BACnet H. Michael Newman, 2013-08-05 This new book, by the original developer of the BACnet standards, explains how BACnet's protocols manage all basic building functions in a seamless, integrated way. BACnet is a data communication protocol for building automation and control systems, developed within ASHRAE in cooperation with ANSI and the ISO. This book explains how BACnet works with all major control systems—including those made by Honeywell, Siemens, and Johnson Controls—to manage everything from heating to ventilation to lighting to fire control and alarm systems. BACnet is used today throughout the world for commercial and institutional buildings with complex mechanical and electrical systems. Contractors, architects, building systems

engineers, and facilities managers must all be cognizant of BACnet and its applications. With a real 'seat at the table,' you'll find it easier to understand the intent and use of each of the data sharing techniques, controller requirements, and opportunities for interoperability between different manufacturers' controllers and systems. Highlights include: * A review of the history of BACnet and its essential features, including the object model, data links, network technologies, and BACnet system configurations; * Comprehensive coverage of services including object access, file access, remote device management, and BACnet-2012's new alarm and event capabilities; * Insight into future directions for BACnet, including wireless networking, network security, the use of IPv6, extensions for lifts and escalators, and a new set of BACnet Web Services; * Extensive reference appendices for all objects and services; and * Acronyms and abbreviations

Global China Tarun Chhabra, Rush Doshi, Ryan Hass, Emilie Kimball, 2021-06-22 The global implications of China's rise as a global actor In 2005, a senior official in the George W. Bush administration expressed the hope that China would emerge as a "responsible stakeholder" on the world stage. A dozen years later, the Trump administration dramatically shifted course, instead

calling China a “strategic competitor” whose actions routinely threaten U.S. interests. Both assessments reflected an underlying truth: China is no longer just a “rising” power. It has emerged as a truly global actor, both economically and militarily. Every day its actions affect nearly every region and every major issue, from climate change to trade, from conflict in troubled lands to competition over rules that will govern the uses of emerging technologies. To better address the implications of China’s new status, both for American policy and for the broader international order, Brookings scholars conducted research over the past two years, culminating in a project: Global China: Assessing China’s Growing Role in the World. The project is intended to furnish policy makers and the public with hard facts and deep insights for understanding China’s regional and global ambitions. The initiative draws not only on Brookings’s deep bench of China and East Asia experts, but also on the tremendous breadth of the institution’s security, strategy, regional studies, technological, and economic development experts. Areas of focus include the evolution of China’s domestic institutions; great power relations; the emergence of critical technologies; Asian security; China’s influence in key regions beyond Asia; and China’s impact on global governance and norms. Global China: Assessing China’s Growing Role in the World provides the most current, broad-scope, and fact-based assessment of the implications of China’s rise for the United States and the rest of the world.

Ecological Restoration Law Afshin Akhtar-Khavari, Benjamin J. Richardson, 2019-01-25
Ecological restoration is as essential as sustainable development for the health of the biosphere. Restoration, however, has been a low priority of most countries' environmental laws, which tend to focus narrowly on rehabilitation of small, discrete sites rather than the more ambitious recovery of entire ecosystems and landscapes. Through critical theoretical perspectives and topical case studies, this

book's diverse contributors explore a more ambitious agenda for ecological restoration law. Not only do they investigate current laws and other governance mechanisms; they also consider the philosophical and methodological bases for the law to take ecological restoration more seriously. Through exploration of themes relating to time, space, geography, semiotics, social justice, and scientific knowledge, this book offers innovative and critical insights into ecological restoration law.

Evaluation of Energy Efficiency and Flexibility in Smart Buildings Alessia Arteconi, 2021-01-21 This Special Issue "Evaluation of Energy Efficiency and Flexibility in Smart Buildings" addresses the relevant role of buildings as strategic instruments to improve the efficiency and flexibility of the overall energy system. This role of the built environment is not yet fully developed and exploited and the book content contributes to increasing the general awareness of achievable benefits. In particular, different topics are discussed, such as optimal control, innovative efficient technologies, methodological approaches, and country analysis about energy efficiency and energy flexibility potential of the built environment. The Special Issue offers valuable insights into the most recent research developments worldwide.

The Genesis of a Policy Honae Cuffe, 2021-11-16 The years 1921–57 marked a period of immense upheaval for Australia as the nation navigated economic crises, the threat of aggressive Japanese expansion and shifting power distributions with the world transitioning from British leadership to that of the US. This book offers a reassessment of Australia's foreign policy origins and maturation during these tumultuous years. Successive Australian governments carefully observed these global and regional forces. The policy that developed in response was an integrated one—that is, one that sought to balance Australia's particular geopolitical circumstances with great power relationships and, in assessing the value of these relationships, ensure that the nation's trade,

security and diplomatic interests were served. Amid the economic and strategic uncertainty of the interwar years, the Australian government acknowledged the shifting power distributions in the global and Asia-Pacific orders and that neither the policies of Britain nor the US completely served the national interest. The nation, accordingly, sought to intervene within the policies of the great powers to ensure its particular interests were secured. This geopolitically informed, interventionist approach, which had its genesis in the 1930s, is traced throughout the 1940s and 1950s, highlighting Australia's gradual and uneven transition from the British world order to that of the US and the frank assessments made about which relationship best served Australia's interests. The *Genesis of a Policy* identifies a comprehensive and pragmatic approach—albeit not always effectively executed—in Australian foreign policy tradition that has not been previously examined.

Someone Is Hiding Something Richard Belzer, George Noory, David Wayne, 2015-02-17 A year after the disappearance and commencement of the international search for Malaysia Airlines Flight 370, no sign of the plane has been found—no debris, no bodies, no sign of the much-talked-about black box. Richard Belzer, George Noory, and David Wayne want to know why. Scrutinizing the theories the media and politicians claim are the “most likely” reasons the plane crashed, Belzer, Noory, and Wayne argue that if a year after a huge Boeing 777 has gone missing, and there's still no sign of it whatsoever, it's time to think outside the box. The public needs to stop being misled. If a plane and its passengers went missing once, what's to stop it from happening again? Some of the theories the authors consider seem implausible on the surface, but the thorough research they've done and the continual failure of politicians, aviation authorities, and military members around the world to give any indication they're wrong makes their arguments as good—if not better—than the

more widely shared ones. The title of this thought-provoking volume, *Someone is Hiding Something*, is a line spoken by former Malaysian Prime Minister Mahathir Mohamad—perhaps the only government official to publicly acknowledge the true reason that neither Flight 370 nor the 239 people onboard have been found.

Cloud Computing Venkata Josyula, Malcolm Orr, Greg Page, 2012 The complete guide to provisioning and managing cloud-based Infrastructure as a Service (IaaS) data center solutions Cloud computing will revolutionize the way IT resources are deployed, configured, and managed for years to come. Emotions and Crime Michael Hviid Jacobsen, Sandra Walklate, 2019-06-11 In spite of the fact that crime is an emotive topic, the question of emotion has been largely overlooked in criminological research, which has tended instead to examine criminal conduct in terms of structural background

variables or rational decision-making. Building on research into emotions within sociology, this book seeks to show how criminologists can in fact take emotions seriously and why criminology needs to begin considering emotions as a central element of its theoretical, conceptual and methodological apparatus. Thematically organised and presenting both empirical and theoretical studies, *Emotions and Crime* pays attention to the different emotional dimensions of crime, victimhood, the criminal justice system, the practice of criminological research and the discipline of criminology. Bringing together the work of an international team of authors and discussing research into violence, punishment, gender, imprisonment and mass atrocity, this volume shows how crime and emotions are inextricably connected, and illustrates both the hidden and pervasive role of emotions in criminological work.

Global Heating and the Australian Far Right Imogen Richards, Gearóid Brinn, Callum Jones, 2023-12-01 *Global Heating and the Australian Far Right* examines the environmental politics of far-right actors and movements in Australia, exploring their broader political context and responses to climate change. The book traces the development of far-right pseudo-environmentalism and territorial politics, from colonial genocide and Australian nationalism to extreme-right political violence. Through a critical analysis of news and social media, it reveals how denialist and resignatory attitudes towards climate change operate alongside extreme right accelerationism, in a wider Australian political context characterised by reactionary fossil fuel politics and neoliberal New Right climate change agendas. The authors scrutinise the manipulation of environmental politics by contemporary Australian far- and extreme-right actors in cross-national online media. They also assess the political-ideological context of the contemporary far right, addressing intergovernmental approaches to security threats connected to the far right and climate change, and the emergence of

radical environmentalist traditions in 'New Catastrophism' literature. The conclusion synthesises key insights, analysing the mainstreaming of ethnonationalist and authoritarian responses to global heating, and potential future trajectories of far-right movements exploiting the climate crisis. It also emphasises the necessity for radical political alternatives to counter the far right's exploitation of climate change. This book will be of interest to researchers of climate change, the far right, neoliberal capitalism, extremism and Australian politics.

Indigenous People, Crime and Punishment Thalia Anthony, 2013-07-24 Indigenous People, Crime and Punishment examines criminal sentencing courts' changing characterisations of Indigenous peoples' identity, culture and postcolonial status. Focusing largely on Australian Indigenous peoples, but drawing also on the Canadian experiences, Thalia Anthony critically analyses how the judiciary have interpreted Indigenous difference. Through an analysis of Indigenous sentencing remarks over a fifty year period in a number of jurisdictions, the book demonstrates how judicial discretion is moulded to dominant white assumptions about Indigeneity. More specifically, Indigenous People, Crime and Punishment shows how the increasing demonisation of Indigenous criminality and culture in sentencing has turned earlier 'gains' in the legal recognition of Indigenous peoples on their head. The recognition of Indigenous difference is thereby revealed as a pliable concept that is just as likely to remove concessions as it is to grant them. Indigenous People, Crime and Punishment suggests that Indigenous justice requires a two-way recognition process where Indigenous people and legal systems are afforded greater control in

sentencing, dispute resolution and Indigenous healing.

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources. Due to entrenched societal inequities and widespread authoritarian governance, however, the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations. These effects are particularly evident in both Thailand and Myanmar (Burma), which, located at the crossroads of Asia, are increasingly engaged in the cross-border energy trade. Based on extensive fieldwork and theoretical analysis this ground-breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing, in the absence of effective and democratic governments, in providing 'activist environmental governance' for energy projects throughout the region. By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications

for the sustainable and equitable development of the South's natural resources.
