John V. Banta, David Scrutton

Discourses of Disorder Christopher Hart, Darren Kelsey, 2020-08-31 Drawing on insights from linguistics, multimodality and media studies, this book explores the ideological dimensions of media representation and its function in discursively constructing public understandings of, and attitudes toward, civil disorder.

Atlas of Conducted Electrical Weapon Wounds and Forensic Analysis Jeffrey D. Ho, Donald M. Dawes, Mark W. Kroll, 2012-06-15 Atlas of Conducted Electrical Weapon Wounds and Forensic Analysis provides a comprehensive publication on the subject of Conducted Electrical Weapon (CEW) wounds and signature markings created by this class of weapon. This volume will serve as a very useful resource for all professions tasked with assisting persons that have allegedly been subjected to a CEW exposure. The volume provides an introduction to basic CEW technology and the types of CEWs currently available. It also serves as a comprehensive pictorial atlas of signature markings that CEW exposures make in the immediate and more remote post-exposure periods. Also, it discusses the ability of forensic specialty examinations of the CEW itself to aid in the determination of whether the alleged CEW exposure is consistent with the objective evidence and the subjective statements. Finally, this text addresses the important and growing area of factitious CEW markings that will be useful for consideration by investigators and litigators. Atlas of Conducted Electrical Weapon Wounds and Forensic Analysis provides an objective atlas of evidence for reference that will benefit those professionals who often must make diagnostic, treatment or legal judgments on these cases including Emergency and Primary-Care Physicians, Medical Examiners, Forensic Pathologists, Coroners, Law

Enforcement Investigators, and Attorneys.

The Archaeology of the Logging Industry John G. Franzen, 2020-08-18 The American lumber industry helped fuel westward expansion and industrial development during the nineteenth and twentieth centuries, building logging camps and sawmills—and abandoning them once the trees ran out. In this book, John Franzen surveys archaeological studies of logging sites across the nation, explaining how material evidence found at these locations illustrates key aspects of the American experience during this era. Franzen delves into the technologies used in cutting and processing logs, the environmental impacts of harvesting timber, the daily life of workers and their families, and the social organization of logging communities. He highlights important trends, such as increasing mechanization and standardization, and changes in working and living conditions, especially the food and housing provided by employers. Throughout these studies, which range from Michigan to California, the book provides access to information from unpublished studies not readily available to most researchers. The Archaeology of the Logging Industry also shows that when archaeologists turn their attention to the recent past, the discipline can be relevant to today's ecological crises. By creating awareness of the environmental deterioration caused by industrial-scale logging during what some are calling the Anthropocene, archaeology supports the hope that with adequate time for recovery and better global-scale stewardship, the human use of forests might become sustainable. A volume in the series the American Experience in Archaeological Perspective, edited by Michael S. Nassaney

Financial Markets and Institutions in the Arab Economy Niḍāl Rashīd Ṣabrī, 2008 The Arab economy witnessed in the last three decades some developments as expressed by GDP per capita as well as by the human development index. However, such developments are not enough. It's varied, not comprehensive, and not as hoped. It's varied not only between individual states, but also within sectors of economy as well as within segments of the society including women and children. This conclusion is valid to the Arab economy in general as well as to the Arab financial markets and institutions. Accordingly, this book aims to delve into the theme of the financial sector including financial markets and institutions within the context of the Arab economy.

Applications of Toxicogenomic Technologies to Predictive Toxicology and Risk Assessment National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Board on Environmental Studies and Toxicology, Committee on Applications of Toxicogenomic Technologies to Predictive Toxicology, 2007-11-19 The new field of toxicogenomics presents a potentially powerful set of tools to better understand the health effects of exposures to toxicants in the environment. At the request of the National Institute of Environmental Health Sciences, the National Research Council assembled a committee to identify the benefits of toxicogenomics, the challenges to achieving them, and potential approaches to overcoming such challenges. The report concludes that realizing the potential of toxicogenomics to improve public health decisions will require a concerted effort to generate data, make use of existing data, and study data in new ways—an effort requiring funding, interagency coordination, and data management strategies.

Tracing Tectonic Deformation Using the Sedimentary Record Tom McCann, Aline Saintot, 2003 The study of sediments and sedimentary basins in terms of their tectonic environment requires a multidisciplinary approach and has increasingly drawn both techniques and objectives from fields outside sedimentology. Studies presented in this volume range across a wide spectrum from the analysis of sedimentary sequence architecture at basin scale down to the chemical properties of individual grains, and include studies from a
