Urban Youth in China Fengshu Liu,2011-01-25 Fengshu Liu situates the lives of Chinese youth and the growth of the Internet against the backdrop of rapid and profound social transformation in China. In 2008, the total of Internet users in China had reached 253 million (in comparison with 22.5 million in 2001). Yet, despite rapid growth, the Internet in China is so far a predominantly urban-youth phenomenon, with young people under thirty (especially those under twenty-four), mostly members of the only-child generation, as the main group of the netizens' population. As both youth and the Internet hold the potential to inflict, or at least contribute to, far-reaching economic, social, cultural, and political changes, this book fulfills a pressing need for a systematical investigation of how youth and the Internet are interacting with each other in a Chinese context. In so doing, Liu sheds light on what it means to be a Chinese today, how 'Chineseness' may be (re)constructed in the Internet Age, and what the implications of the emerging form of identity are for contemporary and future Chinese societies as well as the world.

Education in China Since 1976 Xiufang Wang,2010-06-28 China has the largest education system in the world. The total enrollment of students in regular and adult schools at all levels exceeds 320 million, accounting for more than a quarter of the nation's population. Western educators, foreign companies, and individual entrepreneurs have invested in Chinese education but, perhaps because of the complexity of the Chinese education system and the rapid development of educational reforms, have had little success. This work examines the education system in post-Mao China from 1976 to the present. It explores how the Chinese government sees the development of its educational practices within the nation's broader social, economic, political, and cultural contexts; how it identifies new issues that emerge in the process of what might be called educational globalization; how it translates these issues into specific educational policies, activities, and goals; how the education reforms fit China's social and political realities and objectives; how the new policies affect foreign student affairs and Chinese students studying abroad; the ways in which the government promotes international educational cooperation and exchange; the opportunities for Western institutions to introduce programs in China; and current trends and their effect on the internationalization of education.

Chinese Science and Technology Industrial Parks Susan M. Walcott,2017-11-30 Title first published in 2003. This book examines types of advanced technology Chinese districts set aside for developing products for national and

global markets. Culminating in a proposed best practice model for Chinese integration into global networks, based on China's own particular political economy.

Aspect in Mandarin Chinese Richard Xiao, Tony McEnery, 2004-11-29 Chinese, as an aspect language, has played an important role in the development of aspect theory. This book is a systematic and structured exploration of the linguistic devices that Mandarin Chinese employs to express aspectual meanings. The work presented here is the first corpus-based account of aspect in Chinese, encompassing both situation aspect and viewpoint aspect. In using corpus data, the book seeks to achieve a marriage between theory-driven and corpus-based approaches to linguistics. The corpus-based model presented explores aspect at both the semantic and grammatical levels. At the semantic level a two-level model of situation aspect is proposed, which covers both the lexical and sentential levels, thus giving a better account of the compositional nature of situation aspect. At the grammatical level four perfective and four imperfective aspects in Chinese are explored in detail. This exploration corrects many intuition-based misconceptions, and associated misleading conclusions, about aspect in Chinese common in the literature.

Translocal China Tim Oakes, Louisa Schein, 2006-08-21 Inter-disciplinary in approach, this collection of essays explores China's reform era development within the concept of translocality. A key element of spatial change in today's China has been the unprecedented geographic mobility of millions of labour migrants, tourists, brides, entrepreneurs, and many others. But translocality doesn't just mean people. It is crucially constituted by the circulation of capital, ideas, images, goods, styles, services, and disease to name but a few. With contributions from well-respected China specialists, the essays focus simultaneously on mobilities and localities, drawing our attention to the multiplying forms of mobility in China whilst retaining the importance of localities in people's lives. The book provides a clear path to understanding the importance of translocality as a concept along with concrete examples of its operation in China. Unique in approach, it is at once a study of the connections between location and culture, politics, economics, bodies, gender and technology.

Redrawing Local Government Boundaries John Meligrana, 2004 Local governments today are under extreme pressure to undertake boundary reform. The global trend toward urbanization has brought with it economic, environmental, social, and regional demands that have severe implications for local governments and their territories. As a result, changing the areal jurisdiction of this most basic level of government has become a persistent and pressing challenge around the globe. This collection examines the legal and regulatory procedures involved in such municipal restructuring. Case studies from eight nations - the United States, Canada, Spain, Germany, Israel, Korea, China, and South Africa - investigate how and why local governments have been enlarged in scope and reduced in number within each country. Four key aspects are examined: the geography of the local government boundary problem, the procedures associated with boundary reform, the roles of institutions and actors in boundary reform, and the implications for urban and regional governance. *Redrawing Local Government Boundaries* offers a broad theoretical understanding of local government boundary reform and informs the wider scholarly discussion about

institutional change, state structures, and the areal jurisdiction of local governments. The first international comparative study of local boundary reform, it will be a valuable reference for scholars and students of political science, public administration, geography, urban studies, and urban planning.

Rural Democracy in China B. He, 2007-09-17 This book examines village democracy and the prospects of China's democratization. It explains how three key factors - township, economy and kinship - shape village democracy and account for rural variations. It considers the extension of village to township elections, the idea of a mixed regime and its impact on political development in China.

The Grammar of Chinese Characters James Myers, 2019-04-16 Anybody who reads or writes Chinese characters knows that they obey a grammar of sorts: though numerous, they are built out of a much smaller set of constituents, often interpretable in meaning or pronunciation, that are themselves built out of an even smaller set of strokes. This book goes far beyond these basic facts to show that Chinese characters truly have a productive and psychologically real lexical grammar of the same sort seen in spoken and signed languages, with non-trivial analogs of morphology (the combination of potentially interpretable constituents), phonology (formal regularities without implications for interpretation), and phonetics (articulatory and perceptual constraints). Evidence comes from a wide variety of sources, from quantitative corpus analyses to experiments on character reading, writing, and learning. The grammatical approach helps capture how character constituents combine as they do, how strokes systematically vary in different environments, how character form evolved from ancient times to the modern simplified system, and how readers and writers are able to process or learn even entirely novel characters. This book not only provides tools for exploring the full richness of Chinese orthography, but also offers new ways of thinking about the most fundamental question in linguistic theory: what is grammar?

Urbanization, Energy, and Air Pollution in China Chinese Academy of Sciences, Chinese Academy of Engineering, National Academy of Engineering, National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, 2005-02-04 In October 2003, a group of experts met in Beijing under the auspices of the Chinese Academy of Sciences, Chinese Academy of Engineering, and National Academy of Engineering (NAE)/National Research Council (NRC) of the National Academies to continue a dialogue and eventually chart a rational course of energy use in China. This collection of papers is intended to introduce the reader to the complicated problems of urban air pollution and energy choices in China.

The Chinese Question Caroline S. Hau, 2014-02-28 The rising strength of mainland China has spurred a revival of Chineseness in the Philippines. Perceived during the Cold War era as economically dominant, political disloyal, and culturally different, the Chinese presented themselves as an integral part of the Filipino imagined community. Today, as Filipinos seek associations with China, many of them see the local Chinese community as key players in East Asian regional economic development. With the revaluing of Chineseness has come a repositioning of Chinese racial and cultural identity. Philippine mestizos (people of mixed ancestry) form an important sub-group of the Filipino elite, but their Chineseness was occluded as they disappeared into the emergent Filipino nation. In the twentieth century, mestizos defined themselves and based claims to privilege on white ancestry, but mestizos are now actively reclaiming their Chinese heritage. At the same time, so-called pure Chinese are parlaying their connections into cultural, social, symbolic, or economic capital, and leaders of mainland Chinese state companies have entered into politico-business alliances with the Filipino national elite. As the meanings of Chinese and Filipino evolve, intractable contradictions are appearing in the concepts of citizenship and national belonging. Through an examination of cinematic and literary works, *The Chinese Question* shows how race, class, ideology, nationality, territory, sovereignty, and mobility are shaping the discourses of national integration, regional identification, and global cosmopolitanism.

Tax Reform in Rural China Hiroki Takeuchi, 2014-08-11 How does China maintain authoritarian rule while it is committed to market-oriented economic reforms? This book analyzes this puzzle by offering a systematic analysis of the central-local governmental relationship in rural China, focusing on rural taxation and political participation. Drawing on in-depth interviews with Chinese local officials and villagers, and combining them with game-theoretic analyses, it argues that the central government uses local governments as a target of blame for the problems that the central government has actually created. The most recent rural tax reforms, which began in 2000, were a conscious trade-off between fiscal crises and rural instability. For the central government, local fiscal crises and the lack of public goods in agricultural areas were less serious concerns than the heavy financial burdens imposed on farmers and the rural unrest that the predatory extractive behavior of local governments had generated in the 1990s, which threatened both economic reforms and authoritarian rule.

Food, Wine and China Christof Pforr, Ian Phau, 2018-05-15 The growth of the Chinese economy and the emergence of the Chinese middle class have fuelled the rapid expansion of China's outbound tourism market, with many destinations around the world trying to capitalise on the opportunities created by the growing number of Chinese visitors. This book specifically focuses on the demand for food and wine tourism experiences by Chinese tourists, which in recent years has become an important constituent of destination competitiveness. Looking at the different ways in which individual destinations have responded to this increasing demand, this book provides a better understanding of the preferences, motivations and perceptions that underlie food and wine consumption by Chinese tourists. It also illustrates how food and wine tourism experiences have been used in a range of international destinations to specifically attract visitors from China. Including a range of case examples from the Asia-Pacific

region and Europe, this book ultimately investigates the strategic directions adopted to guide destination development and marketing initiatives. Such a perspective provides a novel contribution to the still limited body of knowledge on China outbound tourism and will be of interest to upper level students, researchers and academics in Tourism and Hospitality.

The Coming Man from Canton Chris W. Merritt, 2017-08-01 In *The Coming Man from Canton* Christopher W. Merritt mines the historical and archaeological record of the Chinese immigrant experience in Montana to explore new questions and perspectives. During the 1860s Chinese immigrants arrived by the thousands, moving into the Rocky Mountain West and tenaciously searching for prosperity in the face of resistance, restriction, racism, and armed hostility from virtually every ethnic group in American society. As second-class citizens, Chinese immigrants remained largely insular and formed their own internal governments as well as labor and trade networks, typically establishing communities apart from the main towns. Chinese miners, launderers, restaurant keepers, gardeners, railroad laborers, and other workers became a separate but integral part of the American experience in the Intermountain West. Although Chinese immigrants constituted more than 10 percent of the Montana Territory's total population by 1870, the historical records provide a biased and narrow perspective, as they were generally written by European American community members. Merritt uses the statewide Montana context to show the diversity of Chinese settlements that has often been neglected by archival studies. His research highlights how the legacy of the Chinese in Montana is, or is not, reflected in modern Montana identity and how scholars, educators, professionals, and the public can alter the existing perception of this population as the "other" and perceive it instead an integral part of Montana's past.

Participation and Empowerment at the Grassroots Gunter Schubert, Anna L. Ahlers, 2012 This monograph ties in the scholarly debate on Chinese village elections and their consequences for China's political system. It draws on comparative fieldwork conducted in six villages in two counties in Jiangxi and Jilin Provinces and one district in Shenzhen between 2002 and 2005, producing data from some 140 in-depth interviews of villagers and local officials up to the prefectural level. The major objective of this book is as much a critical assessment of the research literature of Chinese village elections published over the last fifteen years as to sharpen the reader's sight for the scope and limits of this important reform to generate regime legitimacy in the local state, an issue which has so far been neglected in the study of Chinese village elections. It hence contributes to our understanding of the

nexus between political participation and cadre accountability at the grassroots, and highlights a number of factors ensuring the persistence of one-party rule in contemporary China.

China's Economy Arthur R. Kroeber, 2020 This book is an effort to explain how China's economy got to where it is today, where it might be headed in the coming years, and what China's rise means for the rest of the world. It is intended to be useful to the general reader, who has an intelligent interest in China and its global impact but not necessarily a specialized background in either China or economics. Since the first edition was published in 2016 China's relevance to the world has increased dramatically, thanks to the more assertive foreign policy of president Xi Jinping and the move by the United States under the Trump Administration to treat China as a geopolitical rival. Because of its sheer size, the growing tensions with the United States, and the gulf in basic values between China and the international system it increasingly seeks to influence, understanding modern China's origins and trajectory is more important than ever. An economy is a complicated organism, which does not easily lend itself to description by narrative, as one might tell the story of a person's life. It is more like a jigsaw puzzle-to be precise, a three-dimensional jigsaw puzzle, in which the shapes of the pieces keep changing. Rather than a fixed structure like a molecule, a skyscraper, or a mathematical equation, an economy is a set of fairly solid institutions and fairly fluid arrangements created by people to enable them to get the goods and services that they want. The nature of these institutions and arrangements is largely determined by the political bargains made among the important groups in a society. As the composition, relative power, and interests of these groups change over time, so do the economic arrangements. In other words, considerations of political practicality usually trump those of economic efficiency. For economic policymakers, this means that they must make do with second- or third-best versions of their ideal recipes. For analysts, it means that describing an economy is more of a historical art than a natural science. To the extent it is a science, it is more physiology than physics--
