Impacts and strategic outcomes from non-mega sport events for local communities Marijke Taks,Laurence Chalip,B. Christine Green,2017-10-02 Do small- and medium-sized sporting events affect the overall wellbeing of people living in the host community? If so, how they do they affect local life? This book specifically addresses the strategic choices that host communities make when hosting non-mega sporting events, and looks at the outcomes of those choices. The contributions to this study assess a variety of tangible and intangible effects, including the economic and social impacts, and the effect on tourism and participation in sport. It contains analysis of a variety of events, including spectator and participant events, single-sport and multi-sport events, and one-day and multi-day events, all hosted in different types of cities and communities around the globe. Overall, this book identifies and extends our understanding of the nature, management, and implications of non-mega sporting events. The impacts and strategic outcomes highlighted here have practical value for sport event management and strategy, and advance our understanding of the economic and social consequences of hosting an event. Complexity and Sustainability in Megaprojects Edoardo Favari,Franca Cantoni,2023-05-31 This book showcases the discussion about megaprojects carried out at the MeRIT (Megaproject Research Interdisciplinary Team) workshop 2022: the crisis, discontinuity, rising prices, and supply chains disruption force radical reflection for those involved in megaprojects. It raises a modern-day challenge, the creation of value for stakeholders. Indeed, the aim of the volume is to encourage readers to think more broadly, articulately and less stringently than the mainstream claims. There is a need to design, implement, and manage megaprojects by abandoning the old paradigm that leveraged solely on time and cost. We need to move beyond that by going to explore the value generated, the positive impact on people, communities and territories. Economic, social and environmental sustainability takes on a new and broader articulation: issues of the circular economy applied to megaprojects are addressed and ample space is ensured for the inclusion of social needs in current practices.
