Improving Student Engagement and Development through Assessment Lynn

Clouder,Christine Broughan,Steve Jewell,Graham Steventon,2013-05-20 With a unique focus on the relationship between assessment and engagement this book explores what works in terms of keeping students on course to succeed. Against a backdrop of massification and the associated increase in student diversity there is an escalating requirement for personalized, technology driven learning in higher education. In addition, the advent of student fees has promoted a consumer culture resulting in students having an increasingly powerful voice in shaping curricula to their own requirements. How does one engage and retain a group of students of such diverse culture, ethnicity, ambition and experience? Using examples from a variety of institutions worldwide this edited collection provides a well-researched evidence base of current thinking and developments in assessment practices in higher education. The chapters discuss: Staff and student views on assessment Engaging students through assessment feedback Assessment for learning Assessing for employability Interdisciplinary and transnational assessment Technology supported assessment for retention The book draws together a wealth of expertise from a range of contributors including academic staff, academic developers, pedagogical researchers, National Teaching Fellows and Centres for Excellence in Higher Education. Recognising that a pedagogy which is embedded and taken-for-granted in one context might be completely novel in another, the authors share best practice and evaluate evidence of assessment strategies to enable academic colleagues to make informed decisions about adopting new and creative approaches to assessment. This interdisciplinary text will prove an invaluable tool for those working and studying in higher education.

Becoming a School Consultant Sylvia Rosenfield,2012-05-22 Most consultation courses in school psychology focus heavily on theoretical models of consultation and associated intervention procedures. Little time is devoted to developing communication and process skills. Yet these process skills are key to properly identifying student problems and selecting appropriate interventions. Without skillfully conducted consultations, implementation and evaluation of an intervention can be minimal. This book is designed to help students develop the process skills needed to become effective school consultants in consultee-centered consultation, with special emphasis on the instructional consultation model. The authors address specific skills and issues faced by novice consultants and documents how they worked through particular issues that are likely to occur in school consultation practice.

The Strange Child Andrea Gevurtz Arai, 2016-03-23 *The Strange Child* examines how the Japanese financial crisis of the 1990s gave rise to the child problem, a powerful discourse of social anxiety that refocused concerns about precarious economic futures and shifting ideologies of national identity onto the young. Andrea Gevurtz Arai's ethnography details the different forms of social and cultural dislocation that erupted in Japan starting in the late 1990s. Arai reveals the effects of shifting educational practices; increased privatization of social services; recessionary vocabulary of self-development and independence; and the neoliberalization of patriotism. Arai argues that the child problem and the social unease out of which it emerged provided a rationale for reimagining governance in education, liberalizing the job market, and a new role for psychology in the overturning of national-cultural ideologies. *The Strange Child* uncovers the state of nationalism in contemporary Japan, the politics of distraction around the child, and the altered life conditions of—and alternatives created by—the recessionary generation.

The Battlecruiser HMS HOOD Bruce Taylor,2008-04-30 The battlecruiser HMS Hood is one of the great warships of history. Unmatched for beauty, unequalled for size, for twenty years the Hood was the glory ship of the Royal Navy, flying the flag across the world in the twilight years of the British Empire. Here, in words, photos and colour illustrations, is the story of her life, her work and her people from keel-laying on the Clyde in 1916 to destruction at the hands of the Bismarck in 1941. Among the eye-catching strengths of the book is a unique gallery of photos, including stills from a recently discovered piece of colour footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art - a man who worked with the film director James Cameron (of Titanic fame). A wealth of new information on Hood's structure and operation make it essential reading for the enthusiast, modeller and historian alike. Hugely successful from its first publication, this is the third printing of the ultimate book on the ultimate ship of the pre-war era.

New Developments in Combustion Research William J. Carey,2006 Combustion or burning is an exothermic reaction between a substance and a gas to release heat. Combustion normally occurs in oxygen (often in the form of gaseous O₂) to form oxides, However, combustion can also take place in other gases like chlorine. The products of such reactions usually include water (H₂O) as well as carbon monoxide (CO) or carbon dioxide (CO₂), or both. Other by-products, such as partially reacted fuel and elemental carbon (C), may generate visible smoke and soot. This book presents leading research from around the world in this frontal field.

Child Neuropsychology John E. Obrzut,George W. Hynd,2013-09-24 Child Neuropsychology, Volume 2: Clinical Practice attempts to bridge the gap between neurodevelopmental theory and clinical practice with a pediatric population. The focus is on some of the more common neuropsychological disorders encountered in children, along with neuropsychological evaluation, intervention, and treatment. Comprised of 11 chapters, this volume begins with an overview of issues and perspectives in clinical child neuropsychology, followed by a discussion on neurodevelopmental learning disorders in children. The neuropsychological basis of psychiatric disorders in children are then examined, together with epilepsy and closed-head injury as well as different approaches and issues relevant to neuropsychological evaluation of children. Subsequent chapters deal with the importance of soft signs and neuropsychological screening; neuropsychological assessment of children; actuarial and clinical assessment practices; and intervention and treatment. The book also presents an overview of how one might conceptualize and integrate differential diagnosis of neurodevelopmental learning disabilities with appropriate curriculum-based intervention strategies. The final chapter considers the broader applications of behavioral neuropsychology. This book is relevant to clinical child or pediatric neuropsychologists, child or school psychologists, physicians interested in pediatric neuropsychological disorders, and other professionals who provide services to children with neurologically based disorders. It may also serve as a reference for audiologists, speech

and language therapists, or educators.

Psychological and Behavioral Examinations in Cyber Security McAlaney, John, Frumkin, Lara A., Benson, Vladlena, 2018-03-09 Cyber security has become a topic of concern over the past decade. As many individual and organizational activities continue to evolve digitally, it is important to examine the psychological and behavioral aspects of cyber security. *Psychological and Behavioral Examinations in Cyber Security* is a critical scholarly resource that examines the relationship between human behavior and interaction and cyber security. Supplemented by online ancillaries, this text offers a wealth of knowledge on various aspects of life for older people and the role of leisure in their lives.

The Chinese Imperial Examination System Rui Wang, 2013 This is the first English publication that is a reference book to introduce the essential literature of the Chinese imperial examination system, an important guide for any reader who wishes to better understand China.

Enhancing Learning through Formative Assessment and Feedback Alastair Irons, Sam Elkington, 2021-08-25 Assessment is a critical aspect of higher education because it has a range of powerful impacts on what staff and students do and how universities operate. Underpinned by relevant theory and practical advice this fully updated new edition takes into account the changing expectation of students in the context of an increasingly complex and shifting higher education environment to promote the role of formative assessment and formative feedback and its impact on shaping the student learning experience. Presented through the lens of contemporary perspectives, empirical evidence, and case studies across a broad range of subject disciplines, this new edition aims to encourage teaching and support staff to focus on the promotion of student learning through designing and embedding high-impact formative assessment processes and activities. Key content covers: the theoretical and philosophical aspects of formative assessment and formative feedback; the learning environment in which students undertake their learning activities, helping teachers develop appropriate formative assessment and provide effective formative feedback; the impact of formative assessment and formative feedback activities have on learning, teaching, and assessment design, as well as on the academic workload of tutors; the contemporary issues and challenges currently driving research into formative assessment; the use of technology in formative assessment and how different tools and technologies allow for the provision of effective and efficient formative feedback; the benefits of understanding how students respond to formative assessment and formative feedback as an opportunity to review the effectiveness of the teaching and learning methods and techniques; the integral role of formative assessment and formative feedback plays in postgraduate research settings; and how innovations in formative assessment and feedback inform key developments in large-scale assessment change. Aimed at both experienced and early career practitioners in higher education, this text is ideal reading for educators who wish to see a movement away from a higher education system driven by summative assessment to one where a more holistic approach to education positions learning standards rather than measurement and grades as central to effective assessment and, crucially, to return to a focus on student learners.
