China in 2008 Kate Merkel-Hess,Kenneth Pomeranz,Jeffrey N. Wasserstrom,2009 The Beijing Olympics ensured that the world would be watching China in 2008, a year that turned out to be the most tumultuous and traumatic for the country since the massive Tiananmen uprising of 1989. Crippling winter storms, riots in Tibet, the devastating Sichuan earthquake, and many other dramatic events grabbed international headlines. This innovative book--based on postings from the noted group blog/electronic magazine China Beat as well as works from other leading publications and completely new material--takes the unique approach of bringing the timeliness of the blogosphere into book form, expanding and reflecting on stories in the news while retaining the eclectic, opinionated, and engaging feel of the blog. It will be invaluable reading for everyone with a keen interest in China today.

Social Determinants of Health in Non-communicable Diseases Katsunori Kondo,2021-11-04 This book is open access under a CC BY-NC-ND 4.0 license. This open access book is the first compilation that reviews a wide range of social determinants of health (SDHs) for non-communicable diseases (NCDs) and healthy ageing in Japan. With the highest life expectancy and the largest elderly population in the world, Japan has witnessed health inequality by region and social class becoming more prevalent since the 2000s. The first half of this volume describes in detail major NCDs, such as cancers, heart and kidney diseases, diabetes, stroke, and metabolic syndrome. The second half, on the other hand, explores various SDHs relating to healthy ageing. All chapters review and focus on SDHs, particularly health inequality associated with socio-economic status and social capital, which are widely addressed in the field of social epidemiology. The book makes the argument that "Health for All" advocated by the WHO should be implemented based on social justice and benefits for the greater society. Public health researchers and policymakers, both in Japan and other nations, will gain scientific evidence from this book to prepare for the coming era as ageing becomes a global issue.

The Economic History of Britain since 1700: Roderick Floud,D. N. McCloskey,1994-08-18 An economic history of Britain since 1700, in three volumes by thirty-nine eminent historians and economists, this book will succeed the first edition of Floud and McCloskey (published in 1981) as the leading textbook on its subject. The text has a firm economic basis, but emphasizes the historical context and chronology and is written in straightforward and jargon-free English. Volume 1 covers the period 1700-1860, that of Britain's rise to relative economic supremacy. Volume 2 discusses the period 1860-1939, that of the height of British economic power and of painful readjustment after 1914. Volume 3 considers the period since 1939, that of relative economic decline and of increasing involvement with the European Community.

Sierra Stories Gary Noy,2014-08-01 The author of Gold Rush Stories shares tales of the larger-than-life characters from the history of the legendary Sierra Nevada mountain range. With its 14,000-foot granite mountains, crystalline lakes, conifer forests, and hidden valleys, the Sierra Nevada has long been the domain of dreams, attracting the heroic and the delusional, the best of

humanity and the worst. Stories abound, and characters emerge so outlandish and outrageous that they must be real. Could the human imagination have invented someone like Eliza Gilbert? Born in Limerick, Ireland, in 1818, she transformed herself into Lola Montez, born in Seville, Spain, in 1823, and brought to the Gold Country the provocative "Spider Dance"—impersonating a young woman repelling a legion of angry spiders under her petticoats. Or Otto Esche, who in 1860 imported fifteen two-humped Bactrian camels from Asia to transport goods to the mines. Or the artist Albert Bierstadt, whose paintings Mark Twain characterized as having "more the atmosphere of Kingdom-Come than of California." Or multimillionaire George Whittell Jr., who was frequently spotted driving around Lake Tahoe in a luxurious convertible with his pet lion in the front seat. These, and scores more, spill out of the pages of this well-illustrated and lively tribute to the Sierra by a native son.

Nonattainment New Source Review, Us Environmental Protection Agency Regulation, 2018 Law Library, 2018-08-24 Nonattainment New Source Review (NSR) (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) The Law Library presents the complete text of the Nonattainment New Source Review (NSR) (US Environmental Protection Agency Regulation) (EPA) (2018 Edition). Updated as of May 29, 2018 The EPA is finalizing revisions to the regulations governing the nonattainment new source review (NSR) program mandated by section 110(a)(2)(C) of the Clean Air Act (CAA or Act). These revisions implement changes to the preconstruction review requirements for major stationary sources in nonattainment areas in interim periods between designation of new nonattainment areas and adoption of a revised State Implementation Plan (SIP). The revisions conform the nonattainment permitting rules that apply during the SIP development period following nonattainment designations before SIP approval to the Federal permitting rules applicable to SIP-approved programs. The changes are intended to provide a consistent national program for permitting major stationary sources in nonattainment areas under section 110(a)(2)(C) and part D of title I of the Act. In particular, these changes conform the regulations to the NSR reform provisions that EPA promulgated by notice dated December 31, 2002, except that these changes do not include the NSR reform provisions for clean units or pollution control projects, which the U.S. Court of Appeals for the D.C. Circuit vacated in *New York v. EPA*, 413 F.3d 3 (DC Cir. 2005). In addition, these changes include an interim interpretation of the NSR reform provision for a reasonable

possibility standard for recordkeeping and reporting requirements, in accordance with that court decision. This interim interpretation to the reasonable possibility standard applies for appendix S purposes, pending the completion of rulemaking to develop a more complete interpretation. This book contains: - The complete text of the Nonattainment New Source Review (NSR) (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) - A table of contents with the page number of each section

The Sweating Sickness John Caius,2022-07-20 This book was written by John Caius, an English physician, and second founder of the present Gonville and Caius College, Cambridge. Here, he lays out his findings regarding the sweating sickness - a mysterious and contagious disease that struck England and later continental Europe in a series of epidemics beginning in 1485. The last outbreak occurred in 1551, after which the disease apparently vanished. The onset of symptoms was sudden, with death often occurring within hours. Sweating sickness epidemics were unique compared to other disease outbreaks of the time: whereas other epidemics were typically urban and long-lasting, cases of sweating sickness spiked and receded very quickly, and heavily affected rural populations.
