**Smartphone-based Learning in the Japanese ESL Classroom** Nicolas Gromik, 2017-05-11 Mobile Assisted Learning emerged from Computer Assisted Learning, with researchers extending computer-based activities to mobile platforms, but differs from the latter in many ways. First, it is obviously mobile, but, second, smartphones have converged many features and software that were previously accessible through a range of digital tools. Thirdly, Mobile Assisted Learning allows interaction with social media. Educators are well-advised to consider smartphone video-based

learning and to understand the many possibilities it affords. This book provides an account of the integration of smartphone video recording in the language classroom. It outlines and reports on the implementation process and the practical issues related to this learning method. Using simple digital storytelling, and mini-documentary filmmaking, students are able to learn to speak in a foreign language, while at the same time exploring and experimenting with video production. As such, this book will take readers on a journey through various educational concepts that enhance the formulation of a smartphone based learning approach, as well as suggesting that digital video production is not just a task, it is a 21st century skill necessary for all academics and learners.

**Teaching Academic ESL Writing** Eli Hinkel, 2003-10-17 Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar

fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student-writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing, they must have the foundations of language in place--the language tools (grammar and vocabulary) they need to build a text. This text offers a compendium of techniques for teaching writing, grammar, and lexis to second-language learners that will help teachers effectively target specific problem areas of students' writing. Based on the findings of current research, including a large-scale study of close to 1,500 non-native speakers' essays, this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students' writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners' language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second-language teachers of writing and second-language writers. Parts II and III include the key elements of classroom teaching: what to teach and why, possible ways to teach the material in the classroom, common errors found in student prose and ways to teach students to avoid them, teaching activities and suggestions, and questions for discussion in a teacher-training course. Appendices to chapters provide supplementary word and phrase lists, collocations, sentence chunks, and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post-secondary EAP students and as a professional resource for teachers of students in EAP courses.
