The Age of Resilience Jeremy Rifkin, 2022-11-01 A sweeping new interpretation of the history of civilization and a transformative vision of how our species will thrive on an unpredictable Earth. The viruses keep coming, the climate is warming, and the Earth is rewilding. Our human family has no playbook to address the mayhem unfolding around us. If there is a change to reckon with, argues the renowned economic and social theorist Jeremy Rifkin, it's that we are beginning to realize that the human race never had dominion over the Earth and that nature is far more formidable than we thought, while our species seems much smaller and less significant in the bigger picture of life on Earth, undermining our long-cherished worldview. The Age of Progress, once considered sacrosanct, is on a deathwatch while a powerful new narrative, the Age of Resilience, is ascending. In *The Age of Resilience*, Rifkin takes us on a new journey beginning with how we reconceptualize time and navigate space. During the Age of Progress, efficiency was the gold standard for organizing time, locking our species into the quest to optimize the expropriation, commodification, and consumption of the Earth's bounty, at ever-greater speeds and in ever-shrinking time intervals, with the objective of increasing the opulence of human society, but at the expense of the depletion of nature. Space, observes Rifkin, became synonymous with passive natural resources, while a principal role of government and the economy was to manage nature as property. This long adhered to temporal-spatial orientation, writes Rifkin, has taken humanity to the commanding heights as the dominant species on Earth and to the ruin of the natural world. In the emerging era, says Rifkin, efficiency is giving way to adaptivity as the all-encompassing temporal value while space is perceived as animated, self-organizing, and fluid. A younger generation, in turn, is pivoting from growth to flourishing, finance capital to ecological capital, productivity to regenerativity, Gross Domestic Product to Quality of Life Indicators, hyper-consumption to eco-stewardship, globalization to glocalization, geopolitics to biosphere politics, nation-state sovereignty to bioregional governance, and representative democracy to citizen assemblies and distributed peerocracy. Future generations, suggests Rifkin, will likely experience existence less as objects and structures and more as patterns and processes and come to understand that each of us is literally an ecosystem made up of the microorganisms and elements that comprise the hydrosphere, lithosphere, atmosphere, and biosphere. The autonomous self of the Age of Progress is giving way to the ecological self of the Age of Resilience. The now worn scientific method that underwrote the Age of Progress is also falling by the wayside, making room for a new approach to science called Complex Adaptive Systems modeling. Likewise, detached reason is losing cachet while empathy and biophilia become the norm. At a moment when the human family is deeply despairing of the future, Rifkin gives us a window into a promising new world and a radically different future that can bring us back into nature's fold, giving life a second chance to flourish on Earth.

The Curse of the Boyfriend Sweater Alanna Okun, 2018-03-20 Every knitter knows that as soon as you start making your boyfriend a sweater, he will be out the door before you're done. But as Alanna Okun has learned, these life lessons are not limited to the curse of the boyfriend sweater. Like millions of women, Okun finds joy and solace in crafting. And she has also found some

essentials truths. Starting from when her grandmother first taught her to knit, crafting has been a part of her life, and her family's. Some people like to fish. Some like to play music. Or run. Okun likes to make things. Knitting, crocheting, sewing, decoupage - you name it, Okun has tried it, and even if she turned out to be not very good at it, she found it was good for her. In a world that shows itself impervious to our need for order and logic, crafting allows Okun to feel a sense of control - even if it's simply by making a piece of felt do what she wants it to. Crafting has helped keep her severe anxiety at bay, made a scary first apartment more hospitable, helped her heal from a broken heart. When Okun has two good friends die within a year of each other, it is crafting that helps her find hope again. The art and physicality of making things, whether it's nerdy embroidery or warm mittens, has helped her cope with life's internal trauma. In beautiful prose that belies her youth, Okun's essays about art, craft, and mental health will resonate with creative people no matter their medium, and no matter the troubles in their hearts. We can all relate to the need to fix what's inside by keeping our hands busy.

The End of Ownership Aaron Perzanowski, Jason Schultz, 2018-03-16 An argument for retaining the notion of personal property in the products we “buy” in the digital marketplace. If you buy a book at the bookstore, you own it. You can take it home, scribble in the margins, put it on the shelf, lend it to a friend, sell it at a garage sale. But is the same thing true for the ebooks or other digital goods you buy? Retailers and copyright holders argue that you don't own those purchases, you merely license them. That means your ebook vendor can delete the book from your device without warning or explanation—as Amazon deleted Orwell's 1984 from the Kindles of surprised readers several years ago. These readers thought they owned their copies of 1984. Until, it turned out, they didn't. In *The End of Ownership*, Aaron Perzanowski and Jason Schultz explore how notions of ownership have shifted in the digital marketplace, and make an argument for the benefits of personal property. Of course, ebooks, cloud storage, streaming, and other digital goods offer users convenience and flexibility. But, Perzanowski and Schultz warn, consumers should be aware of the tradeoffs involving user constraints, permanence, and privacy. The rights of private property are clear, but few people manage to read their end user agreements. Perzanowski and Schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits. But, most important, it would affirm our sense of self-direction and autonomy. If we own our purchases, we are free to make whatever lawful use of them we please. Technology need not constrain our freedom; it can also empower us.

The Open Book of Social Innovation Robin Murray, Julie Caulier-Grice, Geoff Mulgan, 2010 This book is about the many ways in which people are creating new and more effective answers to the biggest challenges of our times: how to cut our carbon footprint; how to keep people healthy; and how to end poverty. Quench Dana Cohen, Gina Bria, 2018-06-12 Based on breakthrough new science in the field of hydration, *Quench* debunks many popular myths about getting enough water and offers a revolutionary five-day jump start plan that shows how better hydration can reduce or eliminate ailments like chronic headaches, weight gain, gut pain, and even autoimmune conditions. Chronic headaches, brain fog, fatigue, weight gain, insomnia, gut pain, autoimmune conditions. We may think these and other all-too-common modern maladies are due to gluten intake or too much sugar or too little exercise. But there is another missing piece to the health puzzle: Proper hydration. Yes, even in this era of Poland Spring many of us are dehydrated due to moisture-lacking diets, artificial environments, medications, and over-dependence on water as our only source of hydration. For this reason, that new diet or exercise plan may fail because our body doesn't have enough moisture to support it. *Quench* presents a wellness routine that can reverse all of that, based on breakthrough new science in the field of hydration. Readers will be surprised to learn that drinking too much water can flush out vital nutrients and electrolytes. Here

is where gel water comes in: the water from plants (like cucumber, berries, aloe), which our bodies are designed to truly absorb right down to the cellular level. In fact, Ms. Bria's work as an anthropologist led her to the realization that desert people stay hydrated almost exclusively from what they eat, including gel plants like cactus. Based on groundbreaking science from the University of Washington's Pollack Water Lab and other research, Quench offers a five-day jump start plan: hydrating meal plans and the heart of the program, smoothies and elixirs using the most hydrating and nutrient-packed plants. Another unique feature of their approach is micro-movements -- small, simple movements you can make a few times a day that will move water through your fascia, the connective tissue responsible for hydrating our bodies. You will experience more energy, focus, and better digestion within five days . . . then move onto the lifetime plan for continued improvements, even elimination of symptoms.

Where We Think it Should Go Claire Becker,2010 Poetry. Poems should go to where we think, which means that they often end up in the loneliest, most impossible places. (California'll do, but there are others.) Once, when I was a little kid, I burned my hand with our car's cigarette lighter while my mom was busy paying for the gas she'd just pumped. I remember the meaty stench,

the little crop circle in my palm, but mostly I remember wanting badly to know a thing, a thing that sped off as quickly as it came, maybe quicker. Claire Becker's poems seem both driven by that impulse and in love with that result. They've got a throb at which it's hard not to wonder and, like more than one of us, an aching oddball soul Graham Foust.
