The Routledge Companion to Media Industries Paul McDonald, 2021-10-04 Bringing together 49 chapters from leading experts in media industries research, this major collection offers an authoritative overview of the current state of scholarship while setting out proposals for expanding, re-thinking and innovating the field. Media industries occupy a central place in modern societies, producing, circulating, and presenting the multitude of cultural forms and experiences we encounter in our daily lives. The chapters in this volume begin by outlining key conceptual and critical perspectives while also presenting original interventions to prompt new lines of inquiry. Other chapters then examine the impact of digitalization on the media industries, intersections formed between industries or across geographic territories, and the practices of doing media industries research and teaching. General ideas and arguments are illustrated through specific examples and case studies drawn from a range of media sectors, including advertising, publishing, comics, news, music, film, television, branded entertainment, live cinema experiences, social media, and music video. Making a vital and significant contribution to media research, this volume is essential reading for students and academics seeking to understand and evaluate the work of the media industries. Chapter 10 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

**Property Diversity and its Implications** John Page, 2016-08-05 Property is more diverse than is usually assumed. Developing the concept of property diversity, this book explores the varied role of property in placed human landscapes. In acknowledging the propertied diversity about us, the book highlights the paucity of our settled contemporary assumptions of property as defined by private ownership. Challenging this universalizing model, the book analyses how this self-limiting view produces critical blind spots in modern property discourse. In response, it offers a re-conceptualization of property that matches the grounded reality of our rich and diverse relationships with land. Integrating the plurality of real property types (private, public and common) with inclusive understandings of both interest and ownership, it thus identifies and substantiates an overarching theory of property diversity. Drawing on studies from numerous jurisdictions, including the USA, New Zealand, Australia, and the UK, its analysis of property as something more – and indeed other – than a place-less abstraction provides an invaluable contribution to the contemporary law and theory of property.

Troubled Waters Patrick Troy, 2008-06-01 Australian cities have traditionally relied for their water on a 'predict-and-provide' philosophy that gives primacy to big engineering solutions. In more recent years privatised water authorities, seeking to maximise consumption and profits, have reinforced the emphasis on increasing supply. Now the cities must cope with the stresses these policies have imposed on the eco-systems from which they harvest water, into which they discharge wastes, and on which they are located. Residents are having to pay more for their water, while the cities themselves are becoming less sustainable. Must we build more dams and desalination plants, or should we be managing the demand for urban water more prudently? This book explores the demand for urban water and how it has changed in response to shifting social mores over the past century. It explains how demand for centralised provision of water might be reshaped to enable the cities to better cope with expected changes in supply as our climate changes. And it discusses the implications of property rights in water for proposals to privatise water services.

Big, Bold and Blue Geoff Wescott, James Fitzsimons, 2016-07-01 The world's oceans cover about 70% of our planet. To safeguard the delicate ecological and environmental functions of the oceans and their remarkable biodiversity, networks of marine protected areas are being created. In some of these areas, human activity is restricted to non-exploitative activities and in others it is managed in a sustainable way. Australia is at the forefront of marine conservation, with one of the largest systems of marine protected areas in the world. Big, Bold and Blue: Lessons from Australia's Marine Protected Areas captures Australia's experience, sharing important lessons from the Great Barrier Reef and many other extraordinary marine protected areas. It presents real-world examples, leading academic research, perspectives on government policy, and information from indigenous sea country management, non-governmental organisations, and commercial and

recreational fishing sectors. The lessons learnt during the rapid expansion of Australia’s marine protected areas, both positive and negative, will aid and advise other nations in their own marine conservation efforts.

**The Australia-Japan Defence and Security Relationship 1945-2021** Peter McDermott,2022-05-05 McDermott examines the origins, development and prospects for the Australia and Japan Defence and Security Relationship. In 1945, Japan and Australia were foes; today they are partners in security, defence and military matters, each the other’s most important strategic ally, after the United States. As the region faces threats from an increasingly assertive China, there is a growing prospect of conflict, particularly in Northeast Asia. McDermott discusses how Japan and Australia may cooperate in mil-itary action. Using previously classified government documents, and interviews with those involved in the decisions, as well as his own experiences, McDermott examines how political imperatives have shaped the security side of the A-JDSR. He offers new insights into the history and future of the relationship. An essential read for students and scholars of Asia-Pacific and Indo-Pacific security.
