Learn to win and learn to limit your losses. Learn strategy from 30 minutes play to 50 thousand plays. At one time there was a bug in Game King video poker machines when double up turned on. John Kane learned how to work the bug to his advantage. QUOTE from wired.com article: "John Kane was on a hell of a winning streak. On July 3, 2009, he walked alone into the high-limit room at the Silverton Casino in Las Vegas and sat down at a video poker machine called the Game King. Six minutes later the purple light on the top of the machine flashed, signaling a \$4,300 jackpot. Kane waited while the slot attendant verified the win and presented the IRS paperwork—a procedure required for any win of \$1,200 or greater—then, 11 minutes later, ding ding ding!, a \$2,800 win. A \$4,150 jackpot rolled in a few minutes after that.....At 12:34 pm, the Game King lit up with its seventh jackpot in an hour and a half, a \$10,400 payout....As they watched the replay for clues, Kane chalked up an eighth jackpot worth \$8,200....."This book covers the theory with simplified math. Rules to play for fun & win are presented in a simplified manner. Over 140 pages of real video poker screenshots illustration.Video poker is an

Frugal Video Poker Scouting Guide Jean Scott, Viktor Nacht, 2023-04-20 This guide is a handy video poker tool, a booklet of pay schedules for the most popular VP games that details the return for each game, designed to make finding profitable video poker games in any casino easy for anyone. The booklet is just 3.5 inches tall and 7 inches long, similar in size to a checkbook, and is spiral bound so it can be opened to any page and folded over while scouting for a particular game. It's made with heavy paper and laminated covers for durability. The guide contains 184 pay schedules for 37 different games, and great care was taken to find the most popular pay schedules across the country, so that this tool is not just for use in Nevada, but also for popular East Coast and Southern games as well. The guide also contains a few pages of instructions on how to read the charts, a table of contents, and an alphabetical listing of games. As a quick explanation, you can see that the payouts are listed for the one-coin payoff, except as noted for specific payoffs requiring a fifth coin. The paying pair is usually jacks or better, but differences are noted wherever they occur, such as for the game of Pick 'Em. There's also a volatility rating, which is a rough measure of what kind of ups and downs you can expect while playing, rated from one to four \$. The return for each schedule is provided, as well as the return for the Multi-Strike and Super Times Pay versions of those games. Finally, an approximate royal progressive breakeven point is listed for both quarter and dollar plays.
