Concurrent and Real-time Systems Steve Schneider, 1999-11-15 The CSP approach has been widely used in the specification, analysis and verification of concurrent and real-time systems, and for understanding the particular issues that can arise when concurrency is present. It provides a language which enables specifications and designs to be clearly expressed and understood, together with a supporting theory which allows them to be analyzed and shown to be correct. This book supports advanced level courses on concurrency covering timed and untimed CSP. The first half introduces the language of CSP, the primary semantic models (traces, failures, divergences and infinite traces), and their use in the modelling, analysis and verification of concurrent systems. The second half of the book introduces time into the language, brings in the timed semantic model (timed failures) and finally presents the theory of timewise refinement which links the two halves together. Accompanying website:

Sharing with the Gods Theodora Suk Fong Jim, Suk Fong Jim, 2014 This book provides a comprehensive account of the offering all over the Greek world of so-called 'first-fruits' (aparchai) and 'tithes' (dekatai) from the Archaic to the Hellenistic period (c. 700 to 31 B.C.). Existing studies of Greek religion tend to focus on ritual performance, but this book investigates questions of religious belief and mentality: why the Greeks presented these gifts to the gods, and what their behaviour tells us about their religious world-view, presuppositions, and perception of the gods. An array of ancient sources is exploited to examine the diverse nature of aparchai and dekatai, the complexity of the motivations underlying the practice, the role of individuals in shaping tradition, possible interactions between individual and communal practices, the deployment of this religious custom in politics, and the transformation of a voluntary practice into a religious obligation.--

Byzantine Religious Culture Alice-Mary Maffry Talbot,Denis

Sullivan,Elizabeth A. Fisher,Stratis Papaioannou,2011-10-28 Twenty-five articles in art history, social history, literature, epigraphy, numismatics and sigillography pay tribute to Alice-Mary Talbot in a coherent volume related to her abiding interest in the study of Byzantine religious practices in their social context.

Cloudy with a Chance of Meatballs Judi Barrett,2011-06-14 The tiny town of Chewandswallow was very much like any other tiny town except for its weather which came three times a day, at breakfast, lunch and dinner. But it never rained rain and it never snowed snow and it never blew just wind. It rained things like soup and juice. It snowed things like mashed potatoes. And sometimes the wind blew in storms of hamburgers. Life for the townspeople was delicious until the weather took a turn for the worse. The food got larger and larger and so did the portions. Something has to be done in Chewandswallow...and in a hurry.

Poultry Products Processing Shai Barbut,2016-04-19 Poultry Products

Processing: An Industry Guide covers all major aspects of the modern poultry further processing industry. The author provides a comprehensive guide to the many steps involved in converting poultry muscle (chicken, turkey, duck, ratite, etc.) into meat and highlights the critical points required to assure high quality and safe product manufacturing. The book opens with an overview of the poultry industry and then discusses poultry anatomy and muscle biology as they relate to meat quality and potential problems associated with further processing. Several chapters are devoted to meat product formulations (including numerous recipes), processing equipment, and principles of equipment operation. A separate chapter is devoted to the growing field of battering and breading poultry products, such as chicken nuggets, with many illustrations of equipment operation, discussions of the various breading employed, and trouble shooting. Another section focuses on food safety, microbiology, sanitation methods, and HACCP, including models for primary and further processing. Material on meat color, color defects, flavor, and sensory analysis is also included to help the reader understand factors affecting the challenges and problems the industry faces when marketing poultry products.

Power Electronics and Renewable Energy Systems C. Kamalakannan, L. Padma Suresh, Subhransu Sekhar Dash, Bijaya Ketan Panigrahi, 2014-11-19 The book is a collection of high-quality peer-reviewed research papers presented in the Proceedings of International Conference on Power Electronics and Renewable

Energy Systems (ICPERES 2014) held at Rajalakshmi Engineering College, Chennai, India. These research papers provide the latest developments in the broad area of Power Electronics and Renewable Energy. The book discusses wide variety of industrial, engineering and scientific applications of the emerging techniques. It presents invited papers from the inventors/originators of new applications and advanced technologies.

Viral Vectors for Gene Therapy Otto-Wilhelm Merten, Mohamed Al-Rubeai, 2011-05-19 The huge potential for gene therapy to cure a wide range of diseases has led to high expectations and a great increase in research efforts in this area, particularly in the study of delivery via viral vectors, widely considered to be more efficient than DNA transfection. In Viral Vectors for Gene Therapy: Methods and Protocols, experts in the field present a collection of their knowledge and experience featuring methodologies that involve virus production, transferring protocols, and evaluating the efficacy of gene products. While thoroughly covering the most popular viral vector systems of adenovirus, retrovirus, and adeno-associated virus, this detailed volume also explores less common viral vector systems such as baculovirus, herpes virus, and measles virus, the growing interest in which is creating a considerable demand for large scale manufacturing and purification procedures. Written in the highly successful Methods in Molecular Biology™ series format, many chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-

by-step, readily reproducible laboratory protocols, and vital tips on troubleshooting and avoiding known pitfalls. Comprehensive and practical, *Viral Vectors for Gene Therapy: Methods and Protocols* provides basic principles accessible to scientists from a wide variety of backgrounds for the development of gene therapy viral products that are safe and effective.

Social Studies Reform, 1880-1980 Hazel W. Hertzberg, 1981 The purposes,

methodologies, and curricula of the social studies over the past 100 years are examined in this paper. This history was written to provide a useful background for current efforts to reform the social studies. The paper, which consists of nine chapters, begins with a discussion of the meanings, definitions, and beginnings of social studies. The three factors that set the stage for the development of the social studies are examined: the rise of the public high school, the growth of the universities, and the emergence of professional societies. Chapter two examines the 1916 report and the 1920s. The American Historical Association (AHA) Commission on the social studies and the 1930s are treated in chapter three. Chapter four examines the effect that World War II had on the social studies. The New Social Studies movement is the topic of chapters five, six, and seven. What happened in the 1970s is discussed in chapter eight. Following the summary and comments of chapter nine, there are name and subject indexes. (Author/RM)

Practice of High Performance Liquid Chromatography Heinz

Engelhardt, 2012-12-06 During its short 20 year history High Performance Liquid Chromatography (HPLC) has won itself a firm place amongst the instrumental methods of analysis. HPLC has caused a revolution in biological and pharmaceutical chemistry. Approximately two thirds of the publications on HPLC are concerned with problems from this area of life science.

Biotechnology, where it is necessary to isolate substances from complicated mixtures, is likely to give further impetus to the dissemination of modern liquid chromatography in columns, particularly on the preparative scale. This book presents, by means of examples, the application of HPLC to various fields, as well as fundamental discussions of chromatographic methods. The quality of the analytical result is decisively dependent on the qualities of the equipment employed (by Colin, Guiochon, and Martin). Especially the demands are discussed that are placed on the components of the instrument including those for data acquisition and processing. The section on quantitative analysis (by ABhauer, Ullner) covers besides the principles also the problems of ensuring the quality of the data in detail. The basic problems arising by enlarging the sample size to preparative dimensions and

the requirements put on the apparatus are discussed in the section on preparative applications (by Wehrli).
