Overcoming the Oppressors Robert I. Rotberg,2023 This book is about southern Africa's long walk to freedom, about the overturning of colonial rule in the northern territories and the dissolution of backs-to-the-wall white settler suzerainty first in what became Zimbabwe and then in South Africa. Chapters on the individual countries detail the stages along their sometimes complicated and tortuous struggle to attain the political New Zion. We learn how and why the Federation of Rhodesia and Nyasaland failed, how and why apartheid eventually collapsed, and exactly how the various components of this heavily white conquered and later white oppressed domain transitioned via diverse fits and starts into today's assemblage of proud, politically-charged, and still mostly fragmented nation-states. But what did the new republics make of their hard won freedoms? That is the subject of more than half of this book. Having liberated themselves successfully, several soon dismantled democratic safeguards, established effective single-party states, closed their economies, deprived citizens of human rights and civil liberties, and exchanged economic progress for varieties of central planning experiments and stunted forms of protected economic endeavors. Only Botswana, of the new entities, embraced full democracy and good governance. The others, even South Africa, at first tightly regimented their economies and attempted severely to limit the degrees of economic freedom and social progress that citizens could enjoy. Corruption prevailed everywhere except Botswana. Today, as the chapters on contemporary southern Africa reveal, most of the southern half of the African continent is returning, if sometimes struggling, to return to the patterns probity and good governance that many countries abandoned in the decades after independence. Now there is a resurgence of high performance, which this book celebrates--

The fourth edition gives students even more help transitioning into college, with new coverage on communicating in college and new tips for college success. Read the preface.

Study! Robert Barrass,2005-08-18 Whether entering higher education straight from school, or returning to study later in life, students need to develop effective study skills to get the most out of a course. Whatever the subject, this book will help to achieve the aims of the student by offering practical advice and useful techniques for successful study. These skills are not always taught as part of courses because of time restriction, but with an

increased performance emphasis for lecturers they are vital to the success of the course. In addition to this with more and more people returning to education and undergoing Continuing Professional Development the audience for this book is growing rapidly. The book covers three main areas: * accepting responsibility for learning: personal well-being, avoiding stress and organising time * student centred learning: developing the ability to learn and communicate through thinking, listening, observing, writing and talking * revision and examination techniques: approaching examinations with confidence. With additional help of choosing the right course and a new section on computer skills, Study! will be a valuable addition to the bookshelf of any student.

Rebels All! Kevin Mattson,2008 He boldly compares the conservative intellectual movement to the radical Utopians among the New Left of the 1960s; and he explains how conservatism has ingested central features of American culture, including a distrust of sophistication and intellectualism and a love of popular culture, sensation, shock, and celebrity. Both a work of history and political criticism, *Rebels All!* shows how the conservative mind made itself appealing but also points to its inherent problems.--BOOK JACKET.

A Family of No Prominence Eugene Y. Park,2014-04-02 Koreans are known for their keen interest in genealogy and inherited ancestral status. Yet today's ordinary Korean would be hard pressed to explain the whereabouts of ancestors before the twentieth century. With *A Family of No Prominence*, Eugene Y. Park gives us a remarkable account of a nonelite family, that of Pak Tŏkhwa and his descendants (which includes the author). Spanning the early modern and modern eras over three centuries (1590–1945), this narrative of one family of the chungin class of people is a landmark achievement. What we do know of the chungin, or middle people, of Korea largely comes from profiles of wealthy, influential men, frequently cited as collaborators with Japanese imperialists, who went on to constitute the post-1945 South Korean elite. This book highlights many rank-and-file chungin who, despite being better educated than most Koreans, struggled to survive. We follow Pak Tŏkhwa's descendants as they make inroads into politics, business, and culture. Yet many members' refusal to link their family histories and surnames to royal forebears, as most other Koreans did, sets them apart, and facilitates for readers a meaningful discussion of identity, modernity, colonialism, memory, and historical agency.

Inclusion in the City Patricia Potts,2013-10-18 *Inclusion in the City* explores inclusion and exclusion in the context of policy and practice in one English city - Birmingham. Here, a commitment to redressing the inequalities experienced by many learners has been inhibited by difficulty in securing agreement to a definite policy for inclusion and, consequently, in sustaining initiatives for strengthening participation in community comprehensive education. Grounded in an understanding of inclusion as a political and moral project, the book presents a range of perspectives from policymakers and practitioners. Detailed case studies, based on research specially undertaken for this book, relate inclusion to key issues in contemporary education such as; the effects of selection by attainment; faith schools and their communities; single sex education and inclusive schools; participation in further education; and social mobility. Insightful, thought provoking and original, *Inclusion in the City* detaches processes of inclusion and exclusion from the language of educational reform. In so doing it highlights links between participation in education and poverty, gender and cultural background, as well as the absence of a link between urban and educational renewal.
