Digital Privacy Alessandro Acquisti,Stefanos Gritzalis,Costos Lambrinoudakis,Sabrina di Vimercati,2007-12-22 While traveling the data highway through the global village, most people, if they think about it at all, consider privacy a non-forfeitable right. They expect to have control over the ways in which their personal information is obtained, distributed, shared, and used by any other entity. According to recent surveys, privacy, and anonymity are the fundamental issues of concern for most Internet users, ranked higher than ease-of-use, spam, cost, and security. Digital Privacy: Theory, Techniques, and Practices covers state-of-the-art technologies, best practices, and research results, as well as legal, regulatory, and ethical issues. Editors Alessandro Acquisti, Stefanos Gritzalis, Costas Lambrinoudakis, and Sabrina De Capitani di Vimercati, established researchers whose work enjoys worldwide recognition, draw on contributions from experts in academia, industry, and government to delineate theoretical, technical, and practical aspects of digital privacy. They provide an up-to-date, integrated approach to privacy issues that spells out what digital privacy is and covers the threats, rights, and provisions of the legal framework in terms of technical counter measures for the protection of an individual's privacy. The work includes coverage of protocols, mechanisms, applications, architectures, systems, and experimental studies. Even though the utilization of personal information can improve customer services, increase revenues, and lower business costs, it can be easily misused and lead to violations of privacy. Important legal, regulatory, and ethical issues have emerged, prompting the need for an urgent and consistent response by electronic societies. Currently there is no book available that combines such a wide range of privacy topics with such a stellar cast of contributors. Filling that void, Digital Privacy: Theory, Techniques, and Practices gives you the foundation for building effective and legal privacy protocols into your business processes.

Digital Privacy Chris Capra, Eric Fester, 2020-08-16 Your data has already been sold... Get it back. There are so many times when we are online, and we need to make sure that our data is safe. We assume that we are doing a good job with a bit of anti-virus protection and carefully selecting what sites we visit. But when some of the big companies we trust, including Facebook, Google, and more, are willing to gather up as much data as they can about all our lives (whether online or not) and then sell it to make money, it's hard to know how safe our information really is. This book is going to help you prevent that. While it may be difficult to keep this from happening, there are quite a few powerful steps that you can take. These help to keep the hackers out and will stop Google, Bing, and other companies from tracking you and will keep all your personal information nice and safe. It is amazing how much information companies are able to store about us and sell. Most are willing to hand it over because we don't even realize it is happening; we are just following instructions and typing what we are prompted to type. Taking the proper precautions ahead of time can make life a little easier and put you back in the driver's seat when it comes to keeping your data safe. This book will go through some of the simple steps you can take to keep your information safe and ensure that no one can take your data without your permission again. Some of the things YOU WILL LEARN: The TOP FIVE big companies already taking your information and selling it for mega-profits. The biggest SOCIAL MEDIA MISTAKES you need to fix, right now. The BEST HARDWARE to keep the trackers, and the hackers, out. The minimum MUST HAVE SOFTWARE that will lock down your system. How to SHUT DOWN HACKERS while you browse safely online. BULLETPROOF YOUR EMAIL and shop online without a care in the world. Safe online banking with these SECRET CREDIT CARDS. How to DELETE YOURSELF from the internet in under five minutes. While there are many ways that companies can take your data and use it for their own benefit, there are just as many ways for you to kick them out and gain control again. Some of the controls are right in front of your eyes provided to you by the companies themselves, and some will require you to take additional steps on your own. Regardless, it is worth considering using privacy controls to protect yourself and your data. Take back control of your data. Scroll up and click Buy Now.
