Methodological School of Management V. B. Khristenko,A. G. Reus,A. P. Zinchenko,2014-08-31 A comprehensive guide for business people, government administrators and specialists in management methodology, Methodological School of Management details the original and applied thinking, methods and approaches established by the school in the Soviet era and still operating successfully in modern Russia today. The Methodological School of Management is not an educational institution, but a range of management tools, which evolved as a part of the 'systems movement' during the second half of the twentieth century. The school was created by the pupils of Georgy Petrovich Shchedrovitsky (1929–1994) under whose leadership a body of knowledge – the 'starting capital' of the Methodological School of Management – took shape. The management tools developed by the school are used by its leaders in their current managerial practice. This practice extends to a number of fields: government administration, management of economic sectors, corporate governance and the management of individual corporations. Although the school is less well known to Western specialists in systems engineering methodology and management, this book aims to secure the school a place in the global systems engineering landscape. Its ideas have entered the tool kits of most major control systems and corporations in the world's leading economies, from NASA and Toyota to retail chains – a clear testimony to the value of Georgy Shchedrovitsky's research, ideas and the body of knowledge he left behind. Shortlisted for the CMI Management Book of the Year award, Methodological School of Management offers solutions for resolving tricky managerial situations and achieving organisational targets – essential reading for anyone learning how to manage people and issues alike.

Trends in Sustainable Buildings and Infrastructure Víctor Yepes,Ignacio Navarro Martínez,2021-06-11 The recently established Sustainable Development Goals call for a paradigm shift in the way that buildings and infrastructures are conceived. The construction industry is a major source of environmental impacts, given its great material consumption and energy demands. It is also a major contributor to the economic growth of regions, through the provision of useful infrastructure and generation of employment, among other factors. Conventional approaches underlying current building design practices fall short of covering the relevant environmental and social implications derived from inappropriate design, construction, and planning. The development of adequate sustainable design strategies is therefore becoming extremely relevant regarding the achievement of the United Nations 2030 Agenda Goals for Sustainable Development. This book comprises 11 chapters that highlight the actual research trends in the construction sector, aiming to increase the knowledge on sustainable design practices by highlighting the actual practices that explore efficient ways to reduce the environmental consequences related to the construction industry, while promoting social wellbeing and economic development. The chapters collect papers included in the Special Issue “Trends in Sustainable Buildings and Infrastructure” of the International Journal of Environmental Research and Public Health.

Impacts and strategic outcomes from non-mega sport events for local communities Marijke Taks,Laurence Chalip,B. Christine Green,2017-10-02 Do small- and medium-sized sporting events affect the overall wellbeing of people living in the host community? If so, how they do they affect local life? This book specifically addresses the strategic choices that host communities make when hosting non-mega sporting events, and looks at the outcomes of those choices. The contributions to this study assess a variety of tangible and intangible effects, including the economic and social impacts, and the effect on tourism and participation in sport. It contains analysis of a variety of events, including spectator and participant events, single-sport and multi-sport events, and one-day and multi-day events, all hosted in different types of cities and communities around the globe. Overall, this book identifies and extends our understanding of the nature, management, and implications of non-mega sporting events. The impacts and strategic outcomes highlighted here have practical value for sport event management and strategy, and advance our understanding of the economic and social

consequences of hosting an event. This book was originally published as a special issue of European Sport Management Quarterly.

Management and Leadership Development Christopher Mabey, Tim Finch Lees, 2007-12-12 'This is the first really thought-provoking book that I have read on management development. It is a book primarily addressed to students, but in this field, we are all students. It merits a wide readership both among practising managers as well as among those responsible for developing them' - Max Boisot, ESADE 'Mabey and Finch-Lees inject a breath of fresh air into the management development field by expanding upon its heretofore functionalist base. They offer an informative critique of mainstream views, featuring alternative discourses to examine such hard questions as why management development hasn't quite delivered on management's considerable investment in it. As a veritable tour de force in its absorbing integration and review of a large tract of literature, the book informs both management scholars and practitioners what might be expected from management development's intended but also unanticipated outcomes' - Joe Raelin, Northeastern University 'In a well-written, accessible and yet sophisticated text, Mabey and Finch-Lees show themselves to be as familiar with the latest in management development practice as they are with the sometimes arcane theoretical literature that surrounds it. Its great strength is to recognize the plurality of discourses - some overlapping and complementary, others distinct and oppositional - about the subject. This book can be recommended as a unique resource for students and scholars of management development' - Chris Grey, University of Warwick This book represents a significant step forward in the theory of management and leadership development. It offers an international perspective in this era of globalisation and a new and questioning perspective on the common belief that leadership is something completely different to, and more important than, management. This book will be of great help to the serious theorist and researcher of management and leadership development. It is an invaluable point of reference for a broad range of theory and research in this area, which it summarises with admirable brevity and clarity' - John G Burgoyne, Lancaster University Management School and Henley Management College Management development is a potent and high-profile human resource activity, involving some of the organizations' key players and attracting huge hopes and investments from governments, organizations and individuals alike. Yet at several levels, the high expectations often remain unfulfilled. So why is this a subject and activity that continues to command such intense interest from scholars and practitioners alike? Chris Mabey and Tim Finch-Lees provide a fresh analysis of the concept and practice of management and leadership development (MLD). Grounded in research, the authors set out the current state of management and leadership development practices, before introducing readers to competing theories of MLD and offering them a more critical perspective. Throughout the book, ideas are illustrated by international case studies and vignettes that evoke the perceptions and interests of the whole range of stakeholders in the management development process. Management Development has been written for upper level undergraduate and masters level students pursuing

courses in HRM, HRD, Leadership Development, Organizational Behaviour, Management, Organization Change, Personnel Management, and training and development modules.

Socioeconomic Evaluation of Megaprojects Markku Lehtonen,Pierre-Benoît Joly,Luis Aparicio,2016-11-22 The governance and evaluation of 'megaprojects' – that is, large-scale, complex, high-stakes infrastructure projects usually commissioned by governments and delivered through partnerships between public and private organisations – is receiving increased attention. However, megaproject evaluation has hitherto largely adopted a linear-rationalist perspective to explain the frequent failure of such projects to meet the 'iron triangle' of performance criteria: delivering on time, within budget, and according to specifications. This approach recommends greater control and accountability to remedy megaproject 'pathologies'. Drawing on empirical examples mainly from the transport sector and radioactive waste disposal, this book offers new perspectives to megaproject evaluation. Comprising contributions from leading experts in project evaluation and appraisal, this collection opens up new avenues by

suggesting two ways of improving megaproject evaluation: 1) approaches that go beyond the dominant linear/rationalist notion of policy processes, and emphasise instead the objective of opening up appraisal processes in order to enhance learning and reflexivity; and 2) approaches that extend evaluative criteria beyond the 'iron triangle', to cover the various socioeconomic impacts and preconditions for project success. This volume will be of great relevance to scholars and practitioners with an interest in megaprojects, energy and climate policy, radioactive waste management, urban design, and project planning and management.

It also investigates key areas such as governance, management, contractual and decision-making issues.

Managing Volunteers in Tourism Kirsten Holmes, Karen Smith, 2012-05-16 Recent years have seen an explosion in research on tourism volunteering. Volunteers are an essential part of tourism, whether they are volunteering in their local museum, at a sporting mega-event, as an airport ambassador, or travelling the globe as a volunteer tourist. *Managing Volunteers in Tourism* reviews the latest research to highlight the key management issues and relate them to the tourism volunteering context. It includes previously under-researched forms of tourism volunteering such as meet-and-greeters, surf life-savers, conservation, festival, and information centre volunteers and volunTourists. The book develops through three distinct sections, the first of which begins by introducing the concept of volunteering and considering the variety of volunteer forms and settings within tourism. The next part picks up the organisational approach and examines volunteer program design and planning, volunteer motivation, recruitment and selection, training and development, reward and retention, and diversity management. The final part consists of ten case studies from leading international researchers and practitioners identifying best practice and key management challenges. Real-life examples and case studies throughout this book provide an in-depth examination of the challenges facing those managing tourism volunteers, making this book indispensable for current and future managers in the tourism industry.

Events and Sustainability Andrew Smith, Judith Mair, 2022-09-05 This book examines the links between events and sustainability, with a particular focus on how festivals and events contribute to making places more inclusive, resilient and sustainable. Previous sustainability research in events often focused on reducing the negative environmental impacts, with a corresponding lack of consideration of socio-economic dimensions. More recently, research has begun to consider events in relation to a range of economic and social issues, highlighting the growing importance of examining events through a critical lens. This book adopts a critical and broader approach to event sustainability, arguing that scholars should examine how events might contribute to sustainable development, rather than merely exploring how individual events could be made more sustainable. Accordingly, the contributors to this edited book address how events might change attitudes and behaviours by promoting sustainable lifestyles, communities and technologies. Following a detailed introduction, the book features 16 chapters written by scholars from across the world. The chapters in this book were originally published as a special issue of the *Journal of Sustainable Tourism*.
