Health Informatics: Digital Health Service Delivery - The Future is Now! H. Grain, L.K. Schaper, 2013-06-27 Healthcare systems around the world are going through immense changes as innovative approaches to healthcare delivery are adopted to reduce cost and improve quality of care. Health informatics professionals are increasingly required to support these changes, and innovation, learning from experience and sharing ideas are essential to delivering the promises of e-health. This book presents the proceedings of the 21st Australian National Health Informatics Conference (HIC 2013), held in Adelaide, Australia in July 2013. The theme of HIC 2013 is 'Digital Health Service Delivery – the Future is Now!', emphasising the urgency of the need to embrace and advance the field of health informatics. The 28 papers in this volume examine and discuss directions, successes and other factors which need to be considered by all those involved in developing or implementing new health informatics systems. They present a wide diversity of work ranging from deeply theoretical to intensely practical, and represent experiences not only from Australasia, but also from many other parts of the world. Topics covered include: the design of viable and sustainable telehealth services, building an educated health informatics workforce, how to prepare health professionals for e-health as a life long learning process, improving the cancer patient journey, designing a diabetes mobile application with social network support, as well as many others. This book will be of interest to all those involved in the current and future provision of healthcare services.

The Fight for Privacy: Protecting Dignity, Identity, and Love in the Digital Age Danielle Keats Citron, 2022-09-13 The essential road map for understanding—and defending—your right to privacy in the twenty-first century. Privacy is disappearing. From our sex lives to our workout routines, the details of our lives once relegated to pen and paper have joined the slipstream of new technology. As a MacArthur fellow and distinguished professor of law at the University of Virginia, acclaimed civil rights advocate Danielle Citron has spent decades working with lawmakers and stakeholders across the globe to protect what she calls intimate privacy—encompassing our bodies, health, gender, and relationships. When intimate privacy becomes data, corporations know exactly when to flash that ad for a new drug or pregnancy test. Social and political forces know how to manipulate what you think and who you trust, leveraging sensitive secrets and deepfake videos to ruin or silence opponents. And as new technologies invite new violations, people have power over one another like never before, from revenge porn to blackmail, attaching life-altering risks to growing up, dating online, or falling in love. A masterful new look at privacy in the twenty-first century, *The Fight for Privacy* takes the focus off Silicon Valley moguls to investigate the price we pay as technology migrates deeper into every aspect of our lives: entering our bedrooms and our bathrooms and

our midnight texts; our relationships with friends, family, lovers, and kids; and even our relationship with ourselves. Drawing on in-depth interviews with victims, activists, and advocates, Citron brings this headline issue home for readers by weaving together visceral stories about the countless ways that corporate and individual violators exploit privacy loopholes. Exploring why the law has struggled to keep up, she reveals how our current system leaves victims—particularly women, LGBTQ+ people, and marginalized groups—shamed and powerless while perpetrators profit, warping cultural norms around the world. Yet there is a solution to our toxic relationship with technology and privacy: fighting for intimate privacy as a civil right. Collectively, Citron argues, citizens, lawmakers, and corporations have the power to create a new reality where privacy is valued and people are protected as they embrace what technology offers. Introducing readers to the trailblazing work of advocates today, Citron urges readers to join the fight. Your intimate life shouldn't be traded for profit or wielded against you for power: it belongs to you. With Citron as our guide, we can take back control of our data and build a better future for the next, ever more digital, generation.

Security and Privacy in Cyber-Physical Systems Houbing Song, Glenn A. Fink, Sabina Jeschke, 2017-09-11 Written by a team of experts at the forefront of the cyber-physical systems (CPS) revolution, this book provides an in-depth look at security and privacy, two of the most critical challenges facing both the CPS research and development community and ICT professionals. It explores, in depth, the key technical, social, and legal issues at stake, and it provides readers with the information they need to advance research and development in this exciting area. Cyber-physical systems (CPS) are engineered systems that are built from, and depend upon the seamless integration of computational algorithms and physical components. Advances in CPS will enable capability, adaptability, scalability, resiliency, safety, security, and usability far in excess of what today's simple embedded systems can provide. Just as the Internet revolutionized the way we interact with information, CPS technology has already begun to transform the way people interact with engineered systems. In the years ahead, smart CPS will drive innovation and competition across industry sectors, from agriculture, energy, and transportation, to architecture, healthcare, and manufacturing. A priceless source of practical information and inspiration, *Security and Privacy in Cyber-Physical Systems: Foundations, Principles and Applications* is certain to have a profound impact on ongoing R&D and education at the confluence of security, privacy, and CPS.

In addition, the book examines the relationship between civil society and intergovernmental institutions such as the United Nations, the World Trade Organization and the G7/G8. Speech Matters Professor of Politics and Public Policy Katharine Gelber, 2011 Why are Australians getting free speech Wrong? Australia is the land of the 'Fair Go'. But does this extend to giving everyone the right to speak freely about politics? While most Australians take this vital freedom for granted, in *Speech Matters* political analyst Katharine Gelber shows why many of Australia's laws and policies are actually damaging our democratic ideals. A council officer shuts down a Sydney art exhibition that challenges the basis for the Iraq war; big day out organisers are attacked for asking attendees not to wear the Australian flag after the Cronulla riots. Gelber investigates a wide range of political expression to discover what value Australians place on free speech: from the national flag, hate speech and anti-terrorism laws to protest, campaigns against corporate actions and provocative art. Gelber considers the rules that regulate our speech and actions alongside the views of everyday Australians on these issues. What Gelber finds is a political culture that is failing free speech. In Australia, powerful companies can silence dissent, and even peaceful protest can be difficult to carry out. Filled with controversial examples to fuel the debate, *Speech Matters* challenges Australians to rethink freedom of speech. It's time to give everyone a voice in running the country.--Publisher's website.

Well-being, Personal Wholeness and the Social Fabric Doru Costache, Darren Cronshaw, 2017-05-11 Well-being is a familiar term in academic literature and public discourse. It captures the imagination by addressing issues related to the social good and the quest for personal happiness. It embraces a wide variety of concerns: age, gender, sexuality, ethnicity, self-esteem, health, class, education, institution and ecosystems, among many issues. Well-being studies focus on the welfare of the world and its inhabitants, bringing holistic and transformative perspectives to bear. The Christian faith has been a powerful contributor to this tradition over the centuries. Human beings, made in the image of God, are called to live transformed lives through the Spirit of Christ in communities of grace and reconciliation for the benefit of others, caring for our planet in the expectation of God's new creation. What difference does the study of well-being from a Christian perspective make?

Gaza, home to two million people, continues to face suffocating conditions imposed by Israel. This distinctive anthology imagines what the future of Gaza could be, while reaffirming the critical role of Gaza in Palestinian identity, history, and struggle for liberation. *Light in Gaza* is a seminal, moving and wide-ranging anthology of Palestinian writers and artists. It constitutes a collective effort to organize and center Palestinian voices in the ongoing struggle. The Catalpa Rescue Peter FitzSimons, 2019-04-23 The incredible true story of one of the most extraordinary and inspirational prison breaks in Australian history. New York, 1874. Members of the Clan-na-Gael - agitators for Irish freedom from the English yoke - hatch a daring plan to free six Irish political prisoners from the most remote prison in the British Empire, Fremantle Prison in Western Australia. Under the guise of a whale hunt, Captain Anthony sets sail on the *Catalpa* to rescue the men from the stone walls of this hell on Earth known to the inmates as a 'living tomb'. What follows is one of history's most stirring sagas that splices Irish, American, British and Australian history together in its climactic moment. For Ireland, who had suffered English occupation for 700 years, a successful escape was an inspirational call to arms. For America, it was a chance to slap back at Britain for their support of the South in the Civil War; for England, a humiliation. And for a young Australia, still not sure if it was Great Britain in the South Seas or worthy of being an independent country in its own right, it was proof that Great Britain was not unbeatable. Told with FitzSimons' trademark combination of arresting history and storytelling verve, *The Catalpa Rescue* is a tale of courage and cunning, the fight for independence and the triumph of good men, against all odds.

You Will Be Made to Care Erick Erickson, Bill Blankschaen, 2016-02-22 Religious liberty is under attack in America. Your freedom to believe may not last much longer. To all those who say they don't care about the culture war, Erick Erickson has only one response: The Left will not let you stay on the sidelines. You will be made to care. Now the former Editor-in-Chief of RedState.com joins with Christian author Bill Blankschaen to expose the war in America on Christians and all people of faith who refuse to bow to the worst kind of religion-secularism-one intent on systematically imposing its agenda and frightening doubters into silence. The book features first-hand accounts from Christians who've been punished for their beliefs and the perspectives of concerned thought leaders to make the case that Americans of

faith can't afford to ignore what's happening—not anymore. You Will Be Made to Care offers hope for preserving freedom of conscience with practical steps that believers, families, pastors, church leaders, and citizens can take to resist tyranny and experience a resurgence of faith in America.
