Parallel Programming, Models and Applications in Grid and P2P Systems F. Xhafa,2009-06-04 The demand for more computing power has been a constant trend in many fields of science, engineering and business. Now more than ever, the need for more and more processing power is emerging in the resolution of complex problems from life sciences, financial services, drug discovery, weather forecasting, massive data processing for e-science, e-commerce and e-government etc. Grid and P2P paradigms are based on the premise to deliver greater computing power at less cost, thus enabling the solution of such complex problems. Parallel Programming, Models and Applications in Grid and P2P Systems presents recent advances for grid and P2P paradigms, middleware, programming models, communication libraries, as well as their application to the resolution of real-life problems. By approaching grid and P2P paradigms in an integrated and comprehensive way, we believe that this book will serve as a reference for researchers and developers of the grid and P2P computing communities. Important features of the book include an up-to-date survey of grid and P2P programming models, middleware and communication libraries, new approaches for modeling and performance analysis in grid and P2P systems, novel grid and P2P middleware as well as grid and P2P-enabled applications for real-life problems. Academics, scientists, software developers and engineers interested in the grid and P2P paradigms will find the comprehensive coverage of this book useful for their academic, research and development activity.

Movements, Migrants, Marginalisation Heiko Pleines,Sabine Fischer,Hans-Henning Schröder,2012-02-24 The end of socialism posed a historical challenge to European societies. The former socialist Central and East European countries were faced with what has been called a triple transformation: Mutually dependent changes in the political, economic, and social spheres. At the same time, the old EU member states had to develop strategies to react to these developments and integrate former socialist societies.This post-socialist transformation of Europe coincided with a number of broader trends in the political, economic, and social spheres which are often collectively referred to as globalisation. Success or failure to adapt to these changes creates winners and losers. The focus of this edited volume is on various groups of losers and the challenges they face as a result of their marginalisation.This book presents the results of the Changing Europe Summer School on Justice as a societal and political matter. Equality, social and legal security as conditions for democracy and the market that took place in Berlin in July 2006. The Summer School brought together more than 30 young scholars from all over the world who work on issues related to Central and Eastern European societies and the enlarged EU.
