Resisting Domination in Palestine Alaa Tartir, Timothy Seidel, Tariq Dana, 2024-04-04 This meticulously curated edited volume presents an assemblage of insightful, critical, and contemporary perspectives on how Israeli domination has been sustained and reproduced in new forms and means using various mechanisms and techniques of control, coloniality, and settler colonialism. Based on original empirical fieldwork, the contributors to this book adopt interdisciplinary and decolonial approaches in their examination of the intricate functions and structures of domination that permeate Palestinian life by illuminating the power dynamics at play and revealing the mechanisms that sustain the settler-colonial regime. This book identifies sites of colonial control and domination exerted on Palestine by Israel, and demonstrates how these sites of control are also sites of Palestinian resistance. The first section explores the political sites of control by focusing on governmentality, institutions, and technologies and mechanisms of control including how Israel manages access to health, life and death. The second section examines the economic mechanisms of exploitation, dispossession, and de-development

including banking, taxation and the relationships between finance capital, aid and military occupation. The third section turns attention to environmental sites of control, focusing on land, indigeneity, space and racial capitalism. Finally, section four scrutinizes the intellectual sites of control, highlighting how norms, narratives, and knowledge production perpetuate domination.

#identity Abigail De Kosnik, Keith Feldman, 2019-04-18 Since its launch in 2006, Twitter has served as a major platform for political performance, social justice activism, and large-scale public debates over race, ethnicity, gender, sexuality, and nationality. It has empowered minoritarian groups to organize protests, articulate often-underrepresented perspectives, and form community. It has also spread hashtags that have been used to bully and silence women, people of color, and LGBTQ people. #identity is among the first scholarly books to address the positive and negative effects of Twitter on our contemporary world. Hailing from diverse scholarly fields, all contributors are affiliated with The Color of New Media, a scholarly collective based at the University of California, Berkeley. The Color of New Media explores the intersections of new media studies, critical race theory, gender and women's studies, and postcolonial studies. The essays in #identity consider topics such as the social justice movements organized through #BlackLivesMatter, #Ferguson, and #SayHerName; the controversies around #WhyIStayed and #CancelColbert; Twitter use in India and Africa; the integration of hashtags such as #nohomo and #onfleek that have become part of everyday online vernacular; and other ways in which Twitter has been used by, for, and against women, people of color, LGBTQ, and Global South communities. Collectively, the essays in this volume offer a critically interdisciplinary view of how and why social media has been at the heart of US and global political discourse for over a decade.
