#identity Abigail De Kosnik,Keith Feldman,2019-04-18 Since its launch in 2006, Twitter has served as a major platform for political performance, social justice activism, and large-scale public debates over race, ethnicity, gender, sexuality, and nationality. It has empowered minoritarian groups to organize protests, articulate often-underrepresented perspectives, and form community. It has also spread hashtags that have been used to bully and silence women, people of color, and LGBTQ people. #identity is among the first scholarly books to address the positive and negative effects of Twitter on our contemporary world. Hailing from diverse scholarly fields, all contributors are affiliated with The Color of New Media, a scholarly collective based at the University of California, Berkeley. The Color of New Media explores the intersections of new media studies, critical race theory, gender and women's studies, and postcolonial studies. The essays in #identity consider topics such as the social justice movements organized through #BlackLivesMatter, #Ferguson, and #SayHerName; the controversies around #WhyIStayed and #CancelColbert; Twitter use in

India and Africa; the integration of hashtags such as #nohomo and #onfleek that have become part of everyday online vernacular; and other ways in which Twitter has been used by, for, and against women, people of color, LGBTQ, and Global South communities. Collectively, the essays in this volume offer a critically interdisciplinary view of how and why social media has been at the heart of US and global political discourse for over a decade.

Principles of Social Psychiatry Craig Morgan,Dinesh Bhugra,2010-06-14 Social psychiatry is concerned with the effects of the social environment on the mental health of the individual, and with the effects of the person with a mental disorder on his/her social environment. The field encompasses social interventions, prevention and the promotion of mental health. This new edition of Principles of Social Psychiatry provides a broad overview of current thinking in this expanding field and will be a source of ideas both in research and for the management of mental disorder. It opens by putting social psychiatry in perspective, within both psychiatry and the social sciences. From the patient's perspective, the outermost influence is the culture in which they live, followed by their neighbourhoods, workmates, and friends and family. The next section considers how we conceptualize the social world, from families through cultural identify and ethnicity to the wider social environment. The book reviews the social determinants and consequences of the major

mental disorders before considering interventions and service delivery at various levels to mitigate these. It closes with a review of the social impact of mental illness around the world and a thoughtful essay by the editors on the current state of social psychiatry and where it is heading.

   Regulating Content on Social Media Corinne Tan,2018-03-26 How are users influenced by social media platforms when they generate content, and does this influence affect users' compliance with copyright laws? These are pressing questions in today's internet age, and Regulating Content on Social Media answers them by analysing how the behaviours of social media users are regulated from a copyright perspective. Corinne Tan, an internet governance specialist, compares copyright laws on selected social media platforms, namely Facebook, Pinterest, YouTube, Twitter and Wikipedia, with other regulatory factors such as the terms of service and the technological features of each platform. This comparison enables her to explore how each platform affects the role

copyright laws play in securing compliance from their users. Through a case study detailing the content generative activities undertaken by a hypothetical user named Jane Doe, as well as drawing from empirical studies, the book argues that – in spite of copyright's purported regulation of certain behaviours – users are 'nudged' by the social media platforms themselves to behave in ways that may be inconsistent with copyright laws. Praise for Regulating Content on Social Media 'This book makes an important contribution to the field of social media and copyright. It tackles the real issue of how social media is designed to encourage users to engage in generative practices, in a sense effectively "seducing" users into practices that involve misuse or infringement of copyright, whilst simultaneously normalising such practices.' Melissa de Zwart, Dean of Law, Adelaide Law School, Australia This timely and accessible book examines the regulation of content generative activities across five popular social media platforms – Facebook, Pinterest, YouTube, Twitter and Wikipedia. Its in-depth, critical and comparative analysis of the platforms' growing efforts to align terms of service and technological features with copyright law should be of great interest to anyone studying the interplay of law and new media. Peter K. Yu, Director of the Center for Law and Intellectual Property, Texas A&M University
