Ju 87 Stuka vs Royal Navy Carriers Robert Forsyth,2021-07-22 Ju 87 dive-bombers, originally developed for pin-pointing bombing missions against land targets and Allied naval vessels were deployed by both the Luftwaffe and the Regia Aeronautica against the Allied forces. Included in such a target were perhaps the greatest prize of all for a Stuka pilot: a British aircraft carrier. This superbly illustrated book looks at the duel between the Ju 87 Stuka and the aircraft carriers of the Royal Navy. Despite their gun protection ('pompoms') and their squadrons of fighters, these immense and mighty vessels proved irresistible targets to determined and experienced Stuka aces as they endeavoured to stop British naval intervention in the campaigns in Norway, Malta and Crete. By 1941, the Ju 87 had become known by the British as a fearsome aircraft following its operations in France, specifically at Dunkirk, as well as in the Balkans. For the Luftwaffe, it was an aircraft in which they still had great confidence despite its mauling in the Battle of Britain during the summer of 1940. This book examines the key attributes and shortcomings of both aircraft and carrier by analysing various compelling episodes including the dramatic attacks on Ark Royal by Stukageschwader (St.G) 1 off Norway in April 1940, the strikes by the Luftwaffe's St.G 1, St.G 2 and the Regia Aeronautica's 237° Squadriglia against Illustrious in Malta harbour. Aside from outstanding photography and artwork, this volume also include numerous personal accounts from Stuka crews, the pilots of carrier-borne fighters opposing them and the sailors embarked in the various carriers that came under attack.

Witchblade #87 Ron Marz,2005-06-01 Heart of The City...Detective Sara Pezzini finds herself with a new job description within the NYPD, and it's not one she's terribly happy about. But even before she can settle into her new role, she comes face-to-face with a murderous entity that's been lurking in the heart of the city for literally hundreds of years! Chris Bachalo and a brand-new status quo make this the perfect issue to jump on board.

CSL '87 Egon Börger,Hans Kleine Büning,Michael M. Richter,1988-09-14 This volume contains the papers which were presented to the workshop Computer-Science Logic held in Karlsruhe on October 12-16, 1987. Traditionally Logic, or more specifically, Mathematical Logic splits into several subareas: Set Theory, Proof Theory, Recursion Theory, and Model Theory. In addition there is what sometimes is called Philosophical Logic which deals with topics like nonclassical logics and which for historical reasons has been developed mainly at philosophical departments rather than at mathematics institutions. Today Computer Science challenges Logic in a new way. The theoretical analysis of problems in Computer Science for intrinsic reasons has pointed back to Logic. A broad class of questions became visible which is of a basically logical nature. These questions are often related to some of the traditional disciplines of Logic but normally without being covered adequately by any of them. The novel and unifying aspect of this new branch of Logic is the algorithmic point of view which is based on experiences people had with computers. The aim of the Computer-Science Logic workshop and of this volume is to represent the richness of research activities in this field in the German-speaking countries and to point to their underlying general logical principles.

Ultrasonics International 87 Yong Zhou,2013-09-17 Ultrasonics International 87 contains the Proceedings of the Ultrasonics International Conference and Exhibition held at London, United Kingdom on July 1987. The conference discussed and reviewed some of the developments in the field of ultrasonics. The compendium consists of over 150 contributed papers, four invited papers and three plenary papers. Topics discussed include generation of unipolar ultrasonic pulses by signal processing; scattering of longitudinal waves by partially closed slots; piezoelectric materials for ultrasonic transducers; and measuring turbulent flow characteristics using a multi- dimensional ultrasonic probe. Fiber optic sensors, medical imaging and inverse methods, and laser generation of ultrasound are covered as well. Physicians, technicians, researchers, and physical scientists will find the book insightful.

Class 87 Locomotives Andrew Cole,2018-12-15 Andrew Cole documents Class 87 locomotives. Thirty-six members of Class 87 were built at Crewe Works from 1973 onwards and were an instant success.

Geo-Platinum 87 H.M. Prichard,Philip J. Potts,2012-12-06 The Geo-Platinum 87 Symposium, held at the Open University during April 1987, was designed as a forum for presentation of new research results on the occurrence, genesis, geochemistry, mineralogy and analysis of the platinum-group elements (PGE). With the support of the Open University and the Mineral Industry Research Organisation, the symposium was attended by 115 representatives of university departments, research institutions and members of the mining and mineral exploration industries. An introduction to the symposium was provided by two invited papers from C. J. Morrissey (Riofinex North) and C. R. N. Clark (Johnson Matthey) which were designed to give perspective to the goals of PGE research work. The first of these papers gave a provocative insight into the aims and objectives of an exploration manager, examining the influence of supply, demand and perceived world reserves on exploration strategy. The second invited paper gave a valuable view of the industrial uses, market trends and predicted changes in the commercial value of the platinum-group elements from the standpoint of a refining company and supplier. These invited papers are reproduced in this volume and are followed by twenty four full papers and twenty abstracts that reflect the wide range of research topics presented at the symposium.

Organic Reactions, Volume 87 ,2015-09-08 The first chapter describes the manifold ways in which the latent functionality embedded in the humble heterocycle furan can be revealed by various oxidative processes. The second chapter details the fascinating cycloaddition and electrocyclization chemistry of unsaturated ketenes. The third chapter chronicles the development of a remarkable organometallic reaction of unactivated alkenes and alkynes, namely carbozincation.
