The Department of Transportation Tamra B. Orr,2005-12-15 Thousands of people, billions of dollars, and millions of miles of roads, bridges, tunnels, and tracks are required to keep the American transportation system up and running every day. Created in 1966, the Department of Transportation coordinates all this activity and now regulates every major mode of transportation to make sure Americans get where they need to go safely and efficiently. This fascinating account helps young readers understand the full extent of a department that affects everything related to American transportation from the number of hours truck drivers sleep, to speed limits on highways, to the banning of smoking on planes.

Key Transportation Indicators National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,2002-07-17 A transportation indicator is a measure of change over time in the transportation system or in its social, economic, environmental, or other effects. Two National Research Council (NRC) studies recommended, as a matter of high priority, that the Bureau of Transportation Statistics (BTS) in the U.S. Department of Transportation (USDOT) develop a consistent, easily understood, and useful set of key indicators of the transportation system. The NRC's Committee on National Statistics and its Transportation Research Board, which conducted these studies, convened a workshop on June 13, 2000. The purpose of the Workshop on Transportation Indicators was to discuss issues relating to transportation indicators and provide the Bureau of Transportation Statistics with new ideas for issues to address.
