BACnet H. Michael Newman, 2013-08-05 This new book, by the original developer of the BACnet standards, explains how BACnet's protocols manage all basic building functions in a seamless, integrated way. BACnet is a data communication protocol for building automation and control systems, developed within ASHRAE in cooperation with ANSI and the ISO. This book explains how BACnet works with all major control systems--including those made by Honeywell, Siemens, and Johnson Controls--to manage everything from heating to ventilation to lighting to fire control and alarm systems. BACnet is used today throughout the world for commercial and institutional buildings with complex mechanical and electrical systems. Contractors, architects, building systems engineers, and facilities managers must all be cognizant of BACnet and its applications. With a real 'seat at the table,' you'll find it easier to understand the intent and use of each of the data sharing techniques, controller requirements, and opportunities for interoperability between different manufacturers' controllers and systems. Highlights include: * A review of the history of BACnet and its essential features, including the object model, data links, network technologies, and BACnet system configurations; * Comprehensive coverage of services including object access, file access, remote device management, and BACnet-2012's new alarm and event capabilities; * Insight into future directions for BACnet, including wireless networking, network security, the use of IPv6, extensions for lifts and escalators, and a new set of BACnet Web Services; * Extensive reference appendices for all objects and services; and * Acronyms and abbreviations

Spatial Modeling in Natural Sciences and Engineering Jürgen Friedrich, 2011-06-27 The author introduces the reader to the creation and implementation of space-related models by applying a learning-by-doing and problem-oriented approach. The required procedural skills are rarely taught at universities and many

scientists and engineers struggle to transfer a model into a computer program. The purpose of this book is to fill this gap. It moves from simple to more complex applications, covering various important topics in the sequence: dynamic matrix processing, 2D and 3D graphics, databases, Java applets and parallel computing. A file (SMOP.zip) with all examples can be downloaded free of charge from the Internet at <http://de.geocities.com/bsttc2/book>.

Google Hacking for Penetration Testers Johnny Long, Bill Gardner, Justin Brown, 2011-04-18 This book helps people find sensitive information on the Web. Google is one of the 5 most popular sites on the internet with more than 380 million unique users per month (Nielsen/NetRatings 8/05). But, Google's search capabilities are so powerful, they sometimes discover content that no one ever intended to be publicly available on the Web including: social security numbers, credit card numbers, trade secrets, and federally classified documents. *Google Hacking for Penetration Testers Volume 2* shows the art of manipulating Google used by security professionals and system administrators to find this sensitive information and "self-police their own organizations. Readers will learn how Google Maps and Google Earth provide pinpoint military accuracy, see how bad guys can manipulate Google to create super worms, and see how they can mash up Google with MySpace, LinkedIn, and more for passive reconnaissance. • Learn Google Searching Basics Explore Google's Web-based Interface, build Google queries, and work with Google URLs. • Use Advanced Operators to Perform Advanced Queries Combine advanced operators and learn about colliding operators and bad search-fu. • Learn the Ways of the Google Hacker See how to use caches for anonymity and review directory listings and traversal techniques. • Review Document Grinding and Database Digging See the ways to use Google to locate documents and then search within the documents to locate information. • Understand Google's Part in an Information Collection Framework Learn the

principles of automating searches and the applications of data mining. • Locate Exploits and Finding Targets Locate exploit code and then vulnerable targets. • See Ten Simple Security Searches Learn a few searches that give good results just about every time and are good for a security assessment. • Track Down Web Servers Locate and profile web servers, login portals, network hardware and utilities. • See How Bad Guys Troll for Data Find ways to search for usernames, passwords, credit card numbers, social security numbers, and other juicy information. • Hack Google Services Learn more about the AJAX Search API, Calendar, Blogger, Blog Search, and more.

Advances in Security, Networks, and Internet of Things Kevin Daimi, Hamid R. Arabnia, Leonidas Deligiannidis, Min-Shiang Hwang, Fernando G. Tinetti, 2021-07-10 The book presents the proceedings of four conferences: The 19th International Conference on Security & Management (SAM'20), The 19th International Conference on Wireless Networks (ICWN'20), The 21st International Conference on Internet Computing & Internet of Things (ICOMP'20), and The 18th International Conference on Embedded Systems, Cyber-physical Systems (ESCS'20). The conferences took place in Las Vegas, NV, USA, July 27-30, 2020. The conferences are part of the larger 2020 World Congress in Computer Science, Computer Engineering, & Applied Computing (CSCE'20), which features 20 major tracks. Authors include academics, researchers, professionals, and students. Presents the proceedings of four conferences as part of the 2020 World Congress in Computer Science, Computer Engineering, & Applied Computing (CSCE'20); Includes the tracks on security & management, wireless networks, internet computing and IoT, and embedded systems as well as cyber-physical systems; Features papers from SAM'20, ICWN'20, ICOMP'20 and ESCS'20.

Global China Tarun Chhabra, Rush Doshi, Ryan Hass, Emilie Kimball, 2021-06-22 The global implications of China's rise as a global actor In 2005, a senior official in the George W. Bush

administration expressed the hope that China would emerge as a “responsible stakeholder” on the world stage. A dozen years later, the Trump administration dramatically shifted course, instead calling China a “strategic competitor” whose actions routinely threaten U.S. interests. Both assessments reflected an underlying truth: China is no longer just a “rising” power. It has emerged as a truly global actor, both economically and militarily. Every day its actions affect nearly every region and every major issue, from climate change to trade, from conflict in troubled lands to competition over rules that will govern the uses of emerging technologies. To better address the implications of China’s new status, both for American policy and for the broader international order, Brookings scholars conducted research over the past two years, culminating in a project: *Global China: Assessing China’s Growing Role in the World*. The project is intended to furnish policy makers and the public with hard facts and deep insights for understanding China’s regional and global ambitions. The initiative draws not only on Brookings’s deep bench of China and East Asia experts, but also on the tremendous breadth of the institution’s security, strategy, regional studies, technological, and economic development experts. Areas of focus include the evolution of China’s domestic institutions; great power relations; the emergence of critical technologies; Asian security; China’s influence in key regions beyond Asia; and China’s impact on global governance and norms. *Global China: Assessing China’s Growing Role in the World* provides the most current, broad-scope, and fact-based assessment of the implications of China’s rise for the United States and the rest of the world.

Internet Companion Vanessa Waller, Glen Waller, 2000 It is written for anyone who needs to learn about computers right from the basics and offers Australian-oriented, common sense explanations that don't rely on any assumed knowledge about computers. Every explanation is accompanied by practical step-

by-step exercises and screen illustrations.

Endurance Deb Anderson, 2014-11-05 *Endurance* presents stories of ordinary Australians grappling with extraordinary circumstances, providing insight into their lives, their experiences with drought and their perceptions of climate change. The book opens with the physical impacts, science, politics and economics of drought and climate change in rural Australia. It then highlights the cultural and historical dimensions — taking us to the Mallee wheat-belt, where researcher Deb Anderson interviewed farm families from 2004 to 2007, as climate change awareness grew. Each story is grouped into one of three themes: Survival, Uncertainty and Adaptation. Illustrated with beautiful colour photographs from Museum Victoria, *Endurance* will appeal to anyone with an interest in life stories, rural Australia and the environment.

Australian Politics in the Twenty-First Century Stewart Jackson, Joff Lelliott, Shannon Brincat, Josephine Bourne, Nick Economou, 2022-09-02 The global political environment in the twenty-first century is proving dynamic and challenging for Australian policymakers and political institutions. *Australian Politics in the Twenty-first Century* contextualises the Australian political landscape through an institutional lens. It examines the legislative and judicial bodies, minor parties, lobby groups, the media and the citizenry, providing historical and contemporary facts, explaining political issues and examining new challenges. The second edition has been updated to reflect the application of political theories in today's civic environment. New spotlight boxes highlight issues including marriage equality, COVID-19 and federalism, the inclusion of First Nations peoples in the political system, and gender equality in public policy. Short-answer, reflection, research and discussion questions encourage students to test and extend their knowledge of each topic and to clearly link theory to practice. Written in an accessible and engaging style, *Australian Politics in the Twenty-First Century* is an

invaluable introduction to the Australian political system.

Far-Right Political Parties in Australia Jordan

McSwiney, 2024-02-13 This book examines how Australian far-right parties organise and operate to better understand their limited electoral success. Australian far-right parties have yet to see results comparable to far-right parties in other contexts. Unlike many of their European counterparts that have made significant electoral gains up to and including participation in national governments, the Australian far-right parties of the 'fourth wave' have experienced relatively poor electoral results. But this does not necessarily mean that Australia is uniquely hostile to far-right politics. Focusing particularly on the 2019 Australian federal election, this book takes an organisational approach to better understand why Australian far-right parties struggle electorally. Through the novel lens of disorganised parties, the author argues that the failure to develop a functioning party organisation has resulted in Australian far-right parties being unable to effectively navigate their political environment. By focusing on disorganisation, this book provides a new perspective for understanding the limited electoral impact of the far right in Australia today, despite favourable conditions like normalised Islamophobia and growing dissatisfaction with mainstream parties. This book will be of interest to scholars and students of party politics, the far right, populism, and Australian politics.

Community Justice in Australia Brian Stout, 2023-02-28 This new edition of *Community Justice in Australia* expands on the discussion of how people who have committed offences can be engaged in the community. It considers how the concept of community justice can be successfully applied within Australia by social workers, criminologists, parole officers and anyone working in the community with both adults and young people. The book defines community justice and applies the concept to the Australian context. It then explains theories of offending

behaviour, considers relevant Australian legislation, policy and intervention strategies and examines the implications for both young people and adults. Restorative justice is also discussed. The latter part of the book focuses on practical issues including working in community justice organisations, technology, public protection and desistance approaches. Each chapter contains an engagement with the implications of community justice approaches for Indigenous groups and features reflective questions, practical tasks and guidance for further reading. This accessible and practical book will be indispensable for instructors, students and practitioners working in the community with people who have committed offences.

Enabling Interaction and Quality Anne Gams Steine Asserson, Eduard J. Simons, 2006 This proceedings book illustrates the tremendous evolution, driven by the revolutionary ICT-developments of the 90's.

Selected Papers from the 12th International Networking Conference Bogdan Ghita, Stavros Shiaeles, 2021-01-04 The proceedings includes a selection of papers covering a range of subjects focusing on topical areas of computer networks and security with a specific emphasis of novel environments, ranging from 5G and virtualised infrastructures to Internet of things, smart environments and cyber security issues. Networking represents the underlying core of current IT systems, providing the necessary communication support for complex infrastructures. Recent years have witnessed a number of novel concepts moving from theory to large scale implementations, such as Software Defined Networking, Network Function Virtualisation, 5G, smart environments, and IoT. These concepts change fundamentally the paradigms used in traditional networking, with a number of areas such as network routing and system or business security having to adjust or redesign to accommodate them. While the benefits are clear, through the advent of new applications, use cases, improved user interaction

and experience, they also introduce new challenges for generic network architectures, mobility, security, traffic engineering.

Doping in Sport and the Law Ulrich Haas, Deborah Healey, 2016-09-22 This unique international legal and cross-disciplinary edited volume contains analysis of the legal impact of doping regulation by eminent and well known experts in the legal fields of sports doping regulation and diverse legal fields which are intrinsically important areas for consideration in the sports doping landscape. These are thoughtful extended reflections by experts on theory and policy and how they interact with law in the context of doping in sport. It is the first book to examine the topical and contentious area of sports doping from a variety of different but very relevant legal perspectives which impact the stakeholders in sport at both professional and grass roots levels. The World Anti-Doping Code contains an unusual mix of public and private regulation which is of more general interest and fully explored in this work. Each of the 14 chapters addresses doping regulation from a legal perspective such as tort, corporate governance, employment law, human rights law, or a scientific area. Legal areas are generally considered from an international and not national perspective. Issues including fairness, logic and the likelihood of compliance are explored. It is vital reading for anyone interested in the law, regulation and governance of sport.

Journalists and Confidential Sources Joseph M Fernandez, 2020-11-23 Journalists and Confidential Sources explores the fraught and widespread reliance by journalists on anonymous sources, whistleblowers, and others to whom they owe an obligation of confidentiality. It examines the difficulties afflicting such relationships; analyses the deteriorating right to know and freedom of expression frameworks; and explores solutions and reforms. The book discusses key Australian and international source protection ethics rules, statutes, court cases, law enforcement actions, and case studies. It highlights weakness in journalists' professional practice codes governing

confidentiality obligations; discusses inadequate journalistic appreciation of the importance of establishing clear terms and conditions underpinning confidentiality obligations; and identifies shortcomings in the law governing source protection. The book argues that despite source protection being widely recognised as an important ideal, source protection is under sustained assault, thereby undermining public access to information, and democracy itself. The work focusses on Australia but takes into account source protection in the United Kingdom, the United States, Canada, and New Zealand. This timely contribution to the global discussion on the subject will greatly interest journalists, scholars, educators, and students especially in the areas of media law and policy, journalism, media and communication studies, and public relations; the legal fraternity; and anyone who communicates with journalists.

The Future of Work in Asia and Beyond Alan R. Nankervis, Julia Connell, John Burgess, 2020-03-13 The Future of Work in Asia and Beyond presents the findings and associated implications arising from a collaborative research study conducted on the potential impact of the Fourth Industrial Revolution (4IR – or Industry 4.0) on the labour markets, occupations and associated future workforce competencies and skills across ten countries. The 4IR concerns the digital transformation in society and business – an interface between technologies in the physical, digital and biological disciplines. The book explores many related issues: the nature of the 4IR, as well as demographic, generational and socio-cultural issues, economic and political perspectives, public and private sector similarities

and differences, business strategy and managerial implications, human resource management/planning strategies, policies and practices, industry innovations, 'best practice' cases and comparative country studies. Chapters are based on a framework which combines labour market and multiple stakeholder theories. Issues are explored through the perceptions of organisational managers based in Australia, China, India, Indonesia, Malaysia, Mauritius, Nepal, Singapore, Taiwan and Thailand to provide an analysis of organisational, industry and government preparedness for the 4IR. This book is recommended reading for anyone wanting to gain an understanding of the 4IR and a range of related challenges and issues, as well as suggested strategies for governments, education and industry that are necessary to address them.

Strangling Aunty: Perilous Times for the Australian Broadcasting Corporation Virginia Small, 2021-09-24 Drawing on a wealth of academic research, statistics and interviews with key Australian media people including present and former Australian Broadcasting Corporation staffers, this book explores the transitions of the ABC under various types of organisational re-strategising, governance and political shifts. The book provides the reader with an authoritative narrative as to how the ABC has lost its iconic status in Australian society, and unfolds how the ABC has strayed from its respected public charter which endowed the ABC with a distinctive and important role in informing, educating and entertaining the Australian public. Successive federal government funding cuts have shrunk staffing levels and services while it has pursued a corporatist model that mimics the trappings and practices of commercial media. In that process it has become politicised and trivialised, thereby threatening its demise. The book is a unique and timely contribution at a time of dwindling interest for the funding of public assets everywhere. There is no other book in the market that addresses the decline of the organisation (the ABC) and analyses the reasons for its

demise within an organisational theoretical framework. The book is written for an educated general audience, with academics and media practitioners specifically in mind, and has everyday applications for business organisations operating in the public sector by bringing together important findings of public funding, budgets, management and organisational strategies and evolution.

Policing, Mental Illness and Media Katrina

Clifford, 2021-02-26 This book examines the complexities of the relationship between policing and mental health – in Australia especially – including the circumstances that lead to police use of force, and the ways in which news media typically report deaths resulting from police contact with people in mental health crisis. When a vulnerable member of society is killed by the police, it is only natural that questions are asked about the behaviour and actions of those involved. Police are, after all, meant to be the ‘protectors of society’. By virtue of these circumstances, fatal encounters between police and mentally ill individuals in crisis often attract heightened media and legal attention, as well as public debate. Drawing together research interviews and extensive case study analysis, the book explores the conditions for the production of this news media coverage, the ways in which it can shape public perceptions of police-involved mental health crisis interventions, and the potential impacts on those involved in and affected by such events. The implications for police agencies are also considered in the context of how they respond to vulnerable people in the community, while being in the media spotlight. This book will appeal to students, scholars and practitioners in journalism, media studies, policing, criminology, sociology, and mental health as well as those interested in learning about the relationship between policing, mental illness, and media representation.
