**Storm Watchers** John D. Cox,2002-11-04 A lively, inspiring account of the pioneers who sought to accurately predict the weather Benjamin Franklin . . . James P. Espy . . . Cleveland Abbe . . . Carl-Gustaf Rossby . . . Jule G. Charney . . . just a few of the remarkable individuals who struggled against formidable odds to understand the atmosphere and predict the weather. Where they saw patterns and processes, others saw randomness and tumult-and yet they strove to make their voices heard, often saving lives in the process. Storm Watchers takes you on a fascinating journey through time that captures the evolution of weather forecasting. From the age when meteorology was considered one step removed from sorcery to the modern-day wizardry of supercomputers, John Cox introduces you to the pioneering scientists whose work fulfilled an ancient dream and made it possible to foretell the future. He tells the little-known stories of these weathermen, such as Ptolemy's weather predictions based on astrology, John Finley's breakthrough research in identifying tornadoes, and Tor Bergeron's new techniques of weather forecasting, which contributed to its final worldwide acceptance. Filled with extraordinary tales of bravery and sacrifice, Storm Watchers will make you think twice the next time you turn on the local news to catch the weather report.

They unearth and analyse all aspects of the weather and how it changes our lives through answering our most curious questions about the world around us.

*A Little Closer to Home* Ginger Zee,2022-01-11 In Ginger Zee's follow-up to the bestselling Natural Disaster, the ABC chief meteorologist takes readers on a much deeper journey of self discovery. When Ginger Zee opened her life to readers in Natural Disaster, the response was enormous. She put a very relatable if surprising face on depression and has helped lessen the stigma surrounding mental health issues. But Ginger tells us, Natural Disaster was Ginger Lite and only scratched the surface. In this moving follow-up, Ginger shares her truest self. She spent most of her life shielding her vulnerabilities from the world all while being a professional people pleaser. Her stormy childhood, her ongoing struggles with crippling depression, her suicide attempts, and many other life experiences will resonate with readers who are likely to see themselves along the way. In spite of its serious subject matter, Ginger's positive, life-affirming outlook comes through loud and clear. Written with great heart and quite a bit of humor, Ginger normalizes issues and challenges millions of people face every day. A Little Closer to Home will broaden the conversation around mental health at a time we need it more than ever.

**Looking Up** Matthew Cappucci,2022-08-02 An energetic and electrifying narrative about all things weather-by one of today's rising meteorological stars. Get in-we're going storm-chasing! Imagine a very cool weather nerd has just pulled up to you and yelled this out the window of his custom-built armored storm-chasing truck. The wind is whipping around, he's munching on Wawa, it's all very chaotic-yet as you look into his grinning face, you feel the greatest surge of adrenaline you have ever felt in your life. Hallelujah: your cavalry is here! Welcome to the brilliance of Looking Up, the lively new book from rising meteorology star Matthew Cappucci. He's a meteorologist for The Washington Post, and you might think of him as Doogie Howser meets Bill Paxton from Twister, with a dash of Leonardo DiCaprio from Catch Me If You Can. A self-proclaimed weather nerd, at the age of fourteen he talked his way into delivering a presentation on waterspouts at the American Meteorological Society's annual broadcast conference by fudging his age on the application and created his own major on weather science while an undergrad at Harvard. Combining reportage and accessible science with personal storytelling and infectious enthusiasm, Looking Up is a riveting ride through the state of our weather and a touching story about parents and mentors helping a budding scientist achieve his improbable dreams. Throughout, readers get a tutorial on the basics of weather science and the impact of the climate. As our country's leaders sound the alarm on climate change, few people have as close a view to how serious the situation actually is than those whose job is to follow the weather, which is the daily dose of climate we interact with and experience every day. The weather affects every aspect of our lives (even our art) as well as our future. The way we think about it requires a whole-life overhaul. Rain or shine, tropical storm or twister, Cappucci is here to help us begin the process. So get in his storm-chasing truck already, will ya?

**Mighty Storms of New England** Eric P. Fisher, 2021-10-21 The New England landscape has long been battered by some of the most intense weather in the United States. The region breeds one of the highest concentrations of meteorologists in the country for a reason. One can experience just about anything except a dust storm. Snowstorms, floods, droughts, heat waves, arctic blasts, hurricanes, tornadoes, wildfires, and other atmospheric oddities come and go with the changing seasons. Rare is the boring year of weather. Knowing the past is a critical part of understanding and forecasting the weather. Meteorologist Eric Fisher takes an in depth look at some of the most intense weather events in New England's history. The stories in this book not only describe the loss and the damage caused by the storms, but also how nearly all of them in left such an impression that they immediately led to progress where new warnings systems were implemented, government agencies formed, and technology accelerated in response to the devastation these events left behind.

"Fear God and Walk Humbly" James Mallory, 2013-09-06 A detailed journal of local, national, and foreign news, agricultural activities, the weather, and family events, from an uncommon Southerner Most inhabitants of the Old South, especially the plain folk, devoted more time to leisurely activities—drinking, gambling, hunting, fishing, and just loafing—than did James Mallory, a workaholic agriculturalist, who experimented with new plants, orchards, and manures, as well as the latest farming equipment and techniques. A Whig and a Unionist, a temperance man and a peace lover, ambitious yet caring, business-minded and progressive, he supported railroad construction as well as formal education, even for girls. His cotton production—four bales per field hand in 1850, nearly twice the average for the best cotton lands in southern Alabama and Georgia--tells more about Mallory's steady work habits than about his class status. But his most obvious eccentricity—what gave him reason to be remembered—was that nearly every day from 1843 until his death in 1877, Mallory kept a detailed journal of local, national, and often foreign news, agricultural activities, the weather, and especially events involving his family, relatives, slaves, and neighbors in Talladega County, Alabama. Mallory's journal spans three major periods of the South's history--the boom years before the Civil War, the rise and collapse of the Confederacy, and the period of Reconstruction after the Civil War. He owned slaves and raised cotton, but Mallory was never more than a hardworking farmer, who described agriculture in poetical language as "the greatest [interest] of all."

Dr. George George Fischbeck, Randy Roach, 2013 For twenty-three years, George Fischbeck was a schoolteacher in Albuquerque, and for the last thirteen of those years taught science on a public television station that was beamed all over New Mexico. He also served as a weatherman on Albuquerque's top-rated TV newscast where he was so popular that the general manager of a competing station sent tapes of his weather forecasts to all the top ABC Network stations nationwide in hope that one would hire George and get him out of New Mexico. When KABC-TV in Los Angeles responded, it was the start of a love affair between Dr. George and the City of Angels that continues to this day. Not only has Fischbeck had a long career as an awardwinning journalist and educator, he has also helped raise millions of dollars for a variety of charitable causes. His story is all here, and the best part is what the fewest people know: the heartwarming memories of a family man.
