Demystifying Internet of Things Security Sunil Cheruvu, Anil Kumar, Ned Smith, David M. Wheeler, 2019-08-13 Break down the misconceptions of the Internet of Things by examining the different security building blocks available in Intel Architecture (IA) based IoT platforms. This open access book reviews the threat pyramid, secure boot, chain of trust, and the SW stack leading up to defense-in-depth. The IoT presents unique challenges in implementing security and Intel has both CPU and Isolated Security Engine capabilities to simplify it. This book explores the challenges to secure these devices to make them immune to different threats originating from within and outside the network. The requirements and robustness rules to protect the assets vary greatly and there is no single blanket solution approach to implement security. *Demystifying Internet of Things Security* provides clarity to industry professionals and provides an overview of different security solutions. What You'll Learn Secure devices, immunizing them against different threats originating from inside and outside the network. Gather an overview of the different security building blocks available in Intel Architecture (IA) based IoT platforms. Understand the threat pyramid, secure boot, chain of trust, and the software stack leading up to defense-in-depth. Who This Book Is For Strategists, developers, architects, and managers in the embedded and Internet of Things (IoT) space trying to understand and implement the security in the IoT devices/platforms.

Catalyzing Green Finance Asian Development Bank, 2017-08-01 A large financing need challenges climate-adjusted infrastructure in developing Asia, estimated at \$26 trillion till 2030. This necessitates crowding-in private sources to meet financing, efficiency, and technology gaps. However, a lack of bankable projects is a major hurdle. This publication suggests one possible innovative financing approach. The Green Finance Catalyzing Facility (GFCF) proposes a blended finance framework for governments and development entities to better leverage development funds for risk mitigation, generate a pipeline of bankable green infrastructure projects, and directly catalyze private finance. The GFCF provides useful inputs for the current debate on mainstreaming green finance into country financial systems.

Peer to Peer Accommodation Networks Sara Dolnicar, 2017-12-01 The first book to present a new conceptual framework which offers an initial explanation for the continuing and rapid success of such 'disruptive innovators' and their effects on the international hospitality industry. It discusses all the hot topics in this area, with a specific focus on Airbnb, in the international context.

Water Ethics David Groenfeldt, 2013-10-01 This book introduces the idea that ethics are an intrinsic dimension of any water policy, program, or practice, and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management. Thus in controversies or conflicts over water resource allocation and use, an

examination of ethics can help clarify the positions of conflicting parties as preparation for constructive negotiations. The author shows the benefits of exposing tacit values and motivations and subjecting these to explicit public scrutiny where the values themselves can be debated. The aim of such a process is to create the proverbial 'level playing field', where values favoring environmental sustainability are considered in relation to values favoring short-term exploitation for quick economic stimulus (the current problem) or quick protection from water disasters (through infrastructure which science suggests is not sustainable). The book shows how new technologies, such as drip irrigation, or governance structures, such as river basin organizations are neither good nor bad in their own right, but can serve a range of interests which are guided by ethics. A new ethic of coexistence and synergies with nature is possible, but ultimately depends not on science, law, or finances but on the values we choose to adopt. The book includes a wide range of case studies from countries including Australia, India, Philippines, South Africa and USA. These cover various contexts including water for agriculture, urban, domestic and industrial use, the rights of indigenous people and river, watershed and ecosystem management.

Changing Paradigms ,2015

Digitising the Industry Internet of Things Connecting the Physical, Digital and Virtual Worlds Ovidiu Vermesan, Peter Friess, 2022-09-01 This book provides an overview of the current Internet of Things (IoT) landscape, ranging from

the research, innovation and development priorities to enabling technologies in a global context. A successful deployment of IoT technologies requires integration on all layers, be it cognitive and semantic aspects, middleware components, services, edge devices/machines and infrastructures. It is intended to be a standalone book in a series that covers the Internet of Things activities of the IERC - Internet of Things European Research Cluster from research to technological innovation, validation and deployment. The book builds on the ideas put forward by the European Research Cluster and the IoT European Platform Initiative (IoT-EPI) and presents global views and state of the art results on the challenges facing the research, innovation, development and deployment of IoT in the next years. The IoT is bridging the physical world with virtual world and requires sound information processing capabilities for the digital shadows of these real things. The research and innovation in nanoelectronics, semiconductor, sensors/actuators, communication, analytics technologies, cyber-physical systems, software, swarm intelligent and deep learning systems are essential for the successful deployment of IoT applications. The emergence of IoT platforms with multiple functionalities enables rapid development and lower costs by offering standardised components that can be shared across multiple solutions in many industry verticals. The IoT applications will gradually move from vertical, single purpose solutions to multi-purpose and collaborative applications interacting across industry verticals, organisations and people, being one of

the essential paradigms of the digital economy. Many of those applications still have to be identified and involvement of end-users including the creative sector in this innovation is crucial. The IoT applications and deployments as integrated building blocks of the new digital economy are part of the accompanying IoT policy framework to address issues of horizontal nature and common interest (i.e. privacy, end-to-end security, user acceptance, societal, ethical aspects and legal issues) for providing trusted IoT solutions in a coordinated and consolidated manner across the IoT activities and pilots. In this, context IoT ecosystems offer solutions beyond a platform and solve important technical challenges in the different verticals and across verticals. These IoT technology ecosystems are instrumental for the deployment of large pilots and can easily be connected to or build upon the core IoT solutions for different applications in order to expand the system of use and allow new and even unanticipated IoT end uses. Technical topics discussed in the book include:

- Introduction•
- Digitising industry and IoT as key enabler in the new era of Digital Economy•
- IoT Strategic Research and Innovation Agenda•
- IoT in the digital industrial context: Digital Single Market•
- Integration of heterogeneous systems and bridging the virtual, digital and physical worlds•
- Federated IoT platforms and interoperability•
- Evolution from intelligent devices to connected systems of systems by adding new layers of cognitive behaviour, artificial intelligence and user interfaces.•
- Innovation through IoT ecosystems•
- Trust-

based IoT end-to-end security, privacy framework• User acceptance, societal, ethical aspects and legal issues• Internet of Things Applications

Maternity and Paternity at Work Laura Addati, Naomi Cassirer, Katherine Gilchrist, International Labour Office, 2014 This report provides a picture of where we stand and what we have learned so far about maternity and paternity rights across the world. It offers a rich international comparative analysis of law and practice relating to maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and implementation. This report shows that a majority of countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able

to benefit from these essential labour rights.

Negotiating Climate Change in Crisis Steffen Böhm, Sian Sullivan, 2021-09-28
Climate change negotiations have failed the world. Despite more than thirty years of high-level, global talks on climate change, we are still seeing carbon emissions rise dramatically. This edited volume, comprising leading and emerging scholars and climate activists from around the world, takes a critical look at what has gone wrong and what is to be done to create more decisive action. Composed of twenty-eight essays—a combination of new and republished texts—the anthology is organised around seven main themes: paradigms; what counts?; extraction; dispatches from a climate change frontline country; governance; finance; and action(s). Through this multifaceted approach, the contributors ask pressing questions about how we conceptualise and respond to the climate crisis, providing both ‘big picture’ perspectives and more focussed case studies. This unique and extensive collection will be of great value to environmental and social scientists alike, as well as to the general reader interested in understanding current views on the climate crisis.

Understanding Environmental Pollution Marquita K. Hill, 2004-08-26
Understanding Environmental Pollution systematically introduces pollution issues to students and others with little scientific background. The first edition received excellent reviews, and the new edition has been completely refined and updated. The book moves from the definition of pollution and how

pollutants behave, to air and water pollution basics, pollution and global change, solid waste, and pollution in the home. It also discusses persistent and bioaccumulative chemicals, and pesticides, and it places greater stress on global pollutants. The relationship between energy generation and use, and pollution is stressed, as well as the importance of going beyond pollution control, to pollution prevention. Impacts on human and environmental health are emphasized throughout. Students are often invited to come to their own conclusions after having been presented with a variety of opinions. This textbook provides the basic concepts of pollution, toxicology and risk assessment for non-science majors as well as environmental science students.

Too Close to Ignore Mark Moran, Jodie Curth-Bibb, 2020-03-31 Less than five kilometres from Australia's most northern islands in the Torres Strait lies the southern coast of Papua New Guinea (PNG). The people living on the PNG side of the border along the South Fly coast live in abject poverty, with a near total absence of services and infrastructure. The disparity in income,

housing and health outcomes when compared with their nearby neighbours and relatives in the Torres Strait Islands, is extreme. The border is the focus of a range of interventions by the Australian and Queensland governments, including border protection, quarantine, marine resource management, and infectious disease control, including an alarming outbreak of multi-drug resistant tuberculosis. Restrictions are increasing on trading, fishing and access to Australian services. However, questions remain as to whether this focus is having unintended consequences, increasing the destitution and frustration on the PNG side, in turn exacerbating the security threat to Australia. And as the Australian border hardens, the Indonesian border beckons. This book presents the results of three years of research into the unique social and political geography of the borderland. The Torres Strait Treaty between Australia and PNG serves to construct a complex institutional layering, a tiered economy and a hierarchy of identities between those South Fly villagers who have rights under the Treaty to travel into Australia, and those who do not. This creates a politics of expectation and frustration that permeates everyday life along the South Fly coast, through which development projects must navigate.

The Fastest Man Alive Usain Bolt, 2016-10-04 Autobiography of Usain Bolt

Covers his journey from playing cricket and soccer as a kid to becoming the fastest man alive Well-illustrated Years before he set world records for the 100-meter and 200-meter sprints, which made him the fastest man alive and famous, Usain Bolt was a fairly scrawny kid from Trelawny in Jamaica. In this autobiography, Bolt himself shares how, as he grew up and played cricket and soccer, he— and others—learned he could run fast. Very, very fast. Usain Bolt's journey from a kid with humble beginnings to an Olympic gold medal winner is an inspiring and encouraging story. This beautifully illustrated autobiography shares that story from Bolt's perspective. It is a celebration of someone who was inspired by other athletes around the world, someone who worked for years to become the best at his sport. Bolt shares stories of the sacrifices he made, the influence of Cristiano Ronaldo, the power of soccer and dancehall music, and his signature lightning bolt move.

The Future of International Environmental Law David Kenneth Leary, Balakrishna Pisupati, 2010 This book explores the future of international environmental law in a world of ever worsening environmental crises. It examines the success stories and failures of international environmental law and argues that future responses to global environmental crises will be more about good environmental governance than just more treaties and laws. Environmental governance will need to accommodate the needs and aspirations of peoples from developed and developing countries alike and will have to be based on decisions and actions by a vast range of

actors and stakeholders--not just the nation-state that has traditionally dominated environmental diplomacy. This also suggests a need to be cognizant of the close links to other areas of international law, including human rights. The Future of International Environmental Law tackles the major environmental challenges of our times including climate change, biodiversity loss, and pollution and overfishing of the oceans. It examines what we can learn from the implementation of existing international environmental laws over the past few decades. It also considers a range of emerging issues such as the management of the environmental challenges faced by the Arctic, nanotechnology, biofuels and synthetic genomics.
