**Mobile Social Networking and Computing** Yufeng Wang,Jianhua Ma,2014-09-05 Recent advancements in mobile device technologies are revolutionizing how we socialize, interact, and connect. By connecting the virtual community with the local environment, mobile social networks (MSNs) create the opportunity for a multitude of new personalized services for mobile users. Along with that comes the need for new paradigms, mechanisms, and techniques with the capacity to autonomously manage their functioning and evolution. Currently, most books about mobile networks

focus mainly on the technical point of view. Mobile Social Networking and Computing: A Multidisciplinary Integrated Perspective not only addresses the theoretical aspects of MSN and computing, but also introduces and categorizes existing applications. It supplies a multidisciplinary perspective that considers the technology, economics, social sciences, and psychology behind MSNs. In addition to fundamental theory, the book investigates the practical issues in MSN, including characteristics, inner structural relationship, incentive mechanisms, resource allocating, information diffusion, search, ranking, privacy, trust, and reputation. Introducing recently developed technologies, modes, and models, the book provides two distinct (but related) viewpoints about MSN applications: socially inspired networking technology and networking technology that uses recent advancements to enhance quality of life. The text illustrates the interaction between the macrolevel structure and the local rational behaviors (microlevel) in MSN. It summarizes currently available MSN development platforms, including Android and iOS, and introduces and categorizes existing applications related to MSN and computing. Both location-based service (LBS) and mobile social networks in proximity

(MSNPs) are presented in a comprehensive manner. Highlighting key research opportunities, this much-needed reference outlines incentive mechanisms inspired by classical economics, behavioral economics, and social psychology, and, perhaps for the first time, it presents a summary of the economic and business models of MSNs.

Brief Points Ross H. MacKenzie, 2004-05-01 The Naval Academy's culture is a unique and sometimes baffling phenomenon to the outside world, but with this newly updated guide in hand

relatives and friends of midshipmen will find answers to all the questions they might have about Academy life. Since it was first published more than a decade ago, parents have relied on the almanac for insights into their sons' and daughters' experiences at Annapolis. Now the son of the original author has taken on the responsibility of bringing the popular reference up to date. An Academy graduate, active duty naval officer, and former English instructor at the Academy, the younger Mackenzie makes full use of his intimate knowledge of Annapolis to fill in the gaps. Along with the latest facts on car ownership, dating policies, athletic requirements, and disciplinary demands, you'll now find a useful guide to Internet resources. A midshipman profile and a dictionary of Midspeak completes the picture in a book whose title recalls the midshipmen's own manual, Reef Points, but extends its concept for outsiders seeking practical information about the Academy, the Navy, and Annapolis. Prospective applicants, graduates, newcomers to the USNA staff, and visitors seeking a memento will also be attracted to this useful guide.
