Quiet Susan Cain, 2013-01-29 #1 NEW YORK TIMES BESTSELLER • Experience the book that started the Quiet Movement and revolutionized how the world sees introverts—and how introverts see themselves—by offering validation, inclusion, and inspiration “Superbly researched, deeply insightful, and a fascinating read, *Quiet* is an indispensable resource for anyone who wants to understand the gifts of the introverted half of the population.”—Gretchen Rubin, author of *The Happiness Project* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY People • O: The Oprah Magazine • Christian Science Monitor • Inc. • Library Journal • Kirkus Reviews At least one-third of the people we know are introverts. They are the ones who prefer listening to speaking; who innovate and create but dislike self-promotion; who favor working on their own over working in teams. It is to introverts—Rosa Parks, Chopin, Dr. Seuss, Steve Wozniak—that we owe many of the great contributions to society. In *Quiet*, Susan Cain argues that we dramatically undervalue introverts and shows how much we lose in doing so. She charts the rise of the Extrovert Ideal throughout the twentieth century and explores how deeply it has come to permeate our culture. She also introduces us to successful introverts—from a witty, high-octane public speaker who recharges in solitude after his talks, to a record-breaking salesman who quietly taps into the power of questions. Passionately argued, impeccably researched, and filled with indelible stories of real people, *Quiet* has the power to permanently change how we see introverts and, equally important, how they see themselves. Now with Extra Libris material, including a reader’s guide and bonus content

*Keeping the Wild* George Wuerthner, Eileen Crist, Tom Butler, 2014-05-06 Is it time to embrace the so-called “Anthropocene”—the age of human dominion—and to abandon tried-and-true conservation tools such as parks and wilderness areas? Is the future of Earth to be fully domesticated, an engineered global garden managed by technocrats to serve humanity? The schism between advocates of rewilding and those who accept and even celebrate a “post-wild” world is arguably the hottest intellectual battle in contemporary conservation. In *Keeping the Wild*, a group of prominent scientists, writers, and conservation activists responds to the Anthropocene-boosters who claim that wild nature is no more (or in any case not much worth caring about), that human-caused extinction is acceptable, and that “novel ecosystems” are an adequate replacement for natural landscapes. With rhetorical fists swinging, the book’s contributors argue that these “new environmentalists” embody the hubris of the managerial mindset and offer a conservation strategy that will fail to protect life in all its buzzing, blossoming diversity. With essays from Eileen Crist, David Ehrenfeld, Dave Foreman, Lisi Krall, Harvey Locke, Curt Meine, Kathleen Dean Moore, Michael Soulé, Terry Tempest Williams and other leading thinkers, *Keeping the Wild* provides an introduction to this important debate, a critique of the Anthropocene boosters’ attack on traditional conservation, and unapologetic advocacy for wild nature.

*Understanding Racism in a Post-Racial World* Sunshine Kamaloni, 2019-02-27 This book addresses the question: how can we talk about race in a world that is considered post-racial, a world where race doesn’t exist? Kamaloni engages with the tradition of everyday racism and traces the process of racialisation through the interaction of bodies in space. Exploring the embodied experience exposes the idea of post-racialism as a response to continued cultural anxieties about race and the desire to erase it. *Understanding Racism in a Post-Racial World* presents a broader question about what everyday encounters about race might tell us about the current cultural construction of race. The book provides a much-needed investigation of the intersection of race, bodies and space as a critical part of how bodies and spaces become racialised, and will be of value to students and scholars interested in understanding and discussing race across interdisciplinary areas such as cultural studies, communication, gender studies, geography, body studies, literature studies and urban studies.

*Quiet Power* Susan Cain, Gregory Mone, Erica Moroz, 2016-05-03 The monumental bestseller *Quiet* has been recast in a new edition that empowers introverted kids and teens Susan Cain sparked a worldwide conversation when she published *Quiet: The Power of Introverts in a World That Can’t Stop Talking*. With her inspiring book, she permanently changed the way we see introverts and the way introverts see themselves. The original book focused on the workplace, and Susan realized that a version for and about kids was also badly needed. This book is all about kids’ world—school, extracurriculars, family life, and friendship. You’ll read about actual kids who have tackled the challenges of not being extroverted and who have made a mark in their own quiet way. You’ll hear Susan Cain’s own story, and you’ll be able to make use of the tips at the end of each chapter. There’s even a guide at the end of the book for parents and teachers. This insightful, accessible, and empowering book, illustrated with amusing comic-style art, will be eye-opening to extroverts and introverts alike.

**Rock, Paper, Scissors** Len Fisher, 2008-11-04 Praised by Entertainment Weekly as “the man who put the fizz into physics,” Dr. Len Fisher turns his attention to the science of cooperation in his lively and thought-provoking book. Fisher shows how the modern science of game theory has helped biologists to understand the evolution of cooperation in nature, and investigates how we might apply those lessons to our own society. In a series of experiments that take him from the polite confines of an English dinner party to crowded supermarkets, congested Indian roads, and the wilds of outback Australia, not to mention baseball strategies and the intricacies of quantum mechanics, Fisher sheds light on the problem of global cooperation. The outcomes are sometimes hilarious, sometimes alarming, but always revealing. A witty romp through a serious science, *Rock, Paper, Scissors* will both teach and delight anyone interested in what it takes to get people to work together.

**Dying: A Memoir** Cory Taylor, 2017-08-01 Bracing and beautiful . . . Every human should read it. —The New York Times A New York Times Book Review Editors’ Choice At the age of sixty, Cory Taylor is dying of melanoma-related brain cancer. Her illness is no longer treatable: she now weighs less than her neighbor’s retriever. As her body weakens, she describes the experience—the vulnerability and strength, the courage and humility, the anger and acceptance—of knowing she will soon die. Written in the space of a few weeks, in a tremendous creative surge, this powerful and beautiful memoir is a clear-eyed account of what dying teaches: Taylor describes the tangle of her feelings, remembers the lives and deaths of her parents, and examines why she would like to be able to choose the circumstances of her death. Taylor’s last words offer a vocabulary for readers to speak about the most difficult thing any of us will face. And while *Dying: A Memoir* is a deeply affecting meditation on death, it is also a funny and wise tribute to life.

**An Epidemic of Rumors** Jon D. Lee, 2014-01-14 In *An Epidemic of Rumors*, Jon D. Lee examines the human response to epidemics through the lens of the 2003 SARS epidemic. Societies usually respond to the eruption of disease by constructing stories, jokes, conspiracy theories, legends, and rumors, but these narratives are often more damaging than the diseases they reference. The information disseminated through them is often inaccurate, incorporating xenophobic explanations of the disease’s origins and questionable medical information about potential cures and treatment. Folklore studies brings important and useful perspectives to understanding cultural responses to the outbreak of disease. Through this etiological study Lee shows the similarities between the narratives of the SARS outbreak and the narratives of other contemporary disease outbreaks like AIDS and the H1N1 virus. His analysis suggests that these disease narratives do not spring up with new outbreaks or diseases but are in continuous circulation and are recycled opportunistically. Lee also explores whether this predictability of vernacular disease narratives presents the opportunity to create counter-narratives released systematically from the government or medical science to stymie the negative effects of the fearful rumors that so often inflame humanity. With potential for practical application to public health and health policy, *An Epidemic of Rumors* will be of interest to students and scholars of health, medicine, and folklore.

*Redesigning Distribution* Anne Alstott, Bruce Ackerman, Philippe Van Parijs, 2020-05-05 Volume V in the acclaimed Real Utopias Project series, edited by Erik Olin Wright. Are there ways that contemporary capitalism can be rendered a dramatically more egalitarian economic system without destroying its productivity and capacity for growth? This book explores two proposals, unconditional basic income and stakeholder grants, that attempt just that. In a system of basic income, as elaborated by Philippe van Parijs, all citizens are given a monthly stipend sufficient to provide them with a no-frills but adequate standard of living. This monthly income is universal rather than means-tested, and it is unconditional - receiving the basic income does not depend upon performing any labor services or satisfying other conditions. It affirms the idea that as a matter of basic rights, no one should live in

poverty in an affluent society. In a system of stakeholder grants, as discussed by Bruce Ackerman and Anne Alstott, all citizens upon reaching the age of early adulthood receive a substantial one-time lump-sum grant sufficiently large so that all young adults would be significant wealth holders. Ackerman and Alstott propose that this grant be in the vicinity of \$80,000 and be financed by an annual wealth tax of roughly 2 percent. A system of stakeholder grants, they argue, expresses a fundamental responsibility: every American has an obligation to contribute to a fair starting point for all.

**Advanced Topics in Types and Programming Languages** Benjamin C. Pierce, 2004-12-23 A thorough and accessible introduction to a range of key ideas in type systems for programming language. The study of type systems for programming languages now touches many areas of computer science, from language design and implementation to software engineering, network security, databases, and analysis of concurrent and distributed systems. This book offers accessible introductions to key ideas in the field, with contributions by experts on each topic. The topics covered include precise type analyses, which extend simple type systems to give them a better grip on the run time behavior of systems; type systems for low-level languages; applications of types to reasoning about computer programs; type theory as a framework for the design of sophisticated module systems; and advanced techniques in ML-style type inference. Advanced Topics in Types and Programming Languages builds on Benjamin Pierce's Types and Programming Languages (MIT Press, 2002); most of the chapters should be accessible to readers familiar with basic notations and techniques of operational semantics and type systems—the material covered in the first half of the earlier book. Advanced Topics in Types and Programming Languages can be used in the classroom and as a resource for professionals. Most chapters include exercises, ranging in difficulty from quick comprehension checks to challenging extensions, many with solutions.

**Humanizing Digital Reality** Klaas De Rycke, Christoph Gengnagel, Olivier Baverel, Jane Burry, Caitlin Mueller, Minh Man Nguyen, Philippe Rahm, Mette Ramsgaard Thomsen, 2017-09-15 This book aims at finding some answers to the questions: What is the influence of humans in controlling CAD and how much is human in control of its surroundings? How far does our reach as humans really go? Do the complex algorithms that we use for city planning nowadays live up to their expectations and do they offer enough quality? How much data do we have and can we control? Are today's inventions reversing the humanly controlled algorithms into a space where humans are controlled by the algorithms? Are processing power, robots for the digital environment and construction in particular not only there to rediscover what we already knew and know or do they really bring us further into the fields of constructing and architecture? The chapter authors were invited speakers at the 6th Symposium Design Modelling Symposium: Humanizing Digital Reality, which took place in Ensa-Versailles, France from 16 - 20 September 2017.

**The Whale Road** Robert Low, 2007-08-21 A band of brothers, committed only to each other, rides the waves, fighting for the highest bidder, treading the whale road in search of legendary relics. Life is savage aboard a Viking raiding ship. When Orm Rurikson is plucked from the snows of Norway to brave the seas on the Fjord Elk, he becomes an unlikely member of the notorious crew. Although young, Orm must quickly become a warrior if he is to survive. His fellow crew are the Oathsworn---named after the spoken bond that ties them in brotherhood. They fight hard, they drink hard, and they always defend their own. But times are changing. Loyalty to the old Norse Gods is fading, and the followers of the mysterious White Christ are gaining power across Europe. Hired as relic hunters, the Oathsworn are sent in search of a sword believed to have killed the White Christ. Their quest will lead them onto the deep and treacherous waters of the whale road, toward the cursed treasure of Attila the Hun and to a challenge that presents the ultimate threat. Robert Low has written a stunning epic, a remarkable debut novel. Not only a compelling narrative, The Whale Road also brings a new Viking landscape stretching from Scotland through the Baltic and on to Istanbul. International Praise for The Whale Road: A company of warriors, desperate battles, an enthralling read. ---Bernard Cornwell A fantastic book, one of the best I have read for years. There's a wonderful earthiness to the proceedings and he creates a tangible sense of being there. There's a sturdy, lyrical, and epic quality about the writing that makes it feel like the kind of saga a Viking would recount in his old age. ---Simon Scarrow A stirring Viking series of blockbuster battles and religious intrigue. ---Publishing News Action-packed and evocative. ---Herald (Glasgow)

**Located Research** Angela Campbell, Michelle Duffy, Beth Edmondson, 2019-11-29 This book examines the diversity of practice in regional research and its contribution to local, national and global issues. Three themes are advanced here: Place and change, Transition and resilience, and Challenges for the future. Contributors embrace frameworks of co-design and transdisciplinary practice to build communities of practice in response to lived

experience in regional contexts. Their work highlights the strategic importance of a regional focus at a time when global connectivity and mobility is increasing and the complexity of ‘wicked’ problems demands more than one approach or solution. Such complex problems require nuanced, and at times ‘bespoke’ methodological approaches to better understand and support not just regional adaptation, resilience and transformation, but to manage all these things at a time when change is everywhere.
