews notions of musical creativity, examining practice-based perspectives to support and develop understanding of the diverse types of creativity found within music education practice across the globe. In the second section, authors explore the essential role of technology in musical discourse and in various forms of musical learning, even as technology

continually evolves and the needs and possibilities continue to rapidly change. The third section provokes readers to assess their own thinking about the transformative changes occurring within the discipline as a result of advances in media, and the increasing infiltration of media into all aspects of life, the classroom, and music making. Contributors Andrew R. Brown, Pamela Burnard, Bernadette Colley, Ian Cross, Rokus de Groot, Steven C. Dillon, Randi Margrethe Eidsaa, David G. Hebert, Evangelos Himonides, Neryl Jeanneret, Ailbhe Kenny, Andrew King, Eleni Lapidaki, Felicity Laurence, Samuel Leong, Bo Wah Leung, Alagi Mbye, Gary E. McPherson, Ross Purves, Tal-Chen Rabinowitch, S. Alex Ruthmann, Eva Sæther, Jonathan Savage, Reza Shayesteh, Petros Stagkos, Matthew D. Thibeault, Evan S. Tobias, Carole Waugh, Graham F. Welch

Oxford Handbook of Music Psychology Susan Hallam, Ian Cross, Michael Thaut, 2011-05-26 The field of Music Psychology has grown dramatically in the past 20 years, to emerge from being just a minor topic to one of mainstream interest within the brain sciences. However, until now, there has been no comprehensive reference text in the field. The Oxford Handbook of Music Psychology is a landmark text providing, for the first time ever, a comprehensive overview of the latest developments in this fast-growing area of research. With contributions from over fifty experts in the field, the range and depth of coverage is unequalled. All the chapters combine a solid review of the relevant literature with well-reasoned arguments and robust discussions of the

major findings, as well as original insights and suggestions for future work. Written by leading experts, the 52 chapters are divided into 11 sections covering both experimental and theoretical perspectives, each edited by an internationally recognised authority. Ten sections each present chapters that focus on specific areas of music psychology: - the origins and functions of music - music perception - responses to music - music and the brain - musical development - learning musical skills - musical performance - composition and improvisation - the role of music in our everyday lives - music therapy and conceptual frameworks. In each section, expert authors critically review the literature, highlight current issues, and explore possibilities for the future. The final section examines how in recent years the study of music psychology has broadened to include a range of other scientific disciplines. It considers the way that the research has developed in relation to technological advances, fostering links across the field and providing an overview of the areas where the field needs further development in the future. The Oxford Handbook of Music Psychology will be the essential reference text for students and researchers across psychology and neuroscience.

The Oxford Handbook of Mobile Music Studies, Volume 1 Sumanth Gopinath, Jason Stanyek, 2014-03
The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound

increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, mobile music opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world-the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden-and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 1 provides an introduction to the study of mobile music through the examination of its devices, markets, and theories. Conceptualizing a long history of mobile music extending from the late nineteenth century to the present, the volume focuses on the conjunction of human mobility and forms of sound production and reproduction. The volume's chapters investigate the MP3, copyright law and digital downloading, music and cloud computing, the iPod, the transistor radio, the automated call center, sound and text messaging, the mobile phone, the militarization of iPod usage, the cochlear implant, the portable sound recorder, listening practices of schoolchildren and teenagers, the ringtone, mobile music in the urban soundscape, the boombox, mobile music marketing in Mexico and Brazil, music piracy in India, and online radio in Japan and the US.
